

Dear Partner,

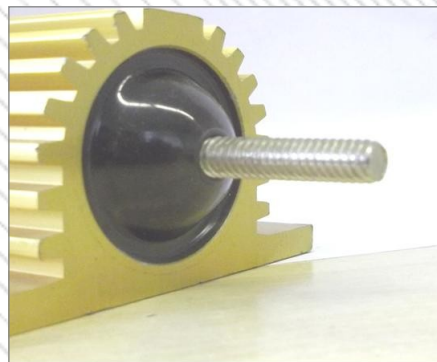

ARCOL are pleased to inform you of a technical specification change to the following product range.

Due to continual product and process improvements the HS200, HS250 and HS300 have a new moulded end profile and improved terminal. This has been adapted to ensure no damage is occurred to the moulded surface whilst tightening of the nut which previously has caused failure in some product. The Photo's below show the new and old moulded ends and terminals for your comparison. The terminals and moulding are the only change to the product.

Quality & Technical Improvement

Previous Design

Effected Part	: -HS200/HS250/HS300
Date Of Effective Change	: -January 2013
Type of Change	: -Phased in.

Please inform us if supply of product with mixed terminals from the effective date will be acceptable.
