⚠ Precautions

Be sure to read before handling. Refer to p.0-33 to 0-36 for Safety Instructions and common precautions.

⚠ Caution

Light/Surge Voltage Suppressor/Electrical Entry Single Unit

Body Ported

Series VFS1000, 2000, 3000

Light/Surge Voltage Suppressor

AC and 100V DC

24V DC or less

Wiring

In the case of DIN connector and Terminal block (with indicator light/surge voltage suppressor), the interior wiring is shown below.

Applicable terminal: 1.25-3, 1.25-3S, 1.25Y-3N, 1.25Y-3S. But, in the case of DIN connector board, it is not a terminal structure.

* No polarity

To Change Direction of DIN Connector

To change direction of DIN connector retaining screw, pull off outer cover, rotate connector board through 180°. Replace cover and tighten screw.

Changing Direction of Electrical Entry and Manual Override (Series VFS1000 only)

Loosen the set screw (M3-2pcs.), take out pilot operator, turn solenoid valve 180° degrees to change the direction of lead wire and manual override. (Possible on Series VFS1000 only.)

Base Mounted

Series VFS2000

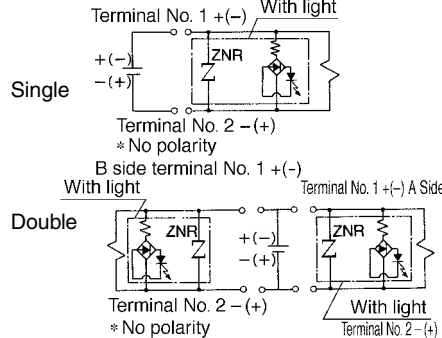

Light/Surge Voltage Suppressor

In the case with surge voltage suppressor, surge voltage absorption device ZNR is attached to AC power.

AC and 100V DC

24V DC or less

With indicator light and surge voltage suppressor

Plug-in

Non Plug-in

How to Exchange

Solenoid valve

- Loosen 3 set screws (hexagonal socket head cap screw M3 X 31) and pull solenoid valve out vertically, otherwise it may cause damage to the solenoid valve. Never remove a valve at an angle.
- When mounting solenoid valve onto the base, plug pin ass'y (base-side) into receptacle ass'y (body-side) vertically.

Pilot valve

- When changing rated voltage and electrical entry etc., pilot valve assembly can be exchanged since this is a plug-in style.

Wiring

Valve/Sub-plate porting plug-in : T Conduit with terminal (with terminal block)

- Remove junction cover ① of subplate, and you can see plug-in terminal block board ② (Part No. NVF2000-27A-1) attached to the inside of the subplate.

- The following markings are on the terminal block

Designation	Solenoid A-side	Solenoid B-side
Terminal block board marking	A	B

- No polarity
- When ground wiring and COM wiring are required, please specify separately.
- Applicable terminal: 1.25-3, 1.25-3S, 1.25Y-3N, 1.25Y-3S

Valve/Sub-plate porting non plug-in: D

- G type:** Use lead wire from solenoid to connect with power side.
- E, T, D-type:** In the case of a DIN connector and terminal block (with light/surge voltage suppressor), the interior wiring is shown below. Please connect with corresponding power side.

Applicable terminal: 1.25-3, 1.25-3S, 1.25Y-3N, 1.25Y-3S. But in the case of with DIN connector board, is not a terminal structure.

* No polarity

Changing Direction of DIN Connector/Cable Entry

- Unscrew retaining screw, pull off outer cover, rotate connector board through 180°. Replace cover and tighten screw.
- Applicable cable: O. D. $\phi 6$ to $\phi 8$.

⚠ Caution

Light/Surge Voltage Suppressor/Electrical Entry

Single Unit

Base Mounted

Series VFS3000, 4000, 5000, 6000

Light/Surge Voltage Suppressor

In the case of voltage suppressor, surge voltage absorption element is attached to terminal block on body area.

How to Exchange

Solenoid valve

- Loosen set screw and take solenoid valve out vertically, otherwise it may cause damage to the solenoid valve. Never remove a valve at an angle.
- When mounting solenoid valve onto the base, plug pin ass'y (base-side) into receptacle ass'y (body-side) vertically.

Pilot valve

- When changing the rated voltage, electrical entry, etc., pilot valve ass'y can be exchanged easily since this is plug-in style. Then, when changing the rated voltage with light/surge voltage suppressor, change of light/surge voltage suppressor substrate is also needed. So, order together with pilot valve assembly.

Light and surge voltage suppressor substrate part No.

VFS3000	VFS3000-10A-□
VFS4000	VF4000-9A-□
VFS5000	AXT627-7A-□
VFS6000	VF4000-9A-□

-□: Voltage

Wiring

DIN connector

- Male pin terminal of DIN connector block board of solenoid valve and wires as shown below. Please connect each valve to corresponding terminal block on connector.

DIN connector (Wiring)

No polarity applies.

AC and 100V DC or more.

24V DC or less

- Cable
 - Applicable cable O. D.: $\phi 6.8$ to $\phi 11.5$
- Applicable terminal
 - Applicable terminal on block board: 3 (kinds)
 - 1.25Y-3L, 1.25-3.5S, 1.25-4M
- Connector/Clamping torque
 - Set screw 6kgf-cm
 - Terminal screw 9kgf-cm
- Incorrect common (DIN connector No.3) causes damage on power side circuit.

Plug-in (with terminal)

- If removing the junction cover ① on the sub-plate, there appears the plug-in style terminal block ② attached to the inside of sub-plate.

- The following marking are on the terminal block. Connect with corresponding power side.

Terminal block Marking	Solenoid A side		Solenoid B side	
	A	B	B	A
	+	-	+	-

Applicable terminal

- VFS3000: 1.25-3, 1.25-3S, 1.25Y-3N, 1.25Y-3S
- VFS4000: 1.25-3.5M, 1.25Y-3L, 1.25Y-3M
- VFS5000: 1.25-4, 1.25-4M
- VFS6000: 1.25-3.5M, 1.25Y-3L, 1.25-3M

- No polarity applies.

Series VFS

⚠ Caution

Maintenance

① A lot of carbon powder and oil waste from air sources (mostly from compressor) entering into the valve sometimes can lead to increased sliding resistance at the switching spool and cause valve malfunction. In the worst case, spool can adhere to the valve. Therefore supply air should be kept clean.

Also please note that if pressurized states on SUP is left for a long time with inferior air quality, carbon powder and oil waste in the compressed air accumulate in the clearance of spool and the sleeve, and can cause the spool to adhere to the valve. The remedy for this case is to check the compressor lubrication oil and find out the least oxidizing compressor lubrication oil.

Meanwhile, a high filtration Mist Separator (Series AM) installed on the back of regular filter (Series AF) can prevent foreign particles from entering into the valve.

② In case foreign matter from the air source adheres to spool and sleeve, disassemble the adapter plate section and end plate section (return spring insert section).

Then, take out spool and sleeve from valve and clean them with trichlene or freon solutions, when cleaning, prevent O rings from touching cleaning solutions.

③ When disassembling and re-assembling, please ensure that all components are in proper positions. Prevent gaskets from slipping, and clamp bolts down equally. Use torques listed below when mounting pilot valves and solenoid valve bodies.

Pilot valve assembly

Set screw	Correct clamping torque (Nm)
M3	4.5 to 6

Solenoid valve body

Set screw	Correct clamping torque (Nm)
M3	8 to 12
M4	14 to 25
M5	28 to 50

How to Calculate Flow Rate

See p.0-36 for calculating flow rate.

Interface Regulator Specifications

Model ⁽¹⁾	ARBF2000	ARBF3050	ARBF4050	ARBF5050
Applicable solenoid valve series	VFS2000	VFS3000	VFS4000	VFS5000
Regulation	P	A B P	A B P	A B P
Proof pressure	1.5MPa			
Max. operating pressure	1.0MPa			
Set pressure range	0.1 to 0.83MPa ⁽²⁾			
Ambient and fluid temperature	5 to 60°C			
Gauge connecting port	M5	1/8		
Weight (kg)	0.16	0.46	0.72	0.83
Effective area of the supply side (mm ²) ⁽³⁾	P→A	5.5	21 18.5 11	35 31 26 44 38 32
S at P ₁ =0.7MPa, P ₂ =0.5MPa	P→B	5.1	18.5 22 12	31 31 24 38 40 31
Effective area of the exhaust side (mm ²) ⁽³⁾	A→EA	12	40	55 90
S at P ₂ =0.5MPa	B→EB	11	36	45 77

Note 1) Set within the operating pressure range of solenoid valve.

Note 2) Synthesized effective area with solenoid valve 2 position single style.

Note 3) •To supply air to Interface Regulator P port is the only supply port except for when used with a reverse pressure valve.

•To combine a pressure center valve and the A and B port pressure reduction of a spacer style regulator, use the ARBF3000, 4000, or 5000 model.

•To combine a reverse pressure valve and a spacer style regulator, use the ARBF3000, 4000, or 5000 model. The P port pressure reduction cannot be used.

•To combine a double check valve and interface regulator, use the manifold or the sub-plate as a reference, and stack them in the order of the double check spacer, the interface regulator and the valve.

•A closed centre valve cannot be used combined with an interface regulator for applications of cylinder intermediate stops as there is leakage from the relief port of the interface regulator.

Flow Characteristics (P→A)

(Conditions: Supply pressure 0.7MPa.
When 2 position solenoid valve is mounted.)

⚠ Caution

Wiring Manifold/Plug-in

01 Type Insert Plug with Lead Wire

Series VFS2000 (Only VFS2000) (Insert plug with lead wire is not available for VF3000, 4000, and 5000.)

How To Remove Junction Cover (01 Type)

- Turn the knob ② of junction cover ① on the manifold block side by hand or slotted screwdriver to the C/O direction (counter-clockwise) 90°. While holding the knob and upper part of junction cover, pull outward to remove junction cover.

When reassembling, do the opposite.

How To Use Insert Plug

- When removing insert plug ① from manifold base, push the lever area ② of insert plug downward with thumb and pull it together with the lead wire ③ outward.

- When placing the insert plug ① into the manifold base, push the lever area of insert plug with thumb and plug it in its place in the receptacle housing ④ horizontally. After plugging, pull lead wire out a little bit to ensure that insert plug is secure.

Wiring

The insert plug ① is attached to the manifold block and lead wire is plugged in with valve side as shown in the following list.

(Single solenoid: AXT624-52A-S-1)
(Double solenoid: AXT624-52A-D-1)

Please connect with corresponding power side.

Power	Valve	Solenoid A	Solenoid B
AC	Single solenoid	Red, Black	—
DC	Double solenoid	Red, Black	Brown, White

* No polarity applies.

* Lead wire length is 1m.

01T Type with Terminal Block

Series VFS2000

- Remove junction cover of manifold, exposing terminal block attached to the manifold block. Lead wires from solenoid valve are connected with the terminals on upper side of terminal block. (On the terminal block, lead wire is connected with both A and B sides of solenoid valve in accordance with the corresponding markings A and B on the block.)

Connect each lead wire of power side corresponding to respective solenoid valve on the lower terminal block.

Model	Marking	A	COM	B
VFS2100		A side	COM	
VFS2200		A side	COM	B side
VFS2 $\frac{3}{4}$ 00		A side	COM	B side

- Applicable terminal: 1.25-3, 1.25-3S, 1.25Y-3N, 1.25Y-3S

- Plugging COM bridge (Part No. AXT625-73: 5 stations) in between each + COM on the block board will make the specifications of all the stations + COM and enables you to understand the wiring process.

- No polarity.

Series VFS3000

Model	Marking	A	COM	B
VFS3100		A side	COM	
VFS3200		A side	COM	B side
VFS3 $\frac{3}{4}$ 00		A side	COM	B side

- Applicable terminal: 1.25-3.5M, 1.25Y-3L, 1.25-3M

- No polarity.

- VFS 3000 has the marking + COM on the block board, but - COM specification is also available.

Series VFS4000, 5000

Model	Marking	A+	A-	B+	B-
VFS $\frac{4}{5}$ 100		A side	A side		
VFS $\frac{4}{5}$ 200		A side	A side	B side	B side
VFS4 $\frac{3}{4}$ 00		A side	A side	B side	B side
VFS5 $\frac{3}{4}$ 00		A side	A side	B side	B side

- Applicable terminal: 1.25-3.5M, 1.25Y-3L, 1.25Y-3M

- No polarity

Series VFS

Series VFS1000 Manifold/Bar Style

Compact and lightweight

Compact due to manifolding on a single base for mounting in small spaces.

Protection of the environment from pilot exhaust

Use of the VV5FS1-30 manifold can exhaust intensively the pilot exhaust gas to the base side, and can prevent environmental aggravation due to noise and oil mist.

Series VFS3000

Manifold/stacking style

Keeps environmental air clean from pilot exhaust

Use of the VV5FS3-31 manifold can exhaust intensively the pilot exhaust gas to the base side, and can prevent environmental aggravation due to noise and oil mist.

Note 1) According to JIS B8375 (Once per 30 days) for the minimum operating frequency.

Note 2) According to JIS B8375-1981. (The valve at supply pressure 0.5MPa.) Note 3) In case of VFS2□00-□FZ-01.

Note 4) Factors of "Note 1" and "Note 2" are ones achieved in controlled clean air.

Standard Specifications

Valve	Fluid		Air and inert gas
	Max. operating pressure		1.0MPa
	Min. operating pressure	2 position	0.1MPa
		3 position	0.15MPa
	Proof pressure		1.5MPa
	Ambient and fluid temperature		-10 to +60°C (1)
	Lubrication		Not required (2)
	Pilot valve manual override		Non-locking push (Flush)
	Shock/vibration resistance		150/50m/s ² (3)
	Protection structure		D type: Splash proof (4)
Solenoid	Rated voltage		100V, 200V AC (50/60Hz), 24V DC
	Allowable voltage		-15 to +10% rated voltage
	Coil insulation		Class B or equivalent (130°C) (5)
	Apparent power (Power consumption) AC	Inrush	5.6VA/50Hz, 5.0VA/60Hz
		Holding	3.4VA (2.1W)/50Hz, 2.3VA (1.5W)/60Hz
	Power consumption DC		1.8W
	Electrical entry		Plug-in Non Plug-in DIN connector

Note 1) Use dry air if low temperatures.

Note 2) Use turbine oil class 1 (ISO VG32), if lubricated.

Note 3) Shock resistance: No malfunction from test using drop impact tester to axis and right angle directions of main valve and armature, each one time when energized and de-energized. (Value in the initial stage.)

Vibration resistance: No malfunction from test with 8.3 to 2000Hz, 1 sweep, to axis and right angle directions of main valve and armature, each one when energized and de-energized. (Value in the initial stage.)

Note 4) According to JIS C0920.

Note 5) According to JIS C4003.

Note) The piping with a compact sub-plate of pipe connecting bore 1/8 and 1/4 is equivalent to the system A, B, C.

Double Check Spacer Specifications

Holding cylinder mid-position for a long periods.

The concurrent use of double check spacer with built-in double check valve can stop cylinder or mid-position and hold it without being affected by air leakage spool seals.

Specifications

Double check spacer	Plug-in		Non plug-in	
	VVFS2000-22A-1		VVFS2000-22A-2	
Applicable solenoid valve	VFS2400-□F		VFS2410-□ ^G _E _T _D	
Leakage* (cm ³ /min) (ANR)	Solenoid one side energized	P	EA	210 or less
			EB	210 or less
	Solenoid both sides de-energized	P	EA	210 or less
			EB	210 or less
A	EA	0		
B	EB	0		

*Supply pressure 0.5MPa

⚠️ Precaution

- In the case of 3 position double check valve (VFS26□0), check the leakage from piping and fittings in between valve and cylinder by means of synthetic detergent solutions, and ensure that there is no such leakage found there. Also check the leakage from cylinder seal and piston seal. If there is any leakage, sometimes the cylinder, when valve is de-energized, can move without stopping at mid-position.
- Be aware that if the exhaust side is restricted excessively, the intermediate stopping accuracy will decrease and will lead to improper intermediate stops.

Check Valve Operation

- The combination of VFS21⁰, VFS22⁰, and a double check spacer can be used as prevention of falling at the stroke end but cannot hold the intermediate position of the cylinder.

How to Order Manifold

Please indicate manifold base style, corresponding valve, and option parts.

<<Example>>

- Plug-in with terminal block - 6 stations
(Manifold base)
VV5FS2-01T1-061-02 1
(2 position single) VFS2100-5FZ 3
(2 position double) VFS2200-5FZ 2
(Blank plate) VVFS2000-10A 1
- Non plug-in - 6 stations
(Manifold base mounted style)
VV5FS2-10-061-01 1
(2 position single) VFS2100-5 5
(3 position exhaust center) VFS2410-5D 1
(Individual EXH spacer) VVFS2000-R-01-2 1

Manifold/Option Parts Assembly

Individual SUP spacer

An individual SUP spacer set on manifold block can form SUP port for every valve.

Body	Plug-in	Non plug-in
Part No. 1/8	VVFS2000-P-01-1	VVFS2000-P-01-2
1/4	VVFS2000-P-02-1	VVFS2000-P-02-2

Individual EXH spacer

An individual EXH spacer set on manifold block can form EXH port for every valve.

Body	Plug-in	Non plug-in
Part No. 1/8	VVFS2000-R-01-1	VVFS2000-R-01-2
1/4	VVFS2000-R-02-1	VVFS2000-R-02-2

SUP block disk

When supplying manifold with more than two different pressures, high and low, insert a block plate in between stations subjected to different pressures.

Body	Plug-in	Non plug-in
Part No.	AXT625-12A	

EXH block disk

When valve exhaust affects the other stations on the circuit or when the reverse pressure valve is used to standard manifold valve, insert EXH block plate in between stations to separate valve exhaust.

Body	Plug-in	Non plug-in
Part No.	AXT625-12A	

Interface speed control

Needle valve set on the manifold block can control cylinder speed by throttling exhaust.

Body	Plug-in	Non plug-in
Part No.	VVFS2000-20A-1	VVFS2000-20A-2

Interface regulator

Interface regulator set on manifold block can regulate the pressure to each valve.

Body	Plug-in	Non plug-in
P port regulation	ARBF2000-00-P-1	ARBF2000-00-P-2

Air shutoff valve spacer

When stopping supply air and releasing residual pressure after completion of work, actuators may move from original position. Air shutoff valve spacer makes it possible to stop actuators in original position for extended periods.

Body	Plug-in	Non plug-in
Part No.	VVFS2000-21A-1	VVFS2000-21A-2

*Incompatible to subplate standard.

Air release valve spacer

The concurrent use of air release valve spacer with VFS21□0 can release air.

Body	Plug-in	Non plug-in
Part No.	VVFS2000-24A-1 _L	VVFS2000-24A-2 _R

Note) L: U side mount R: D side mount

Double check spacer

The concurrent use of double check spacer with built-in double check valve can stop the cylinder at mid-position and hold for a long time without being affected by the air leakage across spool seals.

Body	Plug-in	Non plug-in
Part No.	VVFS2000-22A-1	VVFS2000-22A-2

Blank plate

When disassembling valve for maintenance purposes or when spare manifold stations are required, install a blank plate on the manifold block.

Body	Plug-in	Non plug-in
Part No.	VVFS2000-10A	

Accessory

One pair of gasket and mounting thread is attached to every option parts assembly.

Manifold Options

With control unit

Plug-in/Non plug-in

- Filter, regulation valve, pressure switch and air release valve are all combined to form one unit.
- Piping work eliminated.

For more information, please refer to p.1.17-47.

With serial interface unit

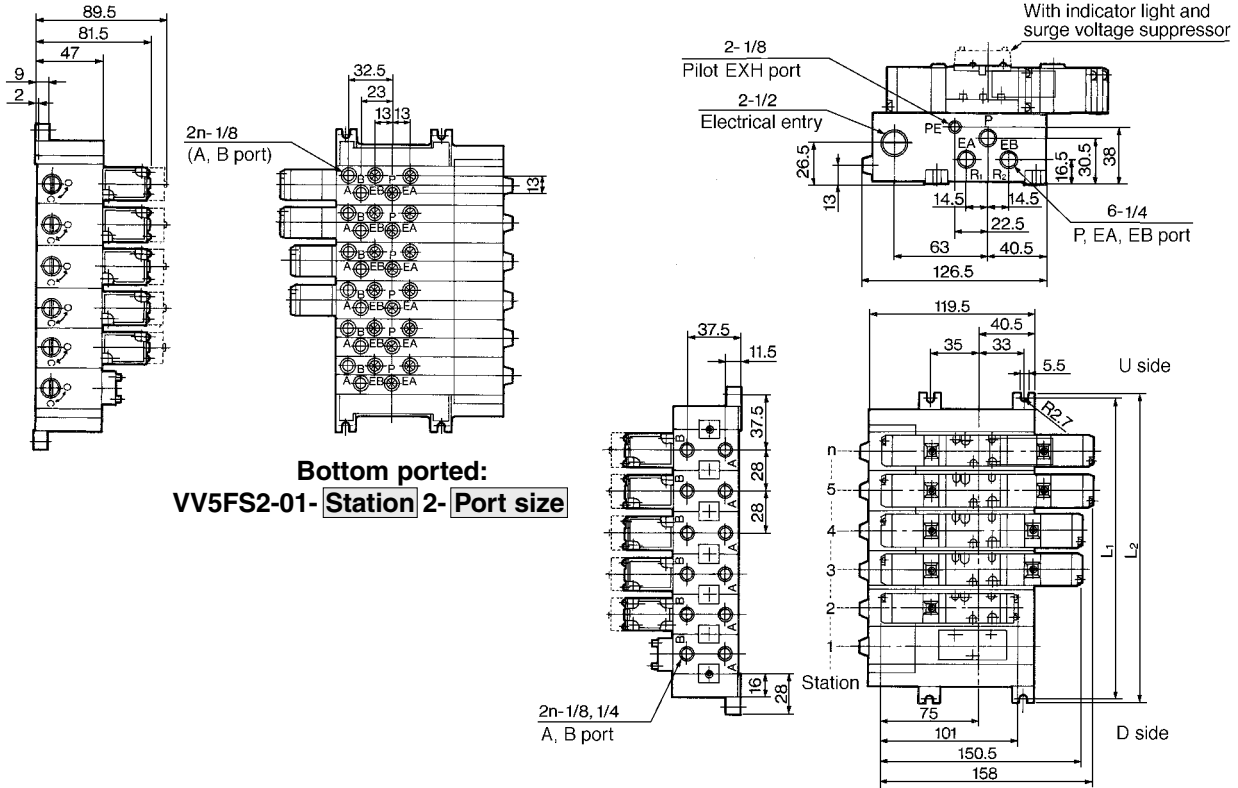

Plug-in

- Solenoid valve wiring process reduced considerably.
- Disperse installation possible.
Manifold solenoid valve: 8 stations max, 32 positions (512 solenoids).
- Maintenance and inspection are easy.

Manifold Plug-in/Non Plug-in

Plug-in (Insert plug with lead wire): VV5FS2-01- Station 1- Port size

Manifold with Control Unit

Control units (Filter, Regulator, Pressure switch, Air release valve) are all standardized to the one unit, and can be mounted on the manifold base without any attachments.

Piping processes are eliminated

Plug-in

Non plug-in

Precautions

When using an air filter with auto drain or manual drain, mount the filter vertically.

Double Check Spacer/Specification

Holding cylinder mid-position for long periods.

The concurrent use of double check spacer with built-in double check valve can stop cylinder or mid-position and hold it without being affected by air leakage spool seals.

Specifications

Double check spacer	Plug-in	Non plug-in
	VVFS3000-22A-1	VVFS3000-22A-2
Applicable solenoid valve	VFS3400-□F	VFS3410-□D VFS3410-□E
Leakage* (cm ³ /min)	Solenoid one side energized	P EA 230 or less
		P EB 230 or less
	Solenoid both side de-energized	A EA 0
		B EB 0

*Supply pressure: 0.5MPa

⚠ Precaution

- In the case of 3 position double check valve (VFS36□0), check the leakage from piping and fittings in between valve and cylinder by means of synthetic detergent solutions, and ensure that there is no such leakage found there. Also check the leakage from cylinder seal and piston seal.
If there is any leakage, sometimes the cylinder, when valve is de-energized, can move without stopping at mid-position.
- Be aware that if the exhaust side is restricted excessively, the intermediate stopping accuracy will decrease and will lead to improper intermediate stops.

Check Valve Operation

- The combination of VFS31 0/0, VFS32 0/0 and a double check spacer can be used as prevention of falling at the stroke end but cannot hold the intermediate position of the cylinder.

Manifold/Option Parts Assembly

Individual SUP spacer

An individual SUP spacer set on manifold block can form SUP port for every valve.

Body	Plug-in	Non plug-in
Part No.	VVFS3000-P-03-1	VVFS3000-P-03-2

Individual EXH spacer

An individual EXH spacer set on manifold block can form EXH port for every valve.

Body	Plug-in	Non plug-in
Part No.	VVFS3000-R-03-1	VVFS3000-R-03-2

SUP block disk *

When supplying manifold with more than two different pressures, high and low, insert a block plate in between stations subjected to different pressures.

Body	Plug-in	Non plug-in
Part No.	AXT636-1A	

EXH block disk *

When valve exhaust affects the other stations on the circuit or when the reverse pressure valve is used to standard manifold valve, insert EXH block plate between stations to separate valve exhaust.

Body	Plug-in	Non plug-in
Part No.	AXT636-1A	

Interface speed control

Needle valve set on the manifold block can control cylinder speed by throttling exhaust.

Body	Plug-in	Non plug-in
Part No.	VVFS3000-20A-1	VVFS3000-20A-2

Double check spacer

The concurrent use of double check spacer with built-in double check valve can stop the cylinder at mid-position and hold for a long time without being affected by the air leakage across spool seals.

Body	Plug-in	Non plug-in
Part No.	VVFS3000-22A-1	VVFS3000-22A-2

Interface regulator

Interface regulator set on manifold block can regulate the pressure to each valve. Refer to p.1.17-6 for flow characteristic.

Body	Plug-in	Non plug-in
P regulation	ARBF3050-00-P-1	ARBF3050-00-P-2
A regulation	ARBF3050-00-A-1	ARBF3050-00-A-2
B regulation	ARBF3050-00-B-1	ARBF3050-00-B-2

Blank plate

When disassembling valve for maintenance purposes or when spare manifold stations are required, install a blank plate on the manifold block.

Body	Plug-in	Non plug-in
Part No.	VVFS3000-10A	

How to Order Manifold

Please indicate manifold base style, corresponding valve, and option parts.

<<Example>>

•Plug-in with terminal block — 6 stations
 (Manifold base) VV5FS3-01T-061-02 1
 (2 position single) VFS3100-5FZ 3
 (2 position double) VFS3200-5FZ 2
 (Blank plate) VVFS3000-R-03-2 1

<<Example>>

•Non Plug-in with terminal block — 6 stations
 (Manifold base) VV5FS3-10-061-03 1
 (2 position single) VFS3110-5D 5
 (3 position exhaust centre) VFS3410-5D 1
 (Individual EXH spacer) VVFS300-R-03-2 1

Manifold Options

With exhaust cleaner

Plug-in/Non plug-in

- Valve exhaust noise dampening: 35dB or more.
- Oil mist collection: Rate of collection 99.9% or more.
- Piping hours reduced.

For more information, please refer to p.1.17-63.

With control unit

Plug-in/Non plug-in

- Filter, regulation valve, pressure switch and air release valve are all combined to form one unit.

For more information, please refer to p.1.17-65.

With serial interface unit

Plug-in

- Solenoid valve wiring process reduced considerably.
- Disperse installation possible. Manifold solenoid valve: 8 stations max, 32 positions (512 solenoids).
- Maintenance and inspection are easy.

Manifold Plug-in/Non Plug-in

Double Check Spacer/Specification

Holding cylinder mid-position for a long periods

The concurrent use of double check spacer with built-in double check valve can stop cylinder or mid-position and hold it without being affected by air leakage spool seals.

Specifications

Double check spacer	Plug-in		Non plug-in	
	VVFS4000-22A-1		VVFS4000-22A-2	
Applicable solenoid valve	VFS4400-□F		VFS4410-□D VFS4410-□E	
Leakage* (cm ³ / min)	Solenoid one side energized	P	EA	230 or less
			EB	
	Solenoid both sides de-energized	P	EA	230 or less
			EB	
	A	EA	0	
	B	EB		

Supply pressure: 0.5MPa

⚠ Precautions

- In the case of 3 position double check valve (VFS46□0), check the leakage from piping and fittings in between valve and cylinder by means of synthetic detergent solutions, and ensure that there is no such leakage found there. Also check the leakage from cylinder seal and piston seal. If there is any leakage, sometimes the cylinder, when valve is de-energized, can move without stopping at mid-position.
- Be aware that if the exhaust side is restricted excessively, the intermediate stopping accuracy will decrease and will lead to improper intermediate stops.

Check Valve Operation

- The combination of VFS4□0, VFS42□0 and a double check spacer can be used as prevention of falling at the stroke end but cannot hold the intermediate position of the cylinder.

Manifold/Option Parts Assembly

Individual SUP spacer

An individual SUP spacer set on manifold block can form SUP port for every valve.

Body	Plug-in	Non plug-in
Part No.	VVFS4000-P-03-1	VVFS4000-P-03-2

Individual EXH spacer

An individual EXH spacer set on manifold block can form EXH port for every valve.

Body	Plug-in	Non plug-in
Part No.	VVFS4000-R-04-1	VVFS4000-R-04-2

* SUP block disk

When supplying manifold with more than two different pressures, high and low, insert a block plate in between stations subjected to different pressures.

Body	Plug-in	Non plug-in
Part No.	AXT634-10A	

* EXH block disk

When valve exhaust affects the other stations on the circuit or when the reverse pressure valve is used to standard manifold valve, insert EXH block plate in between stations to separate valve exhaust.

Body	Plug-in	Non plug-in
Part No.	AXT634-11A	

EXH block disk

SUP block disk

Interface speed control

Needle valve set on the manifold block can control cylinder speed by throttling exhaust.

Body	Plug-in	Non plug-in
Part No.	VVFS4000-20A-1	VVFS4000-20A-2

Double check spacer

The concurrent use of double check spacer with built-in double check valve can stop the cylinder at mid-position and hold for a long time without being affected by the air leakage across spool seals.

Body	Plug-in	Non plug-in
Part No.	VVFS4000-22A-1	VVFS4000-22A-2

Interface regulator

Interface regulator set on manifold block can regulate the pressure to each valve. (Refer to p.1.17-6 for flow characteristic).

Body	Plug-in	Non plug-in
P regulation	ARBF4050-00-P-1	ARBF4050-00-P-2
A regulation	ARBF4050-00-A-1	ARBF4050-00-A-2
B regulation	ARBF4050-00-B-1	ARBF4050-00-B-2

Blank plate

When disassembling valve for maintenance purposes or when spare manifold stations are required, install a blank plate on the manifold block.

Body	Plug-in	Non plug-in
Part No.	VVFS4000-10A	

How to Order Manifold

Please indicate manifold base mounting style, corresponding valve, and option parts.

- Plug-in with terminal block - 6 stations
(Manifold base) VV5FS4-01T-061-03-Q 1
(2 position single) VFS4100-5FZ -Q 3
(2 position double) VFS4200-5FZ -Q 2
(Blanking plate) VFS4000-10A 1

- Non plug-in - 6 stations
(Manifold base) VV5FS4-10-061-04-Q 1
(2 position single) VFS4110-5D-Q 5
(3 position exhaust center) VFS4110-5D-Q · 1
(Individual EXH spacer) VVFS4000-R-04-2 1

Manifold Options

With exhaust cleaner

Plug-in/Non plug-in

- Valve exhaust noise dampening: 35dB or more.
- Oil mist collection: Rate of collection 99.9% or more.
- Piping hours reduced.

For more information, please refer to p.1.17-79.

With control unit

Plug-in/Non plug-in

- Filter, regulation valve, pressure switch and air release valve are all combined to form one unit.
- Piping work eliminated.

For more information, please refer to p.1.17-81.

With serial interface unit plug-in

- Solenoid valve wiring process reduced considerably.
- Disperse installation possible.
- Manifold solenoid valve: 8 stations max, 32 positions (512 solenoids).
- Maintenance and inspection are easy.

Plug-in/Non Plug-in

Plug-in (With terminal block): VV5FS4-01T- Station 1- Port size

Bottom ported:
VV5FS4-01T- Station 2- Port size

General formula of weight/Manifold $M=0.565n+0.923$ (kg) n:

Non plug-in: VV5FS4-10- Station 1- Port size

Bottom ported:
VV5FS4-10- Station 2- Port size

Manifold with Exhaust Cleaner

- Serves to protect work environment.
- Valve exhaust noise dampening: 35dB or more.
- Collection rate of drainage and oil mist: 99.9 % or more.
- Piping process reduced.

Plug-in

Exhaust cleaner (Optional)

Non plug-in

Exhaust cleaner (Optional)

Manifold Specifications

Manifold style	Plug-in: VV5FS4-01□	Non plug-in: VV5FS4-10
Wiring	With terminal block With multi-connector With D-sub connector	DIN connector
Applicable valve	VFS4□00-□F	VFS4□10-□D
Porting	Common SUP, Common EXH	
	A, B port	Side: 3/8, 1/2, Bottom: 3/8 (option)
	P, EA, EB port	P: 1/2, EXH: 1 / 1 1/2
No. of stations	2 to 10 ⁽¹⁾	
Applicable exhaust cleaner	AMC610-10 (Connecting port size 1), AMC810-14 (Connecting port size 1 1/2) ⁽²⁾	

Note 1) With multi-connector, or with D-sub connector: 8 stations max.

Note 2) Stations of 5 or more and high frequency of operation should be used with AMC810-14. Exhaust cleaner AMC610-10 and AMC810-14 are not attached.

Symbol	Solenoid valve	Speed controller	Silencer	Piping
B	VFS5000-06 {3/4} (S=102.6mm ²)	AS500-06 {3/4} (S=120mm ²)	AN500-06 {3/4} (S=160mm ²)	3/4 B (Fittings 4 pcs.)

Double Check Spacer/Specification

Holding cylinder mid-position for a long periods

The concurrent use of double check spacer with built-in double check valve can stop cylinder or mid-position and hold it without being affected by air leakage spool seals.

Specifications

Double check spacer	Plug-in	Non plug-in
	VVFS5000-22A-1	VVFS5000-22A-2
Applicable solenoid valve	VFS5400-□F	VFS5410-□D
Leakage (cm ³ /min)*	Solenoid one side energized	P EA 320 or less
		P EB 320 or less
	Solenoid both sides de-energized	A EA 0
		B EB 0

*Supply pressure: 0.5MPa

⚠ Precautions

- In the case of 3 position double check valve (VFS56□0), check the leakage from piping and fittings in between valve and cylinder by means of synthetic detergent solutions, and ensure that there is no such leakage found there. Also check the leakage from cylinder seal and piston seal. If there is any leakage, sometimes the cylinder, when valve is de-energized, can move without stopping at mid-position.
- Be aware that if the exhaust side is restricted excessively, the intermediate stopping accuracy will decrease and will lead to improper intermediate stops.

Check Valve Operation

- The combination of VFS51□0, VFS52□0 and a double check spacer can be used as prevention of falling at the stroke end but cannot hold the intermediate position of the cylinder.

Series VFS5000 Manifold

Plug-in: With Terminal Block

•Since lead wires of solenoid valve are connected with the terminals on upper surface of terminal block, corresponding lead wires from power source can be wired at the bottom of terminal block.

Manifold/Option Parts Assembly

Individual SUP spacer

An individual SUP spacer set on manifold block can form SUP port for every valve.

Body	Plug-in	Non plug-in
Part No.	VVFS5000-P-04-1	VVFS5000-P-04-2

Individual EXH spacer

An individual EXH spacer set on manifold block can form EXH port for every valve.

Body	Plug-in	Non plug-in
Part No.	VVFS5000-R-04-1	VVFS5000-R-04-2

SUP block disk

When supplying manifold with more than two different pressures, high and low, insert a block plate in between stations subjected to different pressures.

Body	Plug-in	Non plug-in
Part No.	AXT628-12A	

EXH block disk

When valve exhaust affects the other stations on the circuit or when the reverse pressure valve is used to standard manifold valve, insert EXH block plate in between stations to separate valve exhaust.

Body	Plug-in	Non plug-in
Part No.	AXT512-14-1A	

EXH block disk

SUP block disk

Interface speed control

Needle valve set on the manifold block can control cylinder speed by throttling exhaust.

Body	Plug-in	Non plug-in
Part No.	VVFS5000-20A-1	VVFS5000-20A-2

Double check spacer

The concurrent use of double check spacer with built-in double check valve can stop the cylinder at mid-position and hold for a long time without being affected by the air leakage across spool seals.

Body	Plug-in	Non plug-in
Part No.	VVFS5000-22A-1	VVFS5000-22A-2

Interface regulator

 Interface regulator set on manifold block can regulate the pressure to each valve. Refer to p.1.17-6 for flow characteristic.

Body	Plug-in	Non plug-in
P regulation	ARBF5050-00-P-1	ARBF5050-00-P-2
A regulation	ARBF5050-00-A-1	ARBF5050-00-A-2
B regulation	ARBF5050-00-B-1	ARBF5050-00-B-2

Blank plate

When disassembling valve for maintenance purposes or when spare manifold stations are required, install a blank plate on the manifold block.

Body	Plug-in	Non plug-in
Part No.	VVFS5000-10A	

How to Order Manifold

Please indicate manifold base mounting style, corresponding valve, and option parts.

<<Example>>

•Plug-in with terminal block –6 stations
(Manifold base) VV5FS5-01T-061-04-Q 1
(2 position single) VFS5100-5FZ-Q 3
(2 position double) VFS5200-5FZ-Q 2
(Blanking plate) VVFS5000-10A 1

•Non plug-in - 6 stations
(Manifold base) VV5FS5-10-061-04-Q 1
(2 position single) VFS5110-5D-Q 5
(3 position exhaust centre) VVFS5410-5D-Q1
(Individual EXH spacer) AXT628-9A-2 1

Manifold Options

With exhaust cleaner

Plug-in/Non plug-in

- Valve exhaust noise dampening: 35dB or more.
- Oil mist collection :
Rate of collection 99.9% or more.
- Piping process reduced.

For more information, please refer to p.1.17-

With serial interface unit

Plug-in

- Solenoid valve wiring process reduced considerably.
- Disperse installation possible.
Manifold solenoid valve: 8 stations max,
32 positions (512 solenoids).
- Maintenance and inspection are easy.

Manifold Plug-in/Non Plug-in

Plug-in (with terminal block): VV5FS5-01T- Station 1- Port size

Bottom ported: VV5FS5-01T- Station 2- Port size

() : A/B port 3/4

				1	180 (9815)			

Note 1) According to JIS B8375-1981 (once per 30 days) for the min. operating frequency.

Note 2) According to JIS B8375-1981. (The value at supply pressure 0.5MPa.)

Note 3) The figures in the above list are for without sub-plate. In case of with sub-plate, add 1.65kg for Rc3/4 and 1.5kg for RC 1 respectively.

Note 4) "Note 1)" and "Note 2)" are with controlled clean air.

Standard Specifications

Valve	Fluid		Air and inert gas
	Max. operating pressure		1.0MPa
	Min. operating pressure		0.1MPa
	Proof pressure		1.5MPa
	Ambient and fluid temperature		-10 to 60°C ⁽¹⁾
	Lubrication		Non-lube ⁽²⁾
	Pilot valve manual override		Non-locking push (Flush)
	Shock/vibration resistance		150/50m/s ² ⁽³⁾
Solenoid	Protection function		E type: Dust proof (0 class), F type: Drip proof (2 class), D type: Splash proof (4 class) ⁽⁴⁾
	Rated voltage		100V, 200V AC 50/60Hz, 24V DC
	Allowable voltage		-15% to +10% rated voltage
	Coil insulation		Class B or equivalent (130°C) ⁽⁵⁾
	Apparent power (Power consumption) AC	Inrush	5.6VA/50Hz, 5.0VA/60Hz
		Holding	3.4VA (2.1W)/50Hz, 2.3VA (1.5W)/60Hz
	Power consumption DC		1.8W
Electrical entry	Plug-in	Conduit terminal	
	Non plug-in	DIN terminal	

Note 1) Use dry-air at low temperatures

Note 2) Use turbine oil No.1 (ISO VG32), if lubricated.

Note 3) Shock resistance: No malfunction from test using drop impact tester to axis and right angle direction of main valve and armature, each one time when energized and de-energized.

Vibration resistance: No malfunction from test with 8.3 to 2000Hz 1 sweep, to axis and right angle directions of main valve and armature, each one when energized and de-energized. (Value in the initial stage.)

Note 4) According to JIS C0920. Note 5) According to JIS C4003.
