

Good Afternoon,

We have received notification from our head office that some DIN rail mount terminals in the WAGO TOPJOB S range now have additional approvals.

These additional approvals will be shown on the products themselves, there is an example below:-

Change Description	Additional approvals will be added to the articles marking area.	
	<p>Current condition:</p>  <p>Please note: shown marking area is a representative example. Series, Current, voltage or IEC standard may vary depending on the articles specific characteristics.</p>	<p>Future condition:</p> 
Change Reason	Articles obtained additional approvals so that their range of possible application extends.	

This change has already been integrated and you may have already received deliveries of the parts showing the additional approvals.

Both versions can be used together.

Attached is a list of the affected part numbers.

Part Number	Part Number	Part Number	Part Number
