Subject: Label Update SPF Series Fuses

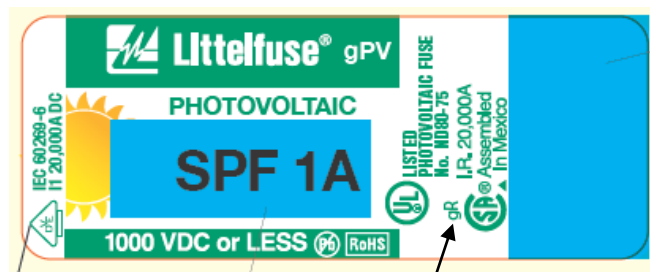

Document# LFPCN_PG0021

Date: 6/29/2012

This letter is to inform Littelfuse Sales, Sales Support & Customers of a label change used in the construction of SPF Series fuses. The label was updated with the gR marking to represent the full range protection capabilities of the devices during overload and short circuit conditions. The gR marking was added for informational purposes as part of CSA agency approval.

There are no changes to the design, manufacturing, or product numbers. No updates are required to ordering systems. The label transition will be a running change. The new labels will be incorporated upon depletion of existing label in inventory. The following part numbers will be affected:

OSPF030.T	OSPF020.T	OSPF012.T	OSPF008.T	OSPF005.T	OSPF003.T	OSPF001.T
