TE Connectivity

Product Change Notification: P-19-017536

PCN Date: 20-JUN-19

Customer: Waldom Electronics Corp (167882)

Location: Rockford

Agreement: Agreement Unknown

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:

Low Inductance, High Frequency Chip Inductor - Type 3650 series

Description of Changes

The colour dot on the 3650 series which denotes the value of the inductor will be henceforth removed. This will not in any way effect the performance and quality of the product, nor are there any changes to the physical product. The Datasheet will be updated with the new information and issued shortly. Please note: The effectivity date of this PCN are system driven. The changes detailed will happen immediately.

Other attachments:

[3650 Series Marking Change](#)

Reason for Changes:

Customer Request. Following customer discussions it was decided that the fact that the same colour dot can be used to denote several different inductance values was extremely confusing. In the absence of any improved method of identification the inductors will now be supplied unmarked.
