

Tank Features:

- Removes Dirt, Grease, Corrosion - can be used for cleaning Electronic & Mechanical parts. For best results use appropriate cleaning fluid or solvent suitable for the item.
- Degas mode - This mode is to be used after a fluid change to rapidly remove air from the fluid so it can provide maximum cleaning effectiveness from the start of the cleaning cycle.
- Delicate mode - The cleaner runs at half power which provides a less aggressive cleaning action for fragile/delicate items.
- Full-power mode - A powerful deep clean that will clean heavily contaminated items.
- Temperature and Timing mode - Allows the user to set both the fluid temperature and duration of the cleaning cycle. These parameters will change depending on the cleaning agent and item being cleaned.
- Tank, lid and housing made from stainless steel.
- Comprehensive manual included.
