

MSI

**MSI – the true color performer**

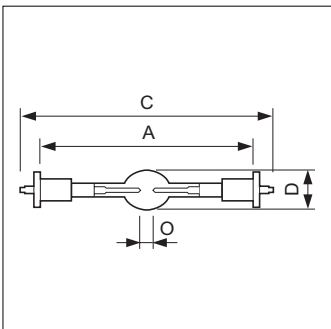

The excellent color rendition characteristics of the light produced by the MSI lamp helps ensure that audiences are always enthralled by the true natural colors and textures on the stage. What’s more, the high luminous efficacy ensures that these lamps produce consistently high levels of lighting for a relatively small amount of energy consumption, making them the smart on-stage solution in more ways than one.

**Product Features**

- Excellent Colors Characteristics
- High Luminous efficacy

**Product Benefits**

- Matching colors on the set
- High Light levels
