Hand lamp with 3 Watt Power LED and charging station

Description

Rechargeable hand lamp for professional use incl. diffuser orange e.g. as a blinking emergency lamp.

Emergency light function at charging station according VDE 0108. The Power LED delivers a **bright and homogeneous light** for the work area.

There is no change of a bulb needed any more.

Extremely light-weight of the lamp

Ergonomic and easy-to-use design

Dust- and splash-proof

110° swivelling lamp head

3 Watt Power LED as main lamp with automatic switch to pilot lamp

Remaining capacity indicator by 4 LED; the charging level is indicated by flashing of the pilot lamp. The charger features an optimised charging function and still is very compact; this allows it to be installed in the smallest niche in a vehicle or building. The AccuLux SL 5 LED can be charged at 230 V AC as well as 24 or 12 V DC.

High-quality and maintenance-free lead gel battery.
