Description of Change:

- Vishay will convert the remaining DIL-4 Phototransistor Optocouplers from a conventional production line to a modern, automated matrix manufacturing line.
- The plating used on the lead frame will be updated.
- For assurance of supply, an alternative in-house emitter has been qualified.

Reason for Change:

Vishay will move the production of DIL-4 optocouplers to our newer, automated manufacturing line to streamline production and optimize supply chain. This change will allow the utilization of the same materials, construction, and processes that are employed on other optocouplers Vishay manufactures. To support Vishay's increasing demand requirements, to allow flexibility in manufacturing, and to assure long-term product availability we will add an alternative emitter die.

Expected Influence on Quality/Reliability/Performance:

There is no change in form, fit, or function. The datasheet minimum and maximum performance parameters will remain the same. Nevertheless, we request our customers to test the product in their specific application. As there is no change in the safety parameters, the existing UL, VDE, and other agency safety certifications remain valid.

Part Numbers/Series/Families Affected: Please see materials list on the succeeding page.

Vishay Brand(S): Vishay Semiconductors

Time Schedule:

Start Shipment Date: Mon Jul 1, 2024

Sample Availability: Samples are available upon request.

Product Identification: Product can be tracked by lot number.

Qualification Data: These changes have been rigorously qualified to meet Vishay's and industry standard qualifications.

This PCN is considered approved, without further notification, unless we receive specific customer concerns before Fri May 31, 2024 or as specified by contract.
