Avatar

Smart digital team members

Avatars can be used anywhere you use a tablet to give people first level support and stay firmly ahead of your customers' wants and needs.

The usability of avatars is very diverse from retail to public facilities, the specteum of application is very wide.

In retail is help to increase sales without additional personnel costs with a shop-in-shop solution and data-driven product recommendations.

As information provider, avatars can present extensive information about products and services, about location or exhibits so that the experience for visitors is not only unique, but help secure lifelong returning customers.

Retail   Enterprise   Hospitality

Education   Healthcare   Home
