

## Quick-change steel tool holder

### Application:

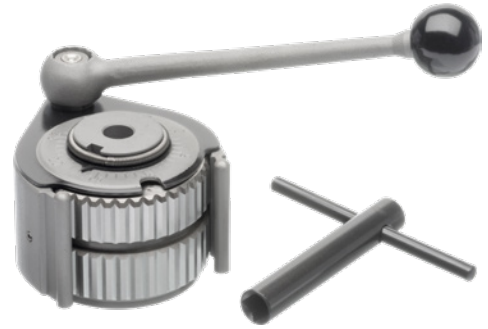

For holding change tool holders. The selection of the Multifix quick-change steel tool holder and change tool holder depends on the drive output, the tool carriage width and lathe chisel height.

### Version:

- The drill hole in the centring disc must be enlarged to the dimensions of the clamping screw.

### Advantage:

- Precision manufacture owing to the high repeat accuracy (0.01 mm)
- Versatile production possibilities (40 tool positions possible)
- Quick and trouble-free height adjustment thanks to adjusting screw
- Extremely flexible due to the modular structure

<b>Art. no.</b>	<b>22240 050</b>
