

Motor run capacitors

 Series/Type:
 B32332 – Super MotorCap™, 450 V

 Ordering code:
 B32332

 Date:
 Nov 2012

 Version:
 9

 $\odot$  EPCOS AG 2012. Reproduction, publication and dissemination of this publication, enclosures hereto and the information contained therein without EPCOS' prior express consent is prohibited.

## Motor run capacitors

## Construction

- Metallized polypropylene film
- Aluminum can with plastic top
- Soft polyurethane resin

#### **Applications**

For general sine wave applications, Mainly as motor run capacitor

#### **Features**

- Self-healing properties
- Low dissipation factor
- Highest safety level P2 to IEC 60252-1 2001-02
- Overpressure disconnection device
- High insulation resistance
- EN 60335-1 compliance on request

#### **Terminals**

FILM AC RD

Please read Cautions and warnings and

Important notes at the end of this document.

B32332 – Double Fast on: 6.3 × 0.8 mm

#### Mounting part

Threaded stud at bottom of can (M8, max. torque = 5 Nm)

Technical data and specifications					
Reference standards	IEC 60252-1 2001-02, EN 60252 2001				
	UL 810				
Life expectance to IEC 60252 2001	450 V: 30,000 h (class A)				
Safety class according to IEC 60252-1 2001-02	P2				
UL 810 file E 106388	Approved Component 10000 AFC protected up to 450 V				
Rated capacitance C <sub>R</sub>	See table ordering codes, page 6, 7				
Tolerance	±5%				
Permitted capacitance $\Delta C/C$	≤3 %				
Rated voltage V <sub>R</sub>	450 V AC				
Rated frequency f <sub>R</sub>	50 / 60 Hz				

**EPCOS** 

## B32332

B32332 – Super MotorCap™, 450 V

B32332

## Motor run capacitors

# B32332 – Super MotorCap™, 450 V

Maximum ratings					
Maximum permissible voltage V <sub>max</sub>	1.1 · $V_R$ ( $V_R$ = Rated voltage)				
Maximum permissible current I <sub>max</sub>	1.3 · I <sub>R</sub> (I <sub>R</sub> = Rated current)				
Test data					
AC test voltage terminal to terminal $V_{TT}$	2 · V <sub>R</sub> , 2 s (routine test)				
	$2 \cdot V_R$ , 60 s (type test)				
AC test voltage terminals to can $V_{TC}$	2 kV AC, 2 s (routine test)				
	2 kV AC, 60 s (type test)				
Insulation resistance $R_{ins}$ or time constant $\tau$ at 20 °C, Rel. humidity max. value 85%, annual means $\leq 65\%$	3,000 s				
Dissipation factor tan $\delta$ at 20 °C	≤1.0 ·10 <sup>·3</sup> (120 Hz)				
Maximum rate of voltage rise dV/dt <sub>max</sub>	10 V/µs				
Climatic data					
Climatic category 25/085/21 to IEC 60068-1					
Lower category T <sub>min</sub>	–25 ℃				
Upper category T <sub>max</sub>	+85 ℃				
Damp heat test t <sub>test</sub>	21 days				
Mechanical and thermal properties					
Ball pressure test to IEC 60309-1 sec. 27.3	At 125 °C				
Plastic can and top disk material	UL 94 V2 minimum				
UL 94 V2/V0 compatible					
■ Glow wire test to IEC 60335-1 / IEC 60695-2-1/1 Test temperature 550 °C / 750 °C	Self-extinguish within 2 seconds of withdrawing				
Part is compatible to EN 60335-1	glow wire				
Tracking test to IEC 60112 solution A >250 V					
Compatibility to RoHS					
Compliance to directive 2002/95/EC	RoHS compatible

### B32332 – Super MotorCap™, 450 V

Approvals		
VDE EN 60252-1		
450 V / 85 ℃:	30,000 h (class A)	Approved Up to 20µF
TÜV EN 60252-1		
450 V / 85 ℃:	30,000 h (class A)	Approved up to 50µF
UL 810 E106388		Approved Component 10000 AFC, protected
C <b>AI</b> US		up to 450 V
Cac		Approved on request
Logistics		
Delivery mode		EU palett as standard
		Cardboard tape on palett
		Pack unit, see dimension table

#### **Cautions and warnings**

Please read "Applications warning, installation and maintenance instructions" and the "General Safety Data Sheet for Power Capacitors" issued by ZVEI, which are available on the internet at **www.epcos.com/ac\_capacitors**, to ensure optimum performance and to prevent products from failing, and in worst case, bursting and fire. Information given in the data sheet reflects typical specifications. You are kindly requested to approve our product specifications or request our approval for your specification before ordering.

The following applies to all products named in this publication:

- 1. Some parts of this publication contain statements about the suitability of our products for certain areas of application. These statements are based on our knowledge of typical requirements that are often placed on our products in the areas of application concerned. We nevertheless expressly point out that such statements cannot be regarded as binding statements about the suitability of our products for a particular customer application. As a rule, EPCOS is either unfamiliar with individual customer applications or less familiar with them than the customers themselves. For these reasons, it is always ultimately incumbent on the customer to check and decide whether an EPCOS product with the properties described in the product specification is suitable for use in a particular customer application.
- 2. We also point out that in individual cases, a malfunction of electronic components or failure before the end of their usual service life cannot be completely ruled out in the current state of the art, even if they are operated as specified. In customer applications requiring a very high level of operational safety and especially in customer applications in which the malfunction or failure of an electronic component could endanger human life or health (e.g. in accident prevention or life-saving systems), it must therefore be ensured by means of suitable design of the customer application or other action taken by the customer (e.g. installation of protective circuitry or redundancy) that no injury or damage is sustained by third parties in the event of malfunction or failure of an electronic component.
- 3. The warnings, cautions and product-specific notes must be observed.
- 4. In order to satisfy certain technical requirements, **some of the products described in this publication may contain substances subject to restrictions in certain jurisdictions (e.g. because they are classed as hazardous)**. Useful information on this will be found in our Material Data Sheets on the Internet (www.epcos.com/material). Should you have any more detailed questions, please contact our sales offices.
- 5. We constantly strive to improve our products. Consequently, **the products described in this publication may change from time to time**. The same is true of the corresponding product specifications. Please check therefore to what extent product descriptions and specifications contained in this publication are still applicable before or when you place an order. We also reserve the right to discontinue production and delivery of products. Consequently, we cannot guarantee that all products named in this publication will always be available. The aforementioned does not apply in the case of individual agreements deviating from the foregoing for customer-specific products.
- 6. Unless otherwise agreed in individual contracts, all orders are subject to the current version of the "General Terms of Delivery for Products and Services in the Electrical Industry" published by the German Electrical and Electronics Industry Association (ZVEI).
- 7. The trade names EPCOS, BAOKE, Alu-X, CeraDiode, CSMP, CSSP, CTVS, DeltaCap, DigiSiMic, DSSP, MiniBlue, MiniCell, MKK, MLSC, MotorCap, PCC, PhaseCap, PhaseCube, PhaseMod, PhiCap, SIFERRIT, SIFI, SIKOREL, SilverCap, SIMDAD, SiMic, SIMID, SineFormer, SIOV, SIP5D, SIP5K, ThermoFuse, WindCap are trademarks registered or pending in Europe and in other countries. Further information will be found on the Internet at www.epcos.com/trademarks.
