SIEMENS

Data sheet 3RF20 50-1AA44

SEMICONDUCTOR RELAY 3RF2, 1-PH. WIDTH 45 MM, 50 A 48-460 V / 4-30 V DC SCREW CONNECTION

General technical data:		
product brand name		SIRIUS
Product designation		solid-state relay
Product function		zero-point switching
Number of poles for main current circuit		1
Protection class IP		IP20
Ambient temperature		
during operation	°C	-25 +60
during storage	°C	-55 + 80
Installation altitude at height above sea level	m	1 000
maximum		
Vibration resistance acc. to IEC 60068-2-6		2g
Shock resistance acc. to IEC 60068-2-27		15g / 11 ms
Equipment marking acc. to DIN 40719 extended		К
according to IEC 204-2 acc. to IEC 750		
Equipment marking acc. to DIN EN 61346-2		Q
Number of NC contacts for auxiliary contacts		0
Number of NO contacts for auxiliary contacts		0
Number of CO contacts for auxiliary contacts		0
Main circuit:		
Number of NO contacts for main contacts		1
Number of NC contacts for main contacts		0
Operating current		
Rated value maximum	Α	50
• at AC-51 Rated value	Α	50

Operating voltage with AC • at 50 Hz Rated value • at 60 Hz Rated value Operating range relative to the operating voltage with AC • at 50 Hz • at 50 Hz • at 50 Hz • at 60 Hz Operating frequency Rated value Relative symmetrical tolerance of the operating frequency Insulation voltage Rated value Rate of voltage rise at the thyristor for main contacts maximum permissible Blocking voltage at the thyristor for main contacts waximum permissible Reverse current of the thyristor Derating temperature Active power loss total typical Surge current resistance Rated value At 600 Izt value maximum Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 • for DC — Initial rated value — Final rated value V 44 V 44 V 30 Control supply voltage	
at 50 Hz Rated value at 60 Hz Rated value V 48 460 Operating range relative to the operating voltage with AC at 50 Hz at 60 Hz V 40 506 at 60 Hz Operating frequency Rated value Relative symmetrical tolerance of the operating frequency Insulation voltage Rated value Rate of voltage rise at the thyristor for main contacts maximum permissible Blocking voltage at the thyristor for main contacts maximum permissible Reverse current of the thyristor Active power loss total typical Surge current resistance Rated value A 600 Izt value maximum Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 of cr DC Initial rated value V 44 Final rated value V 44 V 44 V 44	
at 60 Hz Rated value Operating range relative to the operating voltage with AC at 50 Hz at 60 Hz V 40 506 40 506 Operating frequency Rated value Relative symmetrical tolerance of the operating frequency Insulation voltage Rated value Rate of voltage rise at the thyristor for main contacts maximum permissible Blocking voltage at the thyristor for main contacts maximum permissible Reverse current of the thyristor Derating temperature Cottoe Lizualue maximum Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 • for DC — Initial rated value V 40 506 40 506 600 V/µs 1 000 100 100 100 100 100 100	
Operating range relative to the operating voltage with AC • at 50 Hz • at 60 Hz Operating frequency Rated value Relative symmetrical tolerance of the operating frequency Insulation voltage Rated value Rate of voltage rise at the thyristor for main contacts maximum permissible Blocking voltage at the thyristor for main contacts maximum permissible Reverse current of the thyristor Derating temperature °C Active power loss total typical Surge current resistance Rated value A 600 Surge current resistance Rated value A 600 Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 • for DC — Initial rated value V 44 — Final rated value	
AC • at 50 Hz • at 60 Hz	
• at 60 Hz Operating frequency Rated value Relative symmetrical tolerance of the operating frequency Insulation voltage Rated value Rate of voltage rise at the thyristor for main contacts maximum permissible Blocking voltage at the thyristor for main contacts maximum permissible Reverse current of the thyristor Derating temperature Active power loss total typical Surge current resistance Rated value A 600 Lizt value maximum Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 • for DC — Initial rated value V 44 — Final rated value V 40 At 0.00 At	
Relative symmetrical tolerance of the operating frequency Insulation voltage Rated value Rate of voltage rise at the thyristor for main contacts maximum permissible Blocking voltage at the thyristor for main contacts maximum permissible Blocking voltage at the thyristor for main contacts maximum permissible Reverse current of the thyristor Derating temperature °C 40 Active power loss total typical Surge current resistance Rated value A 600 I2t value maximum Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 • for DC — Initial rated value V 4 Final rated value V 30	
Relative symmetrical tolerance of the operating frequency Insulation voltage Rated value Rate of voltage rise at the thyristor for main contacts maximum permissible Blocking voltage at the thyristor for main contacts maximum permissible Reverse current of the thyristor Reverse current of the thyristor Derating temperature °C 40 Active power loss total typical Surge current resistance Rated value A 600 Izt value maximum A²-s 1800 Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 • for DC — Initial rated value V 4 Final rated value V 30	
Insulation voltage Rated value Rate of voltage rise at the thyristor for main contacts maximum permissible Blocking voltage at the thyristor for main contacts maximum permissible Reverse current of the thyristor Reverse current of the thyristor Derating temperature °C 40 Active power loss total typical Surge current resistance Rated value Izt value maximum A²-s 1800 Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 • for DC — Initial rated value V 4 — Final rated value V 30	
Insulation voltage Rated value Rate of voltage rise at the thyristor for main contacts maximum permissible Blocking voltage at the thyristor for main contacts maximum permissible Reverse current of the thyristor Derating temperature C 40 Active power loss total typical Surge current resistance Rated value A 600 Izt value maximum Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 of or DC Initial rated value V 4 Final rated value V 30	
Rate of voltage rise at the thyristor for main contacts maximum permissible Blocking voltage at the thyristor for main contacts maximum permissible Reverse current of the thyristor Derating temperature C 40 Active power loss total typical Surge current resistance Rated value A 600 I2t value maximum A²-s 1 800 Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage C ontrol supply voltage 1 • for DC — Initial rated value V 4 — Final rated value V 30	
maximum permissible Blocking voltage at the thyristor for main contacts maximum permissible Reverse current of the thyristor Derating temperature °C 40 Active power loss total typical Surge current resistance Rated value I2t value maximum A²-s 1 800 Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 • for DC — Initial rated value V 4 — Final rated value V 30	
maximum permissible Reverse current of the thyristor Derating temperature °C 40 Active power loss total typical W 66 Surge current resistance Rated value A 600 I2t value maximum A²·s 1 800 Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 • for DC — Initial rated value V 4 — Final rated value V 30	
Derating temperature Active power loss total typical Surge current resistance Rated value A 600 12t value maximum A²·s 1 800 Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 • for DC — Initial rated value — Final rated value V 40 40 40 40 40 40 40 40 40	
Active power loss total typical Surge current resistance Rated value A 600 I2t value maximum A²-s 1 800 Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 • for DC — Initial rated value — Final rated value V 4 — Final rated value V 30	
Surge current resistance Rated value A 600 12t value maximum A 2-s 1 800 Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 • for DC — Initial rated value — Final rated value V 4 — Final rated value	
12t value maximum	
Short-circuit protection, design of the fuse link Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 • for DC — Initial rated value V 4 — Final rated value V 30	
Control circuit/ Control: Type of voltage of the control supply voltage Control supply voltage 1 • for DC — Initial rated value — Final rated value V 30	
Type of voltage of the control supply voltage Control supply voltage 1 ● for DC — Initial rated value V 4 — Final rated value V 30	
Type of voltage of the control supply voltage Control supply voltage 1 ● for DC — Initial rated value V 4 — Final rated value V 30	
 for DC — Initial rated value — Final rated value V V J U J J<	
— Initial rated value— Final rated valueV4V30	
— Final rated value V 30	
Timal fation value	
Control supply voltage	
 for DC Full-scale value for signal<0> V 1 recognition 	
Relative symmetrical tolerance of the supply voltage % 10	
frequency	
Control current	
at minimum control supply voltage	
— for DC mA 3	
● for DC Rated value mA 15	
Installation/ mounting/ dimensions:	
Mounting type screw fixing	
Mounting type Side-by-side mounting Yes	
Design of the thread of the screw for securing the equipment M4	

Tightening torque of the screw for securing the equipment	N·m	1.5
Width	mm	45
Height	mm	58
Depth	mm	48

Depth	IIIIII	46	
Connections/ Terminals:			
Type of electrical connection for main current circuit		screw-type terminals	
Design of the thread of the connection screw for main contacts		M4	
Tightening torque for main contacts with screw-type terminals			
• minimum	N·m	2	
• maximum	N·m	2.5	
Tightening torque [lbf·in] for main contacts with screw-type terminals			
• minimum	lbf∙in	7	
• maximum	lbf∙in	10.3	
Type of connectable conductor cross-section			
• for main contacts			
— solid		2x (1.5 2.5 mm²), 2x (2.5 6 mm²)	
— finely stranded			
 — with core end processing 		2x (1 2.5 mm²), 2x (2.5 6 mm²), 1x 10 mm²	
• for AWG conductors			
— for main contacts		2x (14 10)	
 for auxiliary and control contacts 		1x (AWG 20 12)	
 for auxiliary and control contacts 			
— solid		1x (0.5 2.5 mm²), 2x (0.5 1.0 mm²)	
— finely stranded			
 — with core end processing 		1x (0.5 2.5 mm²), 2x (0.5 1.0 mm²)	
 — without core end processing 		1x (0.5 2.5 mm²), 2x (0.5 1.0 mm²)	
Connectable conductor cross-section			
• for main contacts			
single or multi-stranded	mm²	1.5 6	
— finely stranded			
 — with core end processing 	mm²	1 10	
 for auxiliary and control contacts 			
— solid	mm²	0.5 2.5	
— finely stranded			
 — with core end processing 	mm²	0.5 2.5	
 — without core end processing 	mm²	0.5 2.5	
AWG number as coded connectable conductor cross section for main contacts		14 10	

Type of electrical connection for auxiliary and control current circuit		screw-type terminals
Design of the thread of the connection screw of the auxiliary and control contacts		M3
AWG number as coded connectable conductor cross section for auxiliary and control contacts		20 12
Wire stripping length of the cable		
• for main contacts	mm	10
 for auxiliary and control contacts 	mm	7
Tightening torque for auxiliary and control contacts with screw-type terminals	N·m	0.5 0.6
Tightening torque [lbf·in] for auxiliary and control contacts with screw-type terminals	lbf∙in	4.5 5.3

Certificates/ approvals:

General Prod	luct Approval	EMC	Declaration of Conformity	Test Certificates	other
SU °	EHC	C-TICK	EG-Konf.	Type Test Certificates/Test Report	Environmental Confirmations
