

Model Number

AIR30-8-HW-2500/38a/76a

Active infrared scanner with 5 m fixed cable

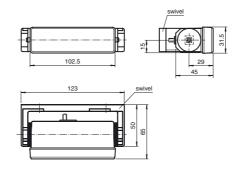

Features

- Single-beam light scanner
- Can be used to monitor both main and ancillary closing edges
- Closing edge safety on revolving doors and carousel doors
- Accurate beam alignment thanks to finely bundled light beam
- Background evaluation operating mode: uses the background as a reference for detecting difficult objects

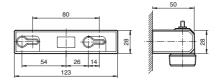

Product information

AIR30 is a series of active infrared scanners with excellent optical properties for monitoring closing edges in a wide range of door systems. The diverse range of housings and mounting options allow the devices to be adapted to suit a whole host of mounting conditions.

Dimensions

Mounting dimensions for swivel

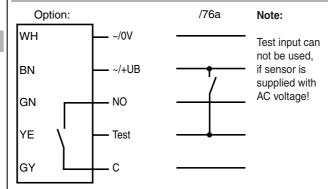

Mounting dimensions with mounting bracket set AIR30

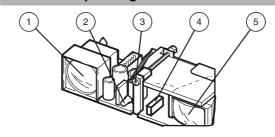

Electrical connection

Indicators/operating means

1	Transmitter
2	Indication-LED
3	Detection range adjuster
4	Light / Dark switch
5	Receiver

Technical data

General specifications

100 ... 1000 mm Detection range min. Detection range max. 100 ... 2500 mm

IRFD Light source

modulated infrared light Light type

Black/White difference (6 %/90 %) ≤ 400 mm at a distance of 2000 mm

Transmitter frequency

Operating mode Background evaluation

50 mm at 2000 mm sensor range Diameter of the light spot

Angle of divergence approx. 1.4

Swivel bracket, Mounting bracket Accessories provided

Functional safety related parameters

1050 a $MTTF_d$ Mission Time (T_M) 20 a Diagnostic Coverage (DC) 90 %

Indicators/operating means

LED red: lights up when output is active Function display Controls Detection range adjuster, light/dark switch

Electrical specifications

10 ... 48 V DC / 11 ... 38 V AC Operating voltage U_{B}

No-load supply current 100 mA l₀

Input

Test input emitter deactivation at +U_B

Output

Switching type light/dark on, switchable / Ex works settings: light on

Signal output relay, 1 NO Switching voltage \leq 55 V AC / 24 V DC Switching current \leq 200 mA AC / 1 A DC

50 ms Response time De-energized delay approx. 200 ms

Ambient conditions

-20 ... 60 °C (-4 ... 140 °F) Ambient temperature -20 ... 75 °C (-4 ... 167 °F) Storage temperature

Mechanical specifications

IP52 Protection degree

Connection 5 m fixed cable

Material

Housing plastic Optical face Luran Mass 50 g

Compliance with standards and directi-

ves

Standard conformity

FN 60947-5-2 Standards

EN 61000-6-2 without EN 61000-4-5, EN 61000-4-11

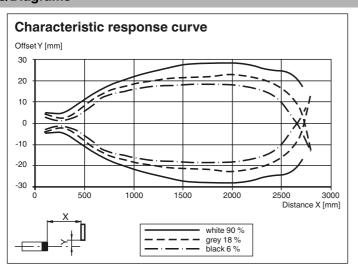

EN 61000-6-3

Approvals and certificates

CE conformity

CCC approval Certified by China Compulsory Certification (CCC)

Curves/Diagrams

Typical applications

- · Monitoring closing edges and crushing points on revolving doors and carousel
- Door monitoring system in local public transportation

Detection area

Accessories

UP-Einbaurahmen

Mounting frame for sensors in the AIR30 and PROSCAN series

Flush Mounting AIR30

Installation cover for AIR30 series sensors

Wetterhaube AIR30

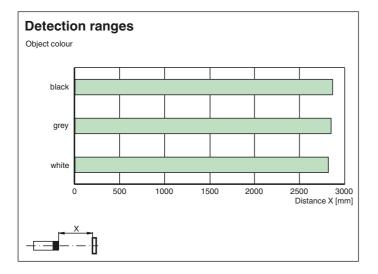

Weather hood for series AIR30

Operating principle

Active infrared scanners detect people and objects using short-wave infrared radiation according to the triangulation principle. A switch signal is tripped if the infrared beam emitted is reflected by an object within the specified sensing range. Where background evaluation is activated, the background (e.g. ground) is used as a reflector.

This allows reflective or shiny objects, such as vehicles and objects located close to the surface, to be detected reliably and in full.

Operating principle Background evaluation Object in sensing field:
