4th of February 2015

Dear

We confirm that the product HWAT-T55 is

in compliance with Directive 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

In our view these products are products within category 11 and will therefore come under the scope of the ROHS Directive in 2019. We are working with our suppliers to ensure that these products will be compliant with ROHS at that time.

In relation to REACH (Regulation 1907/2006 as amended), the product itself complies with REACH. We are in the process of reviewing our customer information systems to ensure that all required information is being communicated to our customers.
