

Features

- 1-channel isolated barrier
- 24 V DC supply (loop powered)
- Current limit 65 mA at 9.8 V DC
- Up to SIL3 acc. to IEC 61508

Function

This isolated barrier is used for intrinsic safety applications. It supplies power to solenoids, LEDs, and audible alarms located in a hazardous area.

It is loop powered, so the available energy at the output is received from the input signal. The output signal has a resistive characteristic. As a result the output voltage and current are dependent on the load and the input voltage.

At full load, 9.8 V at 65 mA is available for the hazardous area application.
