

MARKETING NOTE – May 31st, 2013

**PCN MMS-MIC/13/7747
Crolles Qualification STM32F2 - STM32F4 Product Families**

MMS - Microcontrollers Division (MCD)

Dear Customer,

In reference to the PCN MMS-MIC/13/7747, we wish to inform you that we are postponing the qualification of Crolles as additional F/E manufacturing source for STM32F2 and STM32F4 product lines.

In consequence, PCN document timing will be revised with the target to activate Crolles production source during Q4 2013. We foresee sample availability by end of Q3 2013

We remain available for any question you may have concerning this change.

Sincere regards.

Veronique Barlatier
Commercial Marketing Manager
Microcontroller Division
