Product Range 2022/2023

# WHO ARE WE

Polyco Healthline combines the 85 years' expertise of two leading businesses, who provide protection and hygiene products and services in the workplace and home.

Our wide range and quality products, including reusable and disposable gloves, workwear and bags, is trusted and used by multiple sectors throughout UK and overseas.

From our state-of-the-art warehouse and laboratory testing facility in Lincolnshire, our expert teams drive research & development and maintain logistics and customer service levels to ensure just-in-time supply.

Designing, sourcing, licensing and selling products, we optimise every step across the global supply chain. We innovate in partnership with commercially-minded businesses to overcome their biggest challenges to ensure a more compliant and safer environment.

Together, we will ensure we stay Safe and Clean.

## DELIVERING YOU PROTECTION PRODUCTIVITY AND COMFORT

For any advice on our products, including how best to sell them, our specialist team is on hand:

- Call your Account manager 033 3320 8550
- Email [sales@polycohealthline.com](mailto:sales@polycohealthline.com)
- [customer.services@polycohealthline.com](mailto:customer.services@polycohealthline.com)
- [technical@polycohealthline.com](mailto:technical@polycohealthline.com)
- Visit us [www.polycohealthline.com](http://www.polycohealthline.com)

Alternatively, you can fill in a quick product enquiry form and our team of specialists will get back to you shortly:

SCAN ME

## An Extensive Range of Products All Under One Roof

From gloves to bags, workwear to paper, pulp to cotton – the breadth and quality of our product range is hard to find anywhere else.

And by constantly innovating new hygiene and protection solutions, Polyco Healthline is leading the way in glove dispensing technology and new safety solutions.

With so many products now available, you can cut down on the number of suppliers and trust us to deliver more of your inventory, through our robust logistics network.

### By consolidating your purchasing with Polyco Healthline, you will benefit from:

- ✓ Access to technical product experts who will listen to your commercial challenges and build a protection solution tailored to you.
- ✓ Fastidious quality control enhanced by our in-house UK laboratory and our Far Eastern QA team. Together they ensure end-to-end accreditation and standards compliance.
- ✓ Quantifiable resource and time savings by reducing the number of suppliers you deal with each week.
- ✓ Deeper relationships with a dedicated account expert and your very own customer service 'buddy' who understands your business.
- ✓ Quality products sourced from manufacturing partners with the most reliable production track records.

## Operational Excellence

Consistent and reliable supply means everything to you. So, we'll always aim for a speedy 48 to 72-hour turnaround on your order.

But sometimes supply chain complexities present problems beyond our control. It's at these times that your business relies on proactive account management, regular updates and the highest levels of accountability.

If you need support, you can speak to one of our friendly customer service agents. Partnered with your account manager, they will inform you of your order status and, if necessary, provide daily back order updates. Beyond their own extensive product knowledge, our agents also have an open communication channel to our industry experts who can offer more technical advice.

In short, we are there when you need us.

## Expert Eye

If you need specialist advice, wouldn't it be great to easily contact an expert in their field? We thought so.

Now you can access the knowledge your customers or workforce need, and ultimately make your world and that of your customers, safer and cleaner.

We've assigned ten experts from within the Polyco Healthline family to be there for you. Product developers, compliance gurus and sector specialists – together their expertise is unrivalled.

Read more and find their contact details on our website:

<https://www.polycohealthline.com/services/experts/>

## Technical Excellence

It's rare for providers to offer a state-of-the-art laboratory and testing facility as part of their service. Polyco Healthline does, and it underpins our product development and your customers' health and safety.

In these high-tech rooms, we work alongside some of the freshest minds in the UK and abroad – from universities to research bodies. We test out new ideas based on customer insight, learn what works best and then apply our learning to multiply our products' benefits.

And rather than waiting on a third-party provider, we can perform the vast majority of compliance tests in-house helping with product development and benchmarking. We are now UKAS accredited so we can carry out official CE marking tests – saving time and money.

## Health & Safety Training and Audits

We're passionate about Health and Safety. And we love to share our knowledge to help you do your job.

Our training and audits are the best ways to up-skill, learn more about protecting against risks and get insight into which products are right for your customers. Our training includes:

### 1. Toolbox Talks

PPE only protects when your workers wear it. To encourage staff to do just that our expert sales team is always happy to help.

Our low-key, engaging and informative 20-minute talks are a great way to explain PPE to your workforce. Teaching anything from cut resistance to infection control, our sales team are flexible. And they can host anything from a 'bells-and-whistles' presentation in the break room to an informative demo on the factory floor.

### 2. Hand Protection Assessment Survey

As part of our value-added service, our audit helps you decide which products will best safeguard the end user employees and support health & safety objectives. Using our detailed reporting process, our glove-industry experts will assess your risks, identify potential savings and advise on injury claims avoidance. At the end, you'll receive a sample of recommended products to trial.

## Our programme

#phAMBITION is Polyco Healthline's new sustainability programme. It aims to build upon our sustainability successes so far and set new targets and goals whilst unlocking the power of change. Our programme is aimed at addressing the social and environmental challenges of the next decade with commitments to improve the lives and wellbeing of our people with the smallest environmental footprint.

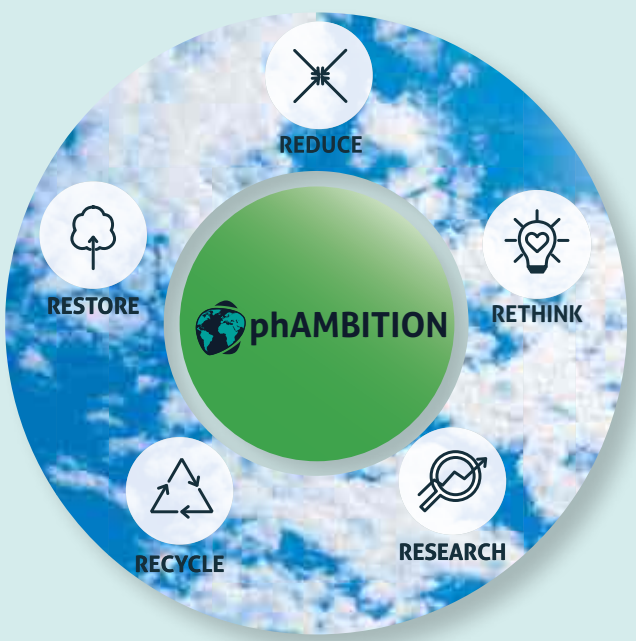

We have considered the United Nations Sustainable Development Goals (SDGs) against our value chain to better understand risks and opportunities and drive positive change. That is why our strategy is focused on addressing key sustainability impacts and opportunities throughout our value chain.

We are focusing on the importance of a holistic approach to sustainability development and improving wellbeing. At Polyco Healthline, we are continuously looking for global trends fuelling a regenerative approach to protect our People and Planet building circular inclusive value chain, with positive choices.

phAMBITION is Polyco Healthline's journey towards a sustainable future which supports a healthy, thriving world and promotes well-being for us all, for generations to come.

This is a fundamental transformation of what we do, to create growth and shared value whilst keeping sustainability at our core.

We have structured our ambitions into '5 R's'. These will form the cornerstone of our sustainability programme.

Our 2030 agenda represents a fundamental shift in thinking, recognising the interconnected imperative of a prosperous business, a thriving society, and a healthy environment. We are driving sustainable profit via triple-bottom-line, encompassing people, planet, and product leading transformation change goals for 2030.

## What are we doing about it at a corporate level?

Polyco Healthline is united in our approach to environmental sustainability.

For us, the challenge of sustainable transformation is balancing the need to keep our business in motion while making changes to reach our sustainability ambitions.

We understand the tough realities of our sector and that becoming sustainable doesn't happen overnight. It takes many smaller steps, sometimes challenging and some into the unknown, to really take sustainability to the next level and beyond. We are committed to building for a more sustainable future - together with internal and external stakeholders.

Our first step has been to identify the areas where we need to make the most changes to reduce our CO2 footprint. Our pursuit of Zero Waste, Say 'No' to plastics and Energy efficiency stems from this.

On a site level, our Bourne distribution centres use 670m2 of clear roof panelling optimising daylight and motion sensor energy efficient LED lighting to reduce energy usage.

We produce renewable energy on site with solar panels and are energy usage compliant with ISO 14001. Here we implement a system of 100% pallet recycling through recovery and repair, we also bail our cardboard and plastic on site.

Our car parks are fitted with charging points, and our company car fleet is being electrified.

## Why are we so focused on Sustainability?

Under our phAMBITION program, here at Polyco Healthline we are committed to making the world a safer and cleaner place. Both now and in years to come.

It is well documented that over 1 million plastic bottles are sold every minute, and that only 9% of these get recycled. This includes our contribution here in the UK alone of 7.7 billion plastic bottles per year (that's an average of 117 bottles used by each of us).

But what does that really mean? Each year between 5 and 13 million tonnes of plastic are leaked into the oceans, and it is thought that by 2050 there will be more plastic than fish (by weight) in our oceans.

And how does that affect us? Aside from the collapse of the natural environment, studies have shown that we may be consuming 39,000 to 52,000 microplastic particles a year. Importantly these studies show that we consume these via multiple channels and that avoiding consuming plastic in our diet is very difficult, 'if not impossible'.

## What are we doing about it at a product level?

Product level environmentally friendly solutions for industrial gloves pose the biggest challenge to us as a manufacturer. Because we design products for performance, longevity and comfort, materials are often blended and combined - making it harder to offer solutions.

However, thanks to our market leading R&D program, we have been the first to bring to market industrial gloves made in part from recycled plastic bottles (Recycled Polyethylene Terephthalate or RPET for short). Many textile raw materials are plastic based; polyester & nylon are widely used for example. By using RPET instead, with each pair of gloves, we give a home to 1 of the 480 billion plastic bottles used every year.

At present we have this technology in two general handling gloves, a thermal glove and two cut resistant glove options – But keep an eye on our social media for updates and new launches.

Across the wider business we have compostable gloves, compostable car seat covers and dissolvable screen wash tablets that save plastic.

## What are we doing about it at a sourcing level?

We work actively with our supply partners abroad to implement environmentally sustainable initiatives. These are chosen to reduce impact wherever possible. Whether it is powering factories with renewable energy sources, or recycling DMF chemicals in the production of polyurethane coatings, environmental sustainability plays a leading role in decision making.

Our Polyflex Eco manufacturing partner alone recycles 120,000 tonnes of water annually, whilst using solar panels for power, and transporting workers by electric buses.

## What are we doing about it at a packaging level?

We've embarked in the largest packaging review in the history of our reusable gloves. Our Environmental Sustainability Governance pledge is to reduce 40 tonnes of 'single use plastic packaging' from our product offering in total by the end of 2023. We have now started to introduce 'paper band' packaging for both primary and secondary packaging. Our target is to reduce 11.2 tonnes of plastics by end of 2022 – that's the equivalent area of 3 Football pitches!

Aware of 'knee jerk' reactions to environmental issues, we were careful when designing our paper band design to reduce the total packaging weight from the plastic packing currently used. By incorporating the user information within the design, we negate the need for an additional paper technical information sheet to be sent.

From April 2022, the UK government will tax all plastic packaging that doesn't contain more than 30% recycled plastic.

We understand that not all of our products are acceptable in paper bands, and for those that must remain in plastic, where possible we will be using at least 30% recycled content.

## Reusable Gloves

*As category leaders, we are committed to providing the best hand protection and finding cost-effective solutions for our customers. Our ultimate goal is to drive innovation through insight and offer the highest quality that enable you to work better, faster and safer.*

	Page number

# General Handling

*HSE reported that in 2020 19% of all workplace injuries were caused by 'handling, lifting or carrying'. A well-fitting, well-chosen glove can withstand abrasion and increase grip when handling objects.*

# Polyflex® Eco

An Environmentally Conscious Range Of Gloves

Due to the increased awareness of plastic pollution in recent years, there is a growing demand and a genuine drive in the market to find innovative ways to deal with plastic waste.

Did you know?

## The Problem

Over **1 MILLION** plastic bottles are sold every **MINUTE**

**ONLY 9%** of all plastic bottles are currently **RECYCLED**

It can take up to **1000 YEARS** to **DECOMPOSE**

Our **NEW** Polyflex® Eco range brings us a step closer to a more sustainable way of glove manufacturing and turns plastic waste into gloves.

Every step of the way, the Polyflex® Eco range of gloves is offering environmental benefits.

Through the entire life journey of the glove, PolyFlex® Eco will have less of an impact on our planet.

**1**

**Step 1.** Post-consumer plastic bottles (made from P.E.T, Polyethylene terephthalate) are sourced from government recycling collection facilities close to our factory location.

**2**

**Step 2.** Bottles are brought back to the yarn processing facility, where they are cleaned, stripped of labels, and 'shredded'.

**3**

**Step 3.** These 'flakes' are then re-extruded and spun into a yarn. This yarn is combined with nylon and spandex to make it comfier.

**4**

**Step 4.** The Polyflex® Eco liner gets palm dipped in either our foamed nitrile, or sandy latex. Both have been specially formulated to make sure the glove lasts as long as possible.

**5**

Here they are packed up in our plastic free packaging and shipped out to us in the UK.

## The Process

## The Benefits

less  
Oil

-50%  
CO<sub>2</sub>

packaging  
plastic  
free

25%  
made from  
recycled PET

-3x  
H<sub>2</sub>O  
usage

plastic  
Bottles  
recycled

## Key Facts

- Gloves are currently made from **virgin polyester** which is derived from oil.
- By not using virgin polyester we are using **less oil** per pair and the manufacturing process also requires **less water** usage.
- The process of refining oil for polyester production releases carbon dioxide, using **recycled PET** uses **less CO<sub>2</sub>** per pair.
- Our **plastic free packaging** will ensure the residual packaging made of paper and card can easily be recycled for a new life cycle.

✓ Less virgin material

✓ Less oil consumption

✓ Less CO<sub>2</sub> emission

✓ Less water used

### Polyflex® Eco

A greener and more sustainable way to protect your hands that will not compromise on quality and performance.

# Polyflex® Eco N

Seamless knitted liner made in part from recycled plastics, with a foamed nitrile coating

Reusable Gloves

General Handling

### Features

**Environmentally Conscious:** Each pair of gloves contains 10gr of recycled plastic bottles (PET), cutting down our reliance on virgin materials like oil based polyester

**Unmatched comfort:** Polyflex® Eco N sets a new standard for comfort and dexterity in the industry

**Durable:** Achieves maximum score for abrasion as defined in EN388:20016 helping to reduce waste created by premature discarding from early wear and tear

**Widest range of sizing:** Polyflex® Eco N is available from size 5 through to size 12 to ensure wearers of all sizes are protected, from XXS to XXXL

**Packaged plastic free:** Polyflex® Eco N is packed without the use of plastic, reducing the overall weight of packaging

**Knit Wrist:** Elasticated Knit wrist ensures a secure fit and keeps hands free from dust and debris

**SilverClear®** glove formulated from silver, a powerful and proven antimicrobial agent that inhibits bacterial, fungal and viral growth. The additive will protect the gloves from microbial growth but also from mould and bad odours avoiding premature material degradation and discolouration.

### Sectors:

- Automotive • Construction & Utility • Engineering and Manufacturing • Warehousing, Transport and Logistics • Waste Management and Local authority

# Polyflex® Eco L

Seamless knitted liner made in part from recycled plastics, with a sandy latex coating

Reusable Gloves

## Features

**Environmentally Conscious:** Each pair of gloves contains 10gr of recycled plastic bottles (PET), cutting down our reliance on virgin materials like oil based polyester

**Unmatched comfort:** Polyflex® Eco L sets a new standard for comfort and dexterity in the industry

**Grip:** The sandy latex coating has been specifically developed to resist abrasion, whilst maintaining superior grip and dexterity

**Widest range of sizing:** Polyflex® Eco L is available from size 5 through to size 12 to ensure wearers of all sizes are protected, from XXS to XXXL

**Packaged plastic free:** Polyflex® Eco L is packed without the use of plastic, reducing the overall weight of packaging

**Knit Wrist:** Elasticated Knit wrist ensures a secure fit and keeps hands free from dust and debris

**SilverClear®** glove formulated from silver, a powerful and proven antimicrobial agent that inhibits bacterial, fungal and viral growth. The additive will protect the gloves from microbial growth but also from mould and bad odours avoiding premature material degradation and discolouration.

<b>Colour</b>	<b>Green/Blue</b>
<b>Sizes</b>	<b>5-12</b>

## Packing

10 pairs per bundle band / 60 pairs per case

General Handling

The SilverClear® Glove range feature an antimicrobial treatment that provides an added protection against harmful viruses, bacteria and fungi.

## The Technology

SilverClear® is a highly efficient antimicrobial, bactericidal and anti-odour solution for the treatment of textiles.

Based on the revolutionary "Silver Technology", SilverClear® is economical, ecological, easy to apply and will not affect the feel of the material in any way.

Safe and non-toxic, SilverClear® was originally developed for use in advanced wound care and can add value to your products by delivering the fastest acting and most durable antibacterial performance on the market.

## How it works

Formulated from silver, a historically proven and powerful antibacterial agent, SilverClear® creates a potent and invisible coating which inhibits and kills bacteria.

## The power of silver ions

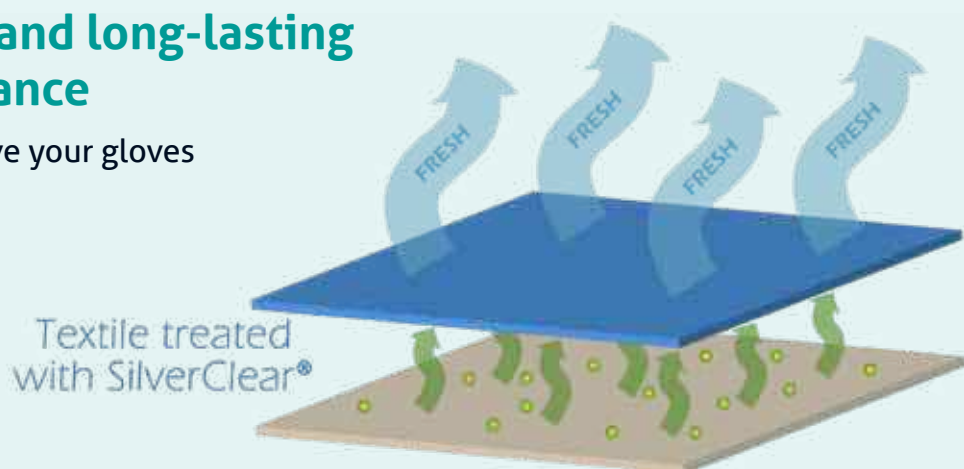

One of the most innovative aspects of SilverClear® is its bactericidal action. Most antimicrobial products are bacteriostatic, which means they only inhibit the growth of bacteria and don't necessarily destroy them. Not only does SilverClear® completely neutralize the proliferation of bacteria, but it also destroys the bacteria practically on contact.

## Durable and long-lasting performance

SilverClear® will leave your gloves fresher for longer.

WATCH ME

Textiles treated with SilverClear® stay fresh and free from odour for the lifetime of the article

# Polyflex® Ultra

Seamless knitted nylon liner with foamed palm coating made from a blend of polyurethane and nitrile

Reusable Gloves

## Features

**Grip:** The foamed coating utilises a blend of polyurethane and nitrile increasing resistance to oils and maximising grip, especially in wet and oily conditions

**Durable:** Combines the resilient and hard-wearing properties of polyurethane with the strength of nitrile to deliver excellent abrasion protection, durability and a long life expectancy

**Comfort:** The soft seamless knitted nylon liner and highly flexible coating ensures ultimate comfort and allows for long periods of wear without any signs of hand fatigue

**Knit Wrist:** Elasticated knit wrist ensures a secure fit and keeps hands free from dust and debris

**SilverClear®** glove formulated from silver, a powerful and proven antimicrobial agent that inhibits bacterial, fungal and viral growth. The additive will protect the gloves from microbial growth but also from mould and bad odours avoiding premature material degradation and discolouration.

# Grip It® Oil

Seamless knitted nylon liner with dual nitrile coating

Reusable Gloves

## Features

**Handling:** Providing ultimate abrasion protection and gripping ability. Utilising two layers of nitrile; fully coating the hand and the second coating the palm

**Durable:** Delivers excellent abrasion protection, durability and a long life expectancy

**Comfort:** The contoured design together with the soft seamless knitted nylon liner and resilient nitrile coating ensures ultimate comfort

**Knit Wrist:** Elasticated knitted wrist ensures a secure fit and keeps hands free from dust and debris

**Dual Coated:** First 'flat' nitrile coating effectively prevents water penetration, whilst the second 'foam' nitrile coating offers long lasting grip in wet and oily settings

**SilverClear®** glove formulated from silver, a powerful and proven antimicrobial agent that inhibits bacterial, fungal and viral growth. The additive will protect the gloves from microbial growth but also from mould and bad odours avoiding premature material degradation and discolouration

## Sectors

## Packing

10 pairs per bundle band / 60 pairs per case

General Handling

The SANITIZED® Glove range feature an antimicrobial treatment that provides an added protection against harmful bacteria and fungi.

## The Technology

Established in Switzerland in 1935, Sanitized AG is a leading antimicrobial brand solution. It has been offering antimicrobial additives to enhance the functionality of products for over 80 years.

Polyco Healthline has teamed with up with our suppliers to develop a range of gloves treated with Sanitized AG antimicrobial additive. The additive inhibits microbial activity improving the hygiene of the products.

By using Sanitized® treated gloves , you can help maintaining the safety and hygiene of the gloves by eliminating or reducing the presence and growth of microbes.

Sanitized® antimicrobial protection is fast becoming an essential added value for your industrial and commercial applications.

The Sanitized® hygiene treatment protects the gloves from microbial growth, odours and provides long lasting material protection.

WATCH ME

### ADDED BENEFITS:

- Viruses need a living host; by inhibiting the amount of bacteria on the glove surface, the chance of reproduction of viruses on a glove surface is significantly reduced.

**Features**

**Style & Coating:** This unique glove with 360 micro-foam coating has the look and style of a conventional leather drivers glove but is considerably lighter in weight and more dexterous

**Grip:** As well as excellent dry grip, the micro-foam coating offers optimum wet grip by channelling liquids away from the glove surface

**Comfort:** The soft fleecy lining keeps the hands warm and comfortable at all times

**Durability:** Delivers excellent abrasion protection, durability and a long life expectancy

**Fit:** Adjustable Velcro wrist strap ensures a secure fit and helps to keep hands free from dust and debris

**Sanitized™** glove featuring an antimicrobial treatment that provides added protection against harmful bacteria and fungi. The additive protects the gloves from microbial growth, odours and provides long lasting material protection

## Polyflex® Hydro KC

Hydrophobic treated seamless knitted nylon liner with a foamed nitrile three-quarter coating and touch sensitive fingertips

### Features

**Water Repellent:** The Hydrophobic solution which is applied through an intensive washing process, allows for a comprehensive and robust 3-Dimensional water resistant performance in wet and challenging conditions whilst maintaining maximum breathability

**Grip:** The lightweight nitrile knuckle coating is infused with air bubbles to provide an inherent cushioning effect and an enhanced grip in dry, damp and oily conditions

**Touch Sensitive:** Tactile touch sensitive fingertips enable the wearer to use touch screen machinery or touch screen devices with precision and without the need to remove the glove

**Durable:** Highly resistant to tear and abrasion, making for a durable and long-lasting glove

**Comfort:** Breathable lightweight liner constructed from nylon and elastane ensures ultimate comfort at all times

Sizes	6-11

### Packing

12 pairs per bundle band / 144 pairs per case

## Grip It® Dry

Seamless knitted nylon glove with sponge latex palm coating

### Features

**Comfort:** The soft seamless knitted yarn provides an excellent level of comfort, whilst the open back style allows the hand to breathe

**Dexterity and Fit:** The breathable, seamless liner combined with the soft sponge latex coating provides outstanding dexterity and a close fit

**Dry Grip:** The soft sponge latex coating offers excellent dry grip for safe and secure handling

**Knit Wrist:** Elasticated knitted wrist provides a secure fit and keeps hands free from dust and debris

Code	889
Colour	Red/Black
Sizes	7-11

### Sectors

- Construction & Utility • Engineering and Manufacturing
- Warehousing, Transport and Logistics

### Packing

10 pairs per bundle band / 60 pairs per case

## Grip It® Wet

Seamless knitted liner with dual latex coating

### Features

**Style:** Utilises two layers of latex coating on a nylon liner to provide a water resistant surface that extends right through to the wrist

**Grip:** Foamed latex palm coating engineered to increase resistance to liquids providing maximum grip in both wet and dry handling environments

**Comfort:** Ergonomic design offers a natural fit giving extra flexibility and comfort to the wearer

**Fit:** Tapered at the wrist to provide a secure fit

**Sanitized™** glove featuring an antimicrobial treatment that provides added protection against harmful bacteria and fungi. The additive protects the gloves from microbial growth, odours and provides long lasting material protection

Code	GIW
Colour	Black/Red
Sizes	7-11

### Sectors

- Construction & Utility • Engineering and Manufacturing
- Janitorial • Warehousing, Transport and Logistics • Waste Management and Local authority

### Packing

1 pair polybag / 10 pairs per master polybag / 100 pairs per case

## Reflex®

Seamless knitted polycotton liner with crinkle latex palm coating

### Features

**Excellent Grip:** Flexible latex palm coating provides excellent grip in both wet and dry conditions for safe and secure handling

**Comfort:** The seamless knitted polycotton liner provides exceptional comfort and reduces hand fatigue. The back of the glove is uncoated allowing the hand to breathe

**Durable:** Medium duty, offering excellent abrasion and tear resistance

**Knit Wrist:** Elasticated knitted wrist ensures a secure fit and keeps hands free of dirt and dust

Code	860
Colour	Yellow/Orange
Sizes	8-10

### Sectors

- Construction & Utility • Warehousing, Transport and Logistics

### Packing

1 pair per polybag / 10 pairs per master polybag  
120 pairs per case

## Blue Grip®

Cotton knitted liner with full crinkle latex coating

### Features

**Protection:** Ideal for handling rough objects

**Durable:** Offers good abrasion and tear resistance

**Grip:** Full crinkle latex coating provides excellent grip in both wet and dry conditions

**Comfort:** Brushed cotton interlock liner provides exceptional comfort for the wearer

**Knit Wrist:** Keeps hands free from dust and debris

**Hygiene:** Contains fungicidal and bacteriostatic agent

Code	840
Colour	Red/Blue
Sizes	8-10

### Sectors

- Construction & Utility • Waste Management and Local authority

### Packing

12 pairs per polybag / 48 pairs per case

# Matrix® B Grip

Cotton knitted liner with full crinkle latex coating

### Features

- Ideal for handling rough materials
- Provides a good grip in wet and dry conditions
- Brushed cotton interlock liner
- Elasticated knitted wrist for a secure fit

### Sectors

- Construction & Utility • Waste Management and Local authority

Code	MBG
Colour	Red/Blue
Sizes	7.5-10.5

### Packing

12 pairs per bundle band / 72 pairs per case **COMING SOON!**

# Matrix® S Grip

Seamless polycotton shell with crinkle latex palm coating

### Features

- Flexible crinkle latex palm coating for good wet and dry grip
- Seamless, breathable polycotton liner for comfort
- Elasticated knitted wrist provides a secure fit and keeps hands free from dust and debris
- Available in two colour combinations: Yellow/Orange and Yellow/Green

### Sectors

- Construction & Utility • Warehousing, Transport and Logistics

Code	50-MAT
Colour	Yellow/Orange
Sizes	8-10

### Packing

1 pair per paper band / 12 pairs per bundle band / 144 pairs per case

**COMING SOON!**

# GH300 S Grip

Seamless polycotton shell with crinkle latex palm coating

### Features

- Excellent grip in both wet and dry conditions for safe and secure handling
- Seamless breathable liner for comfort
- Elasticated knitted wrist provides a secure fit

### Sectors

- Construction & Utility • Warehousing, Transport and Logistics

Code	GH300
Colour	Yellow/Orange
Sizes	9-10

### Packing

12 pairs per polybag / 144 pairs per case

## Multi-Task™ E HV

Seamless knitted nylon liner with a nitrile palm coating and impact protection

### Features

**Highly Visible:** Improves visual awareness even in subdued light

**Reinforced:** Padding on the key areas of the palm and nitrile reinforcement between the thumb and forefinger serves to provide further defence against injury

**Grip:** The highly flexible nitrile coating has a slightly roughened finish which improves handling performance, particularly in light oil applications

**Fit:** Elasticated Neoprene cuff with adjustable Velcro wrist strap provides a secure fit

<b>Code</b>	<b>MTEHV</b>
<b>Colour</b>	<b>Yellow/Orange/Green</b>
<b>Sizes</b>	<b>7-11</b>

### Sectors

- Construction & Utility • Engineering and Manufacturing
- Oil and Gas • Waste Management and Local authority

### Packing

1 pair per polybag / 5 pairs per master polybag / 10 pairs per case

## Multi-Task™ E

Seamless knitted nylon liner with a nitrile palm coating

### Features

**Reinforced Thumb Crotch:** Nitrile reinforcement between the thumb and forefinger offers additional protection in an area that is highly susceptible to wear and tear

**Grip:** The highly flexible nitrile coating has a slightly roughened finish which improves handling performance, particularly in light oil applications

<b>Code</b>	<b>MTE</b>
<b>Colour</b>	<b>Red/Black</b>
<b>Sizes</b>	<b>7-11</b>

### Sectors

- Construction & Utility • Engineering and Manufacturing

### Packing

1 pair per paper band / 5 pairs per bundle band / 10 pairs per case

COMING SOON!

## Multi-Task® 3

Blend of synthetic leathers with PVC reinforced fingertips, inner palm and three open fingers

### Features

**Flexible:** Close fitting design ensures maximum user dexterity and touch screen functionality

**Comfortable:** Combination of materials offers excellent in-use comfort

**Stretch:** Materials flex in conjunction with the hand's natural movement

**Protection:** Reinforced areas on palm and finger tips ensure added protection in key areas

**Fit:** Adjustable Velcro wrist strap for a secure fit

Code	MT3
Colour	Black/Grey
Sizes	7-11

### Sectors

- Construction & Utility • Engineering and Manufacturing
- Waste Management and Local authority

### Packing

1 pair per paper band / 10 pairs per case

COMING SOON!

## Multi-Task® 5

Blend of synthetic leathers with PVC reinforced fingertips and inner palm

### Features

**Flexible:** Close fitting design ensures maximum user dexterity

**Comfortable:** Combination of materials offers excellent in-use comfort

**Stretch:** Materials flex in conjunction with the hand's natural movement

**Protection:** Reinforced areas on palm and finger tips ensure added protection in key areas

**Fit:** Adjustable Velcro wrist strap for a secure fit

Code	MT5
Colour	Black/Grey
Sizes	7-11

### Sectors

- Construction & Utility • Engineering and Manufacturing
- Waste Management and Local authority

### Packing

1 pair per paper band / 10 pairs per case

COMING SOON!

## Daytona™ & Daytona Plus™

Drivers style high grade leather glove

### Features

- Good abrasion, tear and puncture resistance
- Elasticated safety cuff holds glove in place and ensures a secure fit
- Fleece lining for extra comfort and warmth
- Soft high grade leather is comfortable and provides excellent grip
- Natural Grain Leather (DR100), Pigmented grain for extra water resistance (DR200)

### Sectors

- Construction & Utility • Warehousing, Transport and Logistics

Code	DR100	DR200
Colour	Yellow	Yellow
Sizes	8-10	8-11

### Packing

1 pair per polybag / 10 pairs per master polybag / 50 pairs per case

## Premium Chrome Rigger™

Rigger glove made from selected leather

### Features

- Rubberised safety cuff with vein patch for extra protection to the wrist area
- Machine press cut to give consistent quality and size
- Achieves excellent EN388 score for tear resistance
- Palm lined for comfort
- Also available on a header card for easy display and allowing for lower order quantities

### Sectors

- Construction & Utility • Engineering and Manufacturing

Code	LR158R
Colour	Red/Grey
Sizes	One size

### Packing

10 pairs per polybag / 60 pairs per case

## Rigmaster Double Palm Rigger™

Rigger glove with double thickness leather on palm

### Features

- Double thickness leather on the palm offers increased durability and safety
- Palm lined for comfort
- Excellent abrasion and puncture resistance
- Rubberised safety cuff with vein patch for additional protection to the wrist area

### Sectors

- Construction & Utility • Engineering and Manufacturing

Code	LR143DP
Colour	Red/Grey
Sizes	One size

### Packing

10 pairs per polybag / 60 pairs per case

# Matrix® GH113

Cotton interlock liner with heavy duty full nitrile coating

### Features

- Heavyweight nitrile coating for excellent abrasion resistance
- Cotton interlock support liner for comfort
- Provides good grip in both wet and dry conditions
- Knitted wrist for a secure fit

Code	GH113
Colour	White/Blue
Sizes	9-10

### Sectors

- Automotive • Construction & Utility • Engineering and Manufacturing • Warehousing, Transport and Logistics • Waste Management and Local authority

### Packing

12 pairs per polybag / 144 pairs per case

# Nitron® Lite

Light duty nitrile coated glove with cotton interlock liner

### Features

- Versatile: Combines the comfort of natural cotton with the protection of nitrile
- Flexibility: Lightweight nitrile three-quarter coating offers excellent flexibility and dexterity
- Grip: Textured surface provides a slip-resistant grip

Code	931
Colour	White/Yellow
Sizes	7-10

### Sectors

- Automotive • Construction & Utility • Engineering and Manufacturing • Warehousing, Transport and Logistics • Waste Management and Local authority

### Packing

12 pairs per polybag / 48 pairs per case

## Matrix® D Grip

Seamless knitted liner with PVC dot palm coating

### Features

Seamless construction for extra comfort

PVC dots for excellent grip and handling ability

Close fitting for good dexterity

Elasticated knit wrist provides a secure fit and keeps hands free from dust and debris

Available in two colours: white and grey

<b>Code</b>	<b>70-MAT</b>	<b>80-MAT</b>
<b>Colour</b>	<b>White/Blue</b>	<b>Grey</b>
<b>Sizes</b>	<b>7-10</b>	<b>6-10</b>

### Sectors

- Automotive • Construction & Utility • Engineering and Manufacturing • Warehousing, Transport and Logistics

### Packing

12 pairs per bundle band / 144 pairs per case

## Matrix® D Grip TS

Seamless knitted liner with PVC dot palm coating and touchscreen functionality

### Features

Seamless construction for extra comfort

PVC dots for excellent grip and handling ability

Close fitting for good dexterity

Elasticated knit wrist provides a secure fit and keeps hands free from dust and debris

Touchscreen fingertip for easy use on touchscreens

<b>Code</b>	<b>75-MAT</b>
<b>Colour</b>	<b>Blue</b>
<b>Sizes</b>	<b>6-10</b>

### Sectors

- Construction & Utility • Janitorial

### Packing

10 pair per polybag / 100 pairs per case

# Dermatology Cotton™

Cotton glove

### Features

Unbleached cotton glove with a knit wrist for superior comfort and fit  
Seamless design reduces the risk of skin irritation to the wearer  
Colour coded stitching on the cuff ensures easy size recognition  
Can be used as an underglove

### Sectors

- Automotive • Engineering and Manufacturing • Medical, Vet, Dental, Pharmaceutical • Warehousing, Transport and Logistics

Code	DERA
Colour	Natural
Sizes	S-L

### Packing

10 pairs per polybag / 200 pairs per case

# Serva® Polycotton Gloves

Lightweight natural fibre glove

### Features

Versatile: Combines the comfort of natural cotton with the protection of nitrile  
Flexibility: Lightweight nitrile three-quarter coating offers excellent flexibility and dexterity  
Grip: Textured surface provides a slip-resistant grip

### Sectors

- Engineering and Manufacturing • Janitorial • Retail & Household • Warehousing, Transport and Logistics

## Packing

20 pairs per polybag / 600 pairs per case

General Handling

We've embarked in the largest packaging review in the history of our reusable gloves.

Our Environmental Sustainability Governance pledge is to reduce 40 tonnes of "single use plastic packaging" from our product offering.

We have now started to introduce "paper band" packaging for both primary and secondary packaging.

Packed like a bundle of socks with a printed paper band, our new packaging solution for reusable gloves will provide all the regulatory information required for PPE whilst helping to reduce excess plastic packaging in the hand protection industry.

Our target is to reduce 11.2 tonnes of plastics by the end of 2022 - Laid out flat that would represent **3 Football pitches!**

You could save **1/2kg Plastic** for every case you buy!

 **Have you joined the pledge yet?**

**Help us reduce excess plastic packaging in the PPE Hand Protection Industry!**

**Look out for our Plastic Free Stamp\***

\*Paper Bands to be rolled out over the coming months across our reusable product range.

# Cut Resistant

*In the plastics processing industry, between 25 – 50% of all lost time accidents are caused by hand knife injuries.*

# Polyflex® Eco Cut

Hydrophobic treated seamless knitted cut resistant liner, with foamed nitrile palm, touch sensitive fingertips and made in part from recycled plastic bottles

Reusable Gloves

## Features

18 gauge cut level F: Ultra-lightweight 18-gauge liner achieves the maximum achievable levels of cut resistance according to EN388:2016, and excellent abrasion and tear resistance

Environmentally Conscious: Each pair of gloves contains 11 grams of recycled plastic bottles (PET), cutting down our reliance on virgin materials like oil based polyester

Touch Sensitive: Tactile touch sensitive fingertips enable the wearer to use touch screen machinery or devices with precision and without the need to remove the glove

Contact Heat Level 1: Heat resistant to contact heat level 1 to broaden real world application suitability

Reinforced Thumb Crotch: Flat nitrile reinforcement between the thumb and forefinger for additional protection in an area that is highly susceptible to wear and tear

Packaged plastic free: Polyflex® Eco Cut is packed without the use of plastic; reducing the overall weight of packaging

Water Repellent: The Hydrophobic solution; allows for comprehensive and robust 3-Dimensional water-resistant performance whilst maintaining maximum breathability

SilverClear® glove formulated from silver, a powerful and proven antimicrobial agent that inhibits bacterial, fungal and viral growth. The additive will protect the gloves from microbial growth but also from mold and bad odours avoiding premature material degradation and discoloration

Cut Resistant

# Armor Guard™ The Bear

Completely Waterproof, Cut, Impact, Heat & Cold Resistant Glove

**COMING SOON!**

Reusable Gloves

## Features

**Touch sensitive:** Tactile touch sensitive fingertips enable the wearer to use touch screen machinery or screen devices with precision

**Recycled PET Liner:** Each pair of gloves contains recycled plastic bottles (PET); cutting down our reliance on virgin materials like oil based polyester

**Highest Abrasion Score:** Ensures the gloves have exceptionally long usage

**Durable:** Specifically developed nitrile compound for ultimate durability

**Grip:** Excellent grip in wet, dry & oily conditions for safe and secure handling

**Comfort:** Internal soft cotton layer enables extra comfort and warmth

**Velcro cuff:** Keeps the gloves secure in use

**Waterproof:** The Bear utilises a 'new to industry' technology to offer a completely waterproof glove without effecting dexterity or breathability

**Impact Resistant:** Impact protective layer is made from a soft silicone-based rubber, to ensure best impact energy dispersion and upmost flexibility during use

**Cut resistant:** The glove scores EN388:2016 level E for cut resistance, to ensure protection against a wide variety of cut hazards

## Sectors

Cut Resistant

# Capilex® D

Durable, dexterous, great cut resistance all combined with a foamed Nitrile coating for enhanced grip

Reusable Gloves

**KYORENE®** is made from proprietary GRAPHENE based fibres. Lightweight, comfortable, soft, flexible, and extremely strong, Kyorene® is THE next generation material that will substantially change and enhance the properties of hand protection as it is known today.

- Anti-Bacterial
- Thermal Regulating
- Odour Neutralising
- UV Protecting

Cut Resistant

## Features

**Comfort:** Ultra-lightweight liner engineered without the addition of brittle glass fibre or steel, ensures the safety and superior comfort of the wearer during prolonged use

**Long lasting:** The reinforced thumb crotch makes sure the glove stands up to repeated abrasion and damage in a high stress area. The foamed Nitrile coating ensures exceptional wet and dry grip

**Real World Protection:** Proven high cut resistance, tested to EN388:2016 ISO Cut Level D. Heat resistant up to Contact Heat Level 1 ( 100°C ), EN:407:2004

**Precision:** The new Capilex D combines tactility and protection like no other glove on the market, meaning users no longer need to compromise between high cut resistance and comfort. Designed to be close fitting and available in a wide range of sizes the Capilex D is ideal for high precision handling where cut and heat are a risk

**Graphene Enhanced:** Capilex D is enhanced with Kyorene® Graphene to provide a multitude of inherent benefits. These include Anti-Bacterial, Thermal Regulating, Odour, Neutralising & UV Protecting properties designed to keep you safer and more comfortable than ever

# Polyflex® Hydro C5

Hydrophobic treated seamless knitted cut resistant liner with a foamed nitrile palm coating and touch sensitive fingertips

## Features

**Water Repellent:** The Hydrophobic solution allows for a robust 3-Dimensional water resistant performance whilst maintaining maximum breathability

**Protection:** Lightweight liner achieves excellent levels of cut, abrasion and tear resistance providing superb mechanical protection

**Grip:** The nitrile palm coating is infused with air bubbles to provide an inherent cushioning effect and an enhanced grip in dry, damp and oily conditions

**Touch Sensitive:** Tactile touch sensitive fingertips enable the wearer to use touch screen machinery or touch screen devices with precision and without the need to remove the glove

**Durable:** Highly resistant to tear and abrasion, making for a durable and long-lasting glove

**SilverClear®** glove formulated from silver, a powerful and proven antimicrobial agent that inhibits bacterial, fungal and viral growth. The additive will protect the gloves from microbial growth but also from mould and bad odours avoiding premature material degradation and discolouration

# Grip It® Oil C5

High visibility seamless cut resistant liner with a dual nitrile coating

Reusable Gloves

### Features

**Protection:** Made from a technically engineered yarn, the liner attains excellent EN388 scores in all categories

**Handling:** Providing ultimate abrasion protection and gripping ability. Utilising two layers of nitrile; the first layer fully coated and the second palm coated

**Durable:** Delivers excellent protection, durability and a long life expectancy

**Comfort:** The contoured design together with the soft seamless knitted liner and resilient nitrile coating ensures ultimate comfort with minimal hand fatigue in prolonged use

**High Visibility:** High visibility colour scheme increases visual awareness

**Knit Wrist:** Elasticated knitted wrist provides a secure fit and keeps hands free from dirt and debris

**SilverClear®** glove formulated from silver, a powerful and proven antimicrobial agent that inhibits bacterial, fungal and viral growth. The additive will protect the gloves from microbial growth but also from mould and bad odours avoiding premature material degradation and discolouration

### Packing

12 pairs per bundle band / 144 pairs per case

Reusable Gloves

Cut Resistant

Capilex FC optimizes the convergence of protection and performance. It features an 18G ultralight weight liner with yarns that provides TDM Level B performance.

The liner also features for breathability and ergonomic movement. The fully dipped Topflex Sandy Nitrile coating and the technology formulation provide enhanced abrasion resistance with 15000 cycles (8000 required for level 4) and excellent grip.

To provide all 4 advanced performance technologies, including excellent abrasion and cut performance, in a comfortable, flexible ultralight weight style, is a game changer for applications where workers have traditionally guarded against cut risks with heavier styles that limit their dexterity and breathability.

### Sectors

- Automotive • Construction & Utility
- Engineering and Manufacturing • Oil and Gas
- Waste Management and Local authority

Code	CFC
Colour	Black/Grey
Sizes	6-12

### Packing

10 pairs per bundle band / 60 pairs per case

### Features

**Full Sandy Nitrile Coating:** Developed specifically to deal with dusty conditions, the fully coated sandy nitrile coating ensures hands are kept clean and safe in the most challenging environments

**Comfort:** Yarn make-up has been optimised to make the glove as flexible as possible. This combined with a coating developed over a long R&D process, ensures the hand fatigue usually associated with fully coated gloves is minimised

**ISO Cut B:** Offers cut resistance to a variety of hazards whilst remaining soft and comfortable

**Reduced Plastic Packaging:** Capilex FC is packaged with reduced plastic to ensure we are protecting more than just hands

**SilverClear®** glove formulated from silver, a powerful and proven antimicrobial agent that inhibits bacterial, fungal and viral growth. The additive will protect the gloves from microbial growth but also from mould and bad odours avoiding premature material degradation and discolouration

***“Exceptional grip performance and fully coated protection in a comfortable ultralight weight cut resistant glove”***

# Dyflex® Air

Ultra-lightweight seamless knitted liner with Dyneema® Diamond Technology and polyurethane palm coating

## Features

**Comfort:** 18 gauge seamless knitted liner is ultra-lightweight, breathable and highly flexible, ensuring ultimate comfort at all times

**Cut Resistant:** Fine Dyneema® yarn offers superior cut resistance for a lightweight glove

**Handling:** Close fitting and dextrous which allows for precision handling

**Design:** Combines tactility and protection meaning you no longer have to compromise on user comfort, safety or productivity

## Sectors

- Automotive • Construction & Utility • Engineering and Manufacturing • Oil and Gas • Warehousing, Transport and Logistics • Waste Management and Local authority

<b>Code</b>	DFA
<b>Colour</b>	Teal/Black
<b>Sizes</b>	6-11

## Packing

10 pairs per polybag / 60 pairs per case

Dyneema® is a DSM Assets BV registered trademark

## Dyflex®

Seamless knitted glove with Dyneema® technology and polyurethane coating

### Features

**Strength:** This lightweight glove with Dyneema® provides excellent resistance to cut, abrasion and tear

**Comfort:** The seamless construction provides an exceptional level of comfort, whilst the open back style allows excellent breathability

**Dexterity:** The glove has been designed to be close fitting to give maximum dexterity for the most tactile of operations

**Knit Wrist:** Elasticated knitted wrist provides a secure fit and keeps hands free from dust and debris

**Colours:** Available in white and grey

### Sectors

# Reflex® K Plus

Seamless knitted Kevlar® liner with a crinkle palm latex coating

### Features

**Cut Resistant:** Kevlar® provides increased protection against cuts, slashes and abrasion

**Durable:** Heavy duty performance enhanced by the durable latex palm coating

**Grip:** Excellent grip in both wet and dry conditions for safe and secure handling

**Comfort:** Seamless knitted liner is extremely comfortable and is uncoated on the back of the hand allowing the hand to breathe

**Flexible:** Latex coating is very flexible minimising hand fatigue in prolonged use

**Knit Wrist:** Elasticated knitted wrist provides a secure fit and keeps hands free from dust and debris

# Chemical Resistant

*The chemical manufacturing industry adds £9 billion in gross value added annually to the UK, and are essential in production of medicines, food & drink, telecommunications, energy-saving, I.T, clothing and much more (Chemical Industries Association). The Janitorial market segment has helped keep us safe and clean during the COVID-19 pandemic.*

## Ketochem® (33cm)

Lightweight ketone resistant glove

### Features

**Design:** Unique formulation provides exceptional protection against a wide range of aggressive solvents

**Protection:** Excellent resistance to ketones, including MEK and acetone as well as aromatics such as toluene

**Economical:** Performance equivalent to high performance butyl and fluoroelastomer products at a more cost effective level

**Comfort:** Smooth non-textured material and anatomical shape ensures comfort and flexibility, and reduces hand fatigue

**Sensitivity:** The lightweight unsupported glove construction feels like a second skin and results in greater tactile sensitivity

<b>Code</b>	<b>KETO</b>
<b>Colour</b>	<b>Blue</b>
<b>Sizes</b>	<b>9-11</b>

### Sectors

### Packing

10 pairs per polybag / 50 pairs per case

# Pura™ (31cm)

Mediumweight PVC flock lined glove

## Features

**Sensitive Skin:** Provides a great alternative for people allergic to natural Latex proteins or sensitive to the chemical accelerators used in rubber gloves

**Comfort:** Anatomically shaped for additional comfort

**Grip:** Slip resistant pattern on palm enhances grip

**Flock Lined:** Soft lining absorbs perspiration keeping hands cool and comfortable

**Colours:** Available in a wide range of colours for easy job application coding

**Food Contact:** Tested in accordance with European standard EN1186 making it suitable for food contact

**Anti-Static Properties:** Meets EN1149

**Length:** 31cm gauntlet for protection to the forearm

## Sectors

• Food Manufacturing and Prep • Waste Management and Local authority

## Packing

12 pairs per polybag / 144 pairs per case

# Electrical Handling

*It is clear that demand in the UK for electrical gloves will grow rapidly over the coming years, helped in part by the government lead increased usage of electric vehicles.*

### Features

Latex Material: Excellent electrical resistance

Anatomical Shape: For greater user comfort

Maximum working AC voltage:

- Class 00 500V
- Class 0 1000V
- Class 1 7500V
- Class 2 17000V
- Class 3 26500V
- Class 4 36000V

### Sectors

- Automotive • Construction & Utility

# Composite and Arc Flash Gloves

Composite insulating glove

Reusable Gloves

## Features

Insulating glove 3 in 1: dielectric, mechanical and arc flash protection

Unique formulation of the rubber compound makes gloves extremely flexible

BiColour: internal black/external red to make visual inspection easier

Each pair of gloves is supplied with a pair of cotton fingerless under gloves for improved comfort

Maximum working AC voltage: Class 00 500V Class 0 1000V Class 1 7500V Class 2 17000V Class 3 26500V Class 4 36000V

Electrical Handling

# Electricians Glove Bag

Canvas bag for Electricians Gloves

## Features

- Designed to store and carry Electricians Gloves
- Protects gloves when not in use which prolongs performance
- Velcro fastening ensures that gloves remain safe and secure inside the bag
- Strap with buckle makes it easy to carry and attach

## Sectors

- Construction & Utility

Code	REBAG
Colour	Black
Sizes	One size

## Packing

1 bag per polybag

# SuperGlove® Volt Protector Gauntlet (With Buckle)

Leather gauntlet over-glove with securing buckle

## Features

- Designed to be worn over Electricians Gloves
- Provides additional mechanical protection
- Offers a higher level of grip
- Protects in dirty or oily environments
- Extends the lifespan of Electricians Gloves
- Available with or without a buckle

## Sectors

- Automotive • Construction & Utility

Code	RE-PRO
Colour	Grey
Sizes	8-13

## Packing

1 pair per paper band / 1 pair per case

# Vibration Reducing

*According to HSE, around 2 million people are currently thought to be at risk of Hand Arm Vibration Syndrome, a long term illness caused by vibration.*

# Tremor-Low™ X

Seamless knitted shell with anti-vibration coating

Reusable Gloves

## Features

**Innovative:** The unique coating on the glove acts to reduce the effects of impact, shocks and vibration

25.3% reduction of transmissibility of Medium frequency range (25Hz – 200Hz)

40.3% reduction of transmissibility of High frequency (200Hz – 1,250Hz)

**Comfort:** The soft knitted seamless liner is comfortable to wear over long periods of time, whilst the open back allows for excellent breathability

**Dexterity:** Unlike other impact gloves, Tremor-Low™ X allows the wearer a greater level of dexterity

**Knit Wrist:** Elasticated knitted wrist provides a secure fit and keeps hands free from dust and debris

## Sectors

- Automotive • Construction & Utility

## Teflon™ Mitt

Silver Teflon™ coated mitt lined with felt fabric

Reusable Gloves

### Features

Heat Resistant: Tested to Level 2 (up to 250°C) for contact heat according to EN407

Barrier: Non-stick Teflon coating prevents oil and grease from absorbing into the glove

Ambidextrous: Can be worn on either hand, extending the life of the glove

Extra Long: 38cm in length providing protection to the lower arm

Colour Coded: Available with green or red cuff trim to prevent contamination when dealing with raw and cooked food

Food Contact: Tested in accordance with European standard EN1186 making it suitable for food contact

Code	TEF
Colour	Silver
Sizes	One size

### Sectors

- Food Manufacturing and Preparation

### Packing

12 pairs per polybag / 48 pairs per case

Teflon™ is a Chemours™ registered trademark

## Volcano™

100% Kevlar® extra heavyweight gauntlet with heavyweight cotton inner lining

Hot Handling

### Features

Heat Resistant: Provides good protection against heat

Cut Resistant: Kevlar® provides increased protection against cuts, slashes and abrasion

Comfort: The knitted construction gives a degree of comfort, flexibility and dexterity not normally associated with such protection levels

Range: Available in 32cm (7564) and longer 58cm (7566) length for extra protection to the forearm

Contact Temperature: Level 3 for contact heat, can withstand temperatures of 350°C

Code	7564	7566
Colour	Yellow	Yellow
Sizes	32cm	58cm

1 pair per polybag / 12 pairs per case

# Tigmaster™

Sheepskin / leather welding gauntlet

### Features

Materials: Sheepskin palm (0.8mm) with heavy duty leather cuff (1.0mm)

Welding: Specifically designed for type B (Tig welding) and light mechanical handling

Compliant: With EN12477 - Welding Standard

### Sectors

- Automotive • Engineering and Manufacturing

Code	LMW124
Colour	Grey
Sizes	10

### Packing

1 pair per polybag / 100 pairs per case

# Weldmaster™

Premium quality chrome leather welding gauntlet

### Features

Protection: Welled seams protect against thermal and mechanical discharge

Thermal Lining: Thermal lining improves comfort and contact heat protection

Design: Specifically designed for type A (Mig/Arc welding) and light mechanical handling

Compliant: Compliant with BS EN12477 2001+A1:2005 Type A - Welding Standard

### Sectors

- Automotive • Engineering and Manufacturing

Code	LW93
Colour	Red
Sizes	9

### Packing

10 pairs per polybag / 30 pairs per case

# Thermatex™ (34oz Reverse Terry Loop Gauntlet)

Heavyweight 40cm reverse terry loop gauntlet

### Features

Heat Insulation: Provides good insulation against heat

Protection: Offers good mechanical protection

Comfort: Soft terry cloth cotton fabric is extremely comfortable

### Sectors

- Food Manufacturing and Preparation

Code	CTH310
Colour	White
Sizes	9

### Packing

1 pair per polybag / 50 pairs per case

# Fusion® (Glove)

Polyamide melt resistant disposable

Reusable Gloves

## Features

**Innovative:** Developed at Polyco Healthline's R&D centre, Fusion is the only product of its kind

**Melt Resistant:** The polyamide material can withstand temperatures of up to 200°C without melting

**Ambidextrous:** Can be worn on either hand, extending the life of the glove

**Comfort:** The special design allows for easy donning and removal but maintains an excellent level of dexterity

**Food Contact:** Tested in accordance with European standard EN1186 making it suitable for food contact

## Sectors

- Food Manufacturing and Preparation

Code	FUS50
Colour	Blue
Sizes	One size

## Packing

50 gloves per dispenser / 10 dispensers per case

Hot Handling

# Cold Handling

*British Standard BS7915 for working in cold environments highlights the need for a suitable and sufficient risk assessment to identify the necessary controls such as wearing appropriate PPE.*

# Polyflex® Eco Therm

Thermal lined, seamless knitted liner made in part from recycled plastics, with a sandy latex coating.

## Features

**Environmentally Conscious:** Each pair of gloves contains 24 grams of recycled plastic bottles (PET), cutting down our reliance on virgin materials like oil-based polyester.

**Warm:** Soft knitted thermal lining keeps hands exceptionally warm

**Grip:** The sandy latex coating has been specifically developed to resist abrasion, whilst maintaining superior grip and outstanding comfort and dexterity

**Packaged plastic free:** Polyflex® Eco Therm is packed without the use of plastic, reducing the overall weight of packaging.

**Cut resistant:** To ensure use in the widest range of sectors Polyflex® Eco Therm has been engineered to score a cut 3 against EN388 2016

**Hot and Cold Contact** Polyflex® Eco Therm has been engineered to protect against handling hot and cold objects

## Sectors

- Construction & Utility • Engineering and Manufacturing • Warehousing, Transport and Logistics
- Waste Management and Local authority

<b>Code</b>	<b>PETH</b>
<b>Colour</b>	<b>Orange/Black</b>
<b>Sizes</b>	<b>7-11</b>

## Packing

6 pairs per bundle band / 60 pairs per case

# Grip It® Oil Therm

Seamless knitted glove with a dual nitrile coating and fleecy liner

Reusable Gloves

## Features

**Handling:** Utilises two layers of nitrile coating to provide ultimate abrasion protection and gripping ability. The first layer which is a full coating is soft and resilient allowing for excellent dexterity. The second layer which is a palm coating, is infused with microfoam bubbles increasing resistance to oils and maximising grip

**Durable:** Delivers excellent abrasion protection, durability and a long life expectancy

**Fleecy Liner:** Provides exceptional warmth and comfort

**Hi-Vis:** High visibility colour improves visual awareness even in subdued light

**SilverClear®** glove formulated from silver, a powerful and proven antimicrobial agent that inhibits bacterial, fungal and viral growth. The additive will protect the gloves from microbial growth but also from mould and bad odours avoiding premature material degradation and discolouration

## Sectors

- Construction & Utility
- Engineering and Manufacturing
- Warehousing, Transport and Logistics

Cold Handling

# Vyflex® BOA (35cm)

Seamless supported PVC glove with BOA liner

### Features

- Protection: Good protection against oil, acids and other chemicals
- BOA Liner: Provides exceptional warmth and comfort
- Grip: Granular slip-resistant surface on the hand area for improved grip
- Durable: Excellent abrasion resistance and good tear resistance enhances durability
- Comfort: Anatomical shape aids flexibility and minimises hand fatigue
- Anti-Static Properties: Meets the surface resistivity requirements of EN1149
- Food Contact: Tested in accordance with European standard EN1186 making it suitable for food contact
- Length: 35cm gauntlet for protection to the forearm

Code	PF94
Colour	Blue
Sizes	9-10

### Sectors

- Engineering and Manufacturing • Waste Management and Local authority

### Packing

5 pairs per polybag / 25 pairs per case

# Freezemaster® II

Leather insulated glove

### Features

- Quality: Made from premium quality leather which is soft, resilient and provides excellent grip
- Comfort: Spandex on the back of the hand allows for total flexibility in hand movement
- Lining: Fleecy lining and waterproof membrane keeps hands warm and dry in cold conditions
- Range: Available with an extra long cuff for additional warmth and protection

Code	FM2	FM2LC
Colour	Black/Grey	Black/Grey
Sizes	6-11	6-11

### Sectors

- Warehousing, Transport and Logistics

### Packing

1 pair per paper band / 10 pairs per case

# Matrix® Hi-Viz

Seamless thermal high visibility glove with crinkle latex coating

### Features

- Fleecy lining keeps hands warm and comfortable in cold conditions
- Crinkle latex palm coating is highly flexible and offers excellent wet and dry grip
- Elasticated knitted wrist provides a secure fit and keeps hands free from dust and debris
- Also available on a header card for easy display and allowing for lower order quantities

### Sectors

- Construction & Utility • Warehousing, Transport and Logistics • Waste Management and Local authority

Code	90-MAT
Colour	Yellow/Blue
Sizes	7-10

### Packing

12 pairs per polybag / 144 pairs per case

# Thermit Grip™

Thermal knitted liner with PVC dot coated palm

### Features

- Provides insulation against the cold
- Seamless construction will not irritate hands
- Thermal yarn provides a close fit and excellent dexterity
- Ideal for use as an insulated liner under other Polyco Healthline products
- Grip: PVC dot coated palm for added grip
- Food Contact: Tested in accordance with European standard EN1186 making it suitable for food contact

### Sectors

- Construction & Utility • Engineering and Manufacturing • Food Manufacturing and Preparation • Warehousing, Transport and Logistics • Waste Management and Local authority

Code	780GP
Colour	Navy
Sizes	7-10

### Packing

12 pairs per bundle band / 120 pairs per case

# Thermit™

Thermal knitted liner

### Features

- Provides insulation against the cold
- Seamless construction will not irritate hands
- Thermal yarn provides a close fit and excellent dexterity
- Can be worn on either hand increasing the life of the glove and reducing costs
- Ideal for use as an insulated liner under other Polyco Healthline products
- Food Contact: Tested in accordance with European standard EN1186 making it suitable for food contact

### Sectors

- Construction & Utility • Engineering and Manufacturing • Food Manufacturing and Preparation • Warehousing, Transport and Logistics • Waste Management and Local authority

Code	780
Colour	Navy
Sizes	7-9

### Packing

12 pairs per bundle band / 120 pairs per case

# Hand Protection Assessment Survey

Safeguarding your employees & your business.

Our team of experts in hand protection is there to accompany you through your Hand Protection Assessment.

Should it be for an annual safety review or a change in process, we will expertly guide you through a detailed audit.

Available in person with site visits or via our newly launched virtual platform. We will accompany you through the entire process to ensure the correct level of PPE is used.

**WATCH ME**

## How do you want to do it?

- ✓ On site assessment
- ✓ Online assessment
- ✓ Digital assessment

**The choice is yours!**

## The danger of over simplifying glove requirements

Injuries can occur when businesses over simplify their glove requirements, seeking a one-glove solution, when such an approach is rarely suitable. Different tasks require different types and levels of protection and safety managers and employers need to ensure workers are adequately protected against the full spectrum of risks that they can expect to encounter. A Hand Protection Assessment Survey will help you find the right solution for most tasks and will minimise duplication and waste.

## A Polyco Healthline Hand Protection Assessment will:

- Provide a documented process to support your risk assessment procedures
- Help ensure your organisation complies with the current UKCA legislation, and EN standards
- Provide a detailed report highlighting the most appropriate specifications of hand and arm protection
- Identify the areas where improvements can be made both from a cost and best practice perspective
- Be undertaken by glove industry experts
- Help safeguard against expensive injury claims and time lost due to staff absences through injury

## Assessing the risks

When approaching safety glove selection as part of a Health & Safety risk assessment, a Hand Protection Assessment Survey is a good place to start. If a hazard cannot be removed and the risk cannot be avoided, a hand protection survey will help identify suitable protective products in line with current legislation. Polyco Healthline offers this comprehensive survey as a free service and it is undertaken by experienced industry experts.

**To arrange for a Hand Protection Assessment Survey contact your local area sales manager on 033 3320 8550 or email [HPAS@polycohealthline.com](mailto:HPAS@polycohealthline.com)**

# Standards Explained

All personal protective equipment (PPE) gloves must comply with the standard EN 21420, Protective Gloves General Requirements and Test Methods. Other standards, some of which are explained below, relate to specific types of hazards.

- Chemical Risk
- Mechanical Risk
- Thermal Risk
- Cold Risk

## EN ISO 374-1:2016+A1:2018

EN 374-1 is the standard for protective gloves against dangerous chemicals and micro-organisms.

Gloves are tested in the palm (unless over 400mm in which case the cuff is also tested) for permeation resistance against any of 18 specified chemicals.

There are 3 types of chemical resistant gloves; Type A, Type B and Type C as detailed.

The permeation performance levels are from 1-6, with 6 being the highest.

EN ISO 374-1:2016  
+A1:2018 Type A

UVWXYZ

### Type A

Passing a minimum level 2 permeation resistance against at least 6 chemicals. Code letters for chemicals shown under the pictogram.

EN ISO 374-1:2016  
+A1:2018 Type B

XYZ

### Type B

Passing a minimum level 2 permeation resistance against at least 3 chemicals. Code letters for chemicals shown under the pictogram.

EN ISO 374-1:2016  
+A1:2018 Type C

### Type C

Passing a minimum level 1 permeation resistance against at least 1 chemical. No letters under the pictogram.

EN ISO 374-5:  
2016

To claim chemical resistance (and micro-organism resistance) EN374-5 must also be passed which ensures the gloves do not leak when tested with air or water. Virus resistance can also be tested under EN374-5 and if passed the word Virus can be shown under the EN374-5 pictogram.

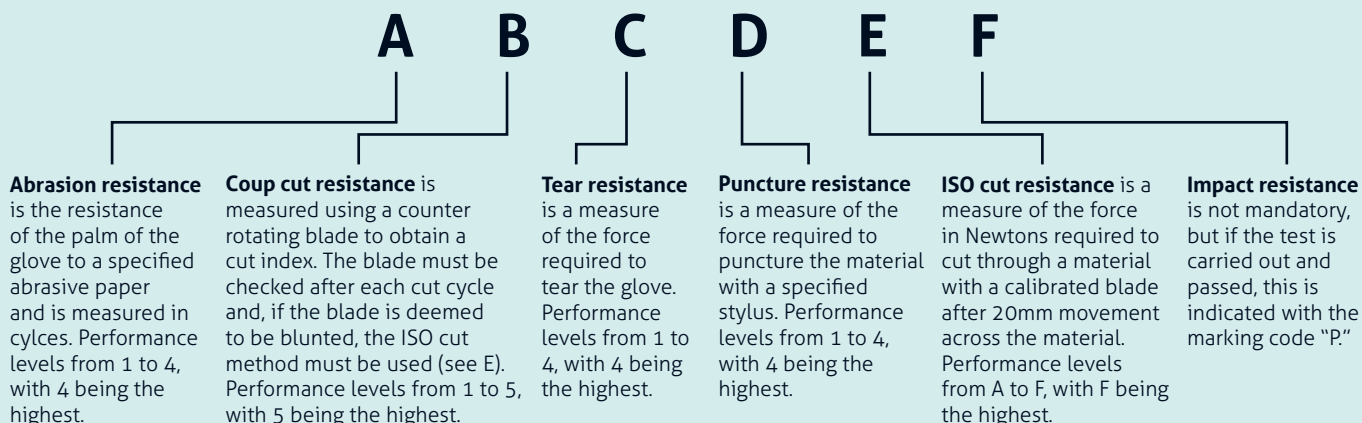

Chemical resistant gloves are also tested against EN374-4 which gives an indication of the degradation of the glove material in contact with the chemicals claimed under EN374-1.

## EN 388:2016+A1:2018

EN 388 is the standard for protective gloves and other hand protective equipment against mechanical risks.

*X indicates the test was not carried out or not applicable. 0 indicates the minimum criteria for the test were not achieved.*

EN 388:2016  
+A1:2018

## EN 407:2021

EN 407 is the standard for protective gloves and other hand protective equipment against thermal risks (heat and/or fire).

EN407:  
2004

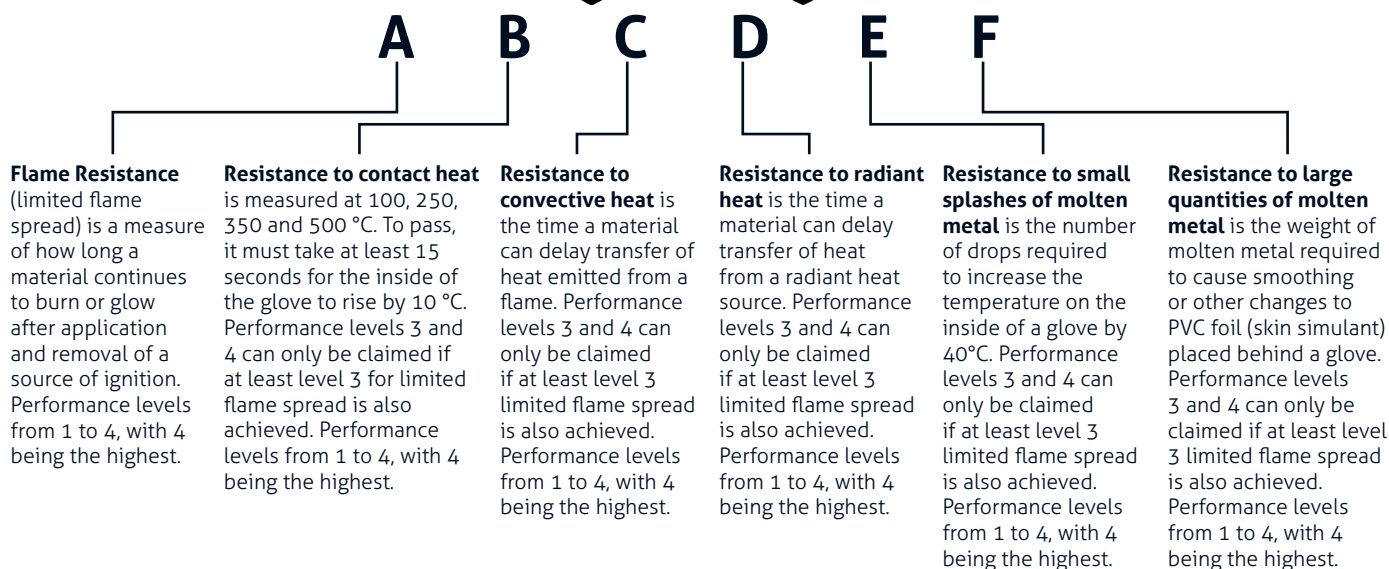

EN407:  
2020

or

*If the product claims a limited flame spread level of performance (at least level 1) Pictogram 1 should be used. If the product does not claim a limited flame spread level of performance Pictogram 2 should be used. The marking of the two Pictograms together on the product is forbidden. Levels of performance should be included under the relevant Pictogram.*

## EN 511:2006

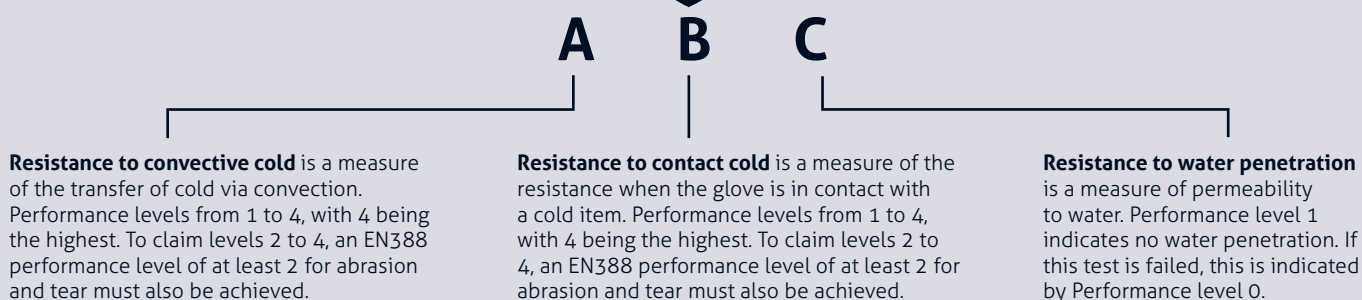

EN 511 is the standard for Protective gloves and other hand protective equipment against cold.

EN511:  
2006

*X indicates the test was not carried out or not applicable. 0 indicates the minimum criteria for the test were not achieved.*

*For extreme cold (-30°C and below), an extreme cold flexibility test must also be carried out.*

# Chemical Performance

The below handy chemical breakthrough 'ready-reckoner' shows popular gauntlet materials and the associated breakthrough times for some common chemicals. For specific chemical breakthrough times, and an application specific product solution contact your local area sales manager, these should be used as a guide only.

## BS EN374-1 Permeation Performance Levels and Corresponding Breakthrough Times in Minutes

# Technology Centre

As part of Polyco Healthline's commitment to new product development and compliance a substantial investment has been made in a state of the art purpose built test laboratory in Bourne. With Polyco Healthline's Technology Centre, the service and expertise offered to our customers is second to none.

## What can we test at our laboratory?

Our Technology Centre is well-equipped with state of the art test equipment to enable us to perform a wide range of chemical and physical tests on a variety of different product types. The newly built suite brimming with cutting-edge test equipment is where we put our products through their paces.

The centre is split into three separate laboratories:

- **Chemical Laboratory:** for tests including permeation and degradation resistance to various chemicals, powder content, pH testing, overall food migration, colour fastness to perspiration, and inorganic content.
- **Physical Laboratory:** for tests including abrasion resistance, blade-cut resistance, tear resistance, puncture resistance, tensile strength, dart impact resistance, force at break and elongation.
- **Wet Laboratory:** for tests including water leak and washing tests.

Listed here is just a sample of the tests that our Technology Centre can undertake:

- ✓ EN 374-2
- ✓ EN 16523-1
- ✓ EN 388
- ✓ EN 21420
- ✓ EN 455

## Why have our own laboratory?

The Technology Centre is accredited for testing to ISO 17025 by UKAS. The schedule of accreditation, which contains a full list of the tests for which the laboratory is accredited, is available on request or directly from the UKAS website.

Many products – PPE, medical, or otherwise – have associated test standards which may be used by accredited testing laboratories such as our Technology Centre to evaluate or benchmark the performance of products. These tests are not only required for product certification but are also invaluable for areas such as new product development and complaint resolution.

Guided tours of the laboratory are available, giving customers the valuable opportunity to see test standards being performed in person and gain an extra understanding of what's involved in each of the tests.

## Here to help

The laboratory operates as a business support unit and carries out internal testing or testing to aid our customers.

## Distribution

Our head office alongside our six distribution centres are situated in Bourne, Lincolnshire, with an additional satellite office located in London.

At a combined capacity of over 37,000 pallet spaces spread across 31,000sqm, our distribution centres enable the capability for growth and a large stock holding.

Our site operates 24 hours with a dedicated container park, we manage container receipts and deliveries at night, with capacity for 10 containers per shift.

This coupled with the combination of our own vehicles and the services of major transport companies ensures we provide a quick and efficient service to meet the demands of our growing customer base.

Strategically positioned for easy access to seaports and major road networks, the warehouses are also conveniently connected for quick and efficient daily stock transfers.

## How do we operate?

We operate all picking using our RF scanners to ensure accurate picking each and every time, which are connected to our ERP system and updated on a live level, offering the most up to date position of stock at all times.

The majority of our warehouse and production operatives are multi skilled, so as to allow seamless transition of responsibilities as and when required, which enables us to provide a quick and efficient turnaround service from order receipt to despatch.

We have terminals in every DC for each operative to be able to access vital company information including a fully integrated Health & Safety platform, HR access, Company Benefits and many more.

Thumb print clocking technology for all staff who operate in the DCs for security and safety of all staff and visitors.

Over 60 CCTV cameras across the DCs monitored internally by our Facilities team using the latest technologies, which include remote viewing capabilities for additional security.

## Accreditation

Our ISO9001 and ISO13485 registrations incorporate our high quality warehouse management system, which allows us to have full traceability throughout the supply process, all the way back to factory raw materials.

The accreditation ensures all aspects of the business processes are monitored for quality.

Efficient management of our operations also involves a range of environmentally friendly measures.

We have recently obtained ISO14001 Environmental Management Systems certification.
