# DIN Rail mountable adaptor

The DIN rail mountable adaptor allows easy assembly with keystone connectors (e.g, fibre or copper coupler or socket). Available shielded (XDINS#) or unshielded (XDIN#).

Features

- Designed for standard 35mm wide DIN rails

- Easily mountable side by side on DIN rail. Side covers can be omitted if space is restricted

- Easy access to the connector and wiring through removable side covers

- Angled presentation provides gravity compensation for patch lead

- 'Slip-in' label facility for clear labeling

- Extremely durable and fits well with coupler/socket

- Installation does not require any special tools – the adaptor slides or clips easily onto the DIN rail

- Outstanding value

- Compatible with our range of fibre, USB2 and Category 5e/6/6A/8 coupler and sockets. http://www.tuk.co.uk/product/din-rail-mountable-connector-range/
