With our UHD (3840x2160 @60Hz) capable DisplayPort fiber optic cable you have the possibility to connect up to 30m between your devices. The active cable (AOC) does not require a separate power supply and is particularly suitable for installation in the cable duct due to its small diameter.

- Total length of the end device distance (e. g. from notebook/laptop to beamer or PC to monitor): 30 meters

Hardware solution, no software required

- A signal repeater is built into the connectors.
- No external power supply required; the cable contains a copper fibre for power supply
- Small connector and cable dimensions; the cable has a smaller diameter than comparable cables made of pure copper due to the glass fibres.
- The practical plug design prevents the cable from slipping out of the DisplayPort socket.
- Compliant DP v1.2 (max. 4096 x 2560 @60Hz)
