BRAKE CLEANER

PRODUCT FEATURES:

This product is designed to quickly remove brake dust, dirt, oil and brake fluid from brake and clutch systems. The fast working formula dries in minutes and formula dries in minutes and leaves no residue. Regular cleaning helps brake discs and pads last longer.

PRODUCT BENEFITS:

- High pressure jet aperture for precise application into areas of difficult accessibility.
- 360° valve allows inverted use, where required, for awkward areas of application.
- High discharge rate provides “flush” washing properties.
- Residue free.
- Dissolves all greases and oils.
- Removes lining dusts from brakes and clutches.
- Eliminates brake squeal.
- Eliminates clutch slip caused by contaminated components.

TYPICAL APPLICATIONS:

On all functional components in motorbike brake or clutch assemblies, including callipers, discs, clutch plates etc.

DIRECTIONS FOR USE:

Use in a well ventilated area. Spray on to brake discs, pads and clutches to remove dirt. Allow to evaporate then wipe away any dirt deposits with a clean cloth. Always test brake operation after cleaning.
