

Product data sheet

Product Code: UTBE500

Product Name: Ultrasonic Measuring Beaker 500ml

Features & Benefits:

- Easy to read graduations and marking area
- Beaker features a 500mL capacity
- Perfect for cleaning small items such as jewellery, small carburettor/machine components,

dental equipment, medical equipment, small electronics and more!

- By separating the fluid in the tank from the fluid in the beakers uses less cleaning solution as it is only required in the beakers, the fluid in the tank is only used as a medium to allow the ultrasonic waves to pass into the beaker, water can be used
- By separating parts to its individual beaker allows you to keep batches or groups of components together to prevent parts becoming mixed
- Ideal for veterinary practices, surgery's, dentists, doctors, body piercing studio's, laboratories, educational purposes, scientific use and more!
- Can be used with our 6 litre beaker rack and standard ultrasonic cleaning baskets (Not compatible with the 3 litre beaker rack)
- Material: Borosilicate Glass
- Min Graduation: 100mL
- Max Graduation: 500mL
- Outside Diameter: 87mm
- Inside Diameter: 82mm
- Overall height: 120mm
