

JBC GSF15V

Guide Kit Ø1.5 for SF with perforation

JBC

Guide Kit for SF280 Automatic Solder Feed Handle compatible with Ø 1.5 mm single-core solder wires.

A small blade perforates the solder wire down to the flux core while feeding it. This perforation process allows better flux flow and outgassing avoiding solder and flux splashing during the soldering process.

You can easily change the guide set depending on the solder wire used.

Guide Kit compatible with SF Automatic Solder Feeder Station.
