

**Key Features**

Resistance values from 10mΩ

Low TCR version available for many values

High purity alumina substrate for high power dissipation

RoHS Compliance

MSL Level 1

**Applications**

Power management applications

Switching power supply

Over current protection in audio applications

Voltage regulation module (VRM)

DC-DC converter, battery pack, charger, adaptor

Disk driver

**Type RLC73 Series**

TE Connectivity (TE) introduces a new range of current sense resistors to be offered as a low-cost alternative to legacy solutions characterised by noble metal construction (Ag/Pd / RU) and terminations. RLC73 series has the additional benefit of being fully RoHS compliant, and features power ratings up to 2W and TCRs down to 50ppm/°C in the high-power version. Furthermore, these resistors satisfy the demand for low ohmic shunt resistors to act as current sensors towards ICs for battery charge management and low voltage power supplies produced by global semiconductor manufacturers.
