Key Features & Specifications

- This kit contains:
  - • 5 PT100 4W Class A RTD Sensors to be used for the 34152A kit
- This product is to be used in applications where the voltages are less than or equal to 30 Vrms, 42.4 Vpk, and 60 DCV.

Description

The PT100/RTD 4-wire Class A sensor elements product consists of quantity five 4-wire PT100 RTD temperature sensor elements used for the 34152A. Temperature sensor elements feature easy installation and silicone-based, self-adhesive backing. Backing can be reapplied. Sensors are stripped 4-wire configuration (color code: black/black/red/red).

This product is to be used in applications where the voltages are less than or equal to 30 Vrms, 42.4 Vpk, and 60 DCV.

The Agilent 34153A is compatible with the 34460A, 34461A, 34410A, and 34411A.
