

New ceiling plate PFA 9010

Technical improvements:

- Flat mounting plate (no more need for extra long screws)
- Bigger, oval, mounting holes (easier drilling/positioning)
- More mounting holes (mounting on eg. joists is possible)
- Special mounting hole for standard, low cost, truss clamp

New ceiling plate PFA 9010

Extra features

- Inclined ceiling mounting is integrated, no more need for the PFA 9019.
- We have a 2 in 1 solution
- Integrated pre-drill pattern for PFA poles. More details on the following sheet

Design improvement

- Unique cover included
- Both Silver and Black color available

Technical information

- The PFA poles need one extra mounting hole on ceiling plate side
- Vogel's makes this easy for the installer in 2 ways:
 1. All PFA poles (9003-9004-9015-9016) will standard be supplied with two holes on both sides in stead of one. Sept-07
 2. For on the job drilling after cutting the poles to a dedicated length, PFA 9010 has an easy integrated pre-drill pattern for exact positioning of the holes
