Enabling Next Generation Audio, Visual and Networking

Have the latest HDMI connected 4K TV or console and want to take advantage of UHD-4K with HDR support?

The new range of **LMS Data X-Series** HDMI cables are a quality upgrade from your current, generic HDMI cable. Available in popular lengths, they are ideal for almost all retail and commercial A/V applications including gigabit switch stacking.

Unlike lesser manufactured HDMI cables, the **LMS Data X-series** features the upgraded OFC conductors on both connectors, coupled with improved gold plated and robust HDMI connectors for a longer life span together with better electrical conductivity, even in higher humidity areas.

Supporting HDMI V2.00 standards also means much faster data transfer rates of up to 18Gbps* and for UHD 4K TV customers, an increase from 8-Bit in HDMI v1.4 to 10/12-bit for LMS Data X-series cables, meaning improved HDR (high dynamic range) resulting in movies and gaming with a much improved colour pallet, meaning highly realistic visuals.

specifications:

Latest generation HDMI V2.0 specification HDMI-HDMI

Improved 4K UHD support - up to 18Gbps @ 60FPS*

(Up to around 7 metres, above 7 metres, around 30FPS)

Increased Colour Depth Support - Up to 10 12-bit Depths*

Supports HDR colour depths for ultra-realism*

Fully supports ACR, Ethernet and multiple AV streams

Ideal HDMI cables for UHD 4K, Gaming, Set-top boxes

Durable moulded over plugs with integral strain relief

Low-loss OFC HDMI conductors for improved signalling

Choice of lengths: 1.8, 2, 3, 5, 10, 15 metre options

* With compatible hardware only
