

Material:

Reusable Frame - Rigid Polystyrene and non-slip cloth backing. Peel of Film sheets – Produced from a proprietary blend of poly-olefin resins. Each pad contains 60 layers of film, yet has a profile less than 3mm Pull tabs – manufactured from polyester film and numbered consecutively ensuring removal of one layer at a time. Adhesive – Acrylic containing a non toxic antimicrobial additive that provides protection against the growth of organisms including bacteria, mould and mildew. Approved by the United States FDA for food direct contact (21 CFR 175.105)

Surface Finish:	Smooth
Product Height:	10mm nominal
Operating Temperature:	0° - +60° C
Environmental Resistance:	Dry, indoor environments.
UV Resistance:	N/A
Typical Applications:	Many industrial applications including: entrances to "clean room" environments, entrances to offices from shop floors, food applications and hospitals
Installation Method:	Loose lay.

Product Performance:

Fatigue:	●
Slip Resistance:	●
Wear:	●
Low → High	● → ● ● ● ● ●

Country of Origin:	USA
