## Bit-Checks Wood

### Holding function for recessed TORX® screws

The HF tools developed by Wera are ideal because they feature an optimised geometry of the original TORX® profile. The wedging forces resulting from the surface pressure between the drive tip and the screw profile mean that TORX® screws made according to Acument Intellectual Properties specifications are securely held on the tool!

### Also for ASSY and SPAX T-STAR plus screws

The Wera 867/1 TX HF bits are also suitable for Würth ASSY screws as well as Altenloh SPAX T-STAR plus screws.

### Rapidaptor with ringmagnet

The floating, free-turning magnetic sleeve securely holds even large and heavy screws to enable immediate application. There is no need to hold the screw when applying the tool - something which can be dangerous and painful. Also ideal for overhead work.

### At the workplace

The Bit-Checks can be positioned upright at the workplace so the tool is always quickly to hand.
