Counting Dials

Meggitt Electronics can offer you an excellent range of analogue and digital counting dials to complement the popular 5930. The 7/8" series CT56 and CT57 offer up to 15 turns, the CT46 is a well proven 2" diameter 20 turn dial whilst the CT27 offers digital readout in a premium package, at a very attractive price. All dials are supplied with mounting instructions and have locking devices to prevent accidental movement. A perfect solution to your Potentiometer/Dial combination requirements.
