

- Increased switching distance
- Innovative ASIC circuit technology
- Minimal mounting clearance thanks to wenglor weproTec
- Sensor head as sensing face

Inductive Sensors with increased switching distances are distinguished by rugged design, easy installation and reliable measured values. The large range makes additional types of sensor superfluous because they can also be used to implement special applications. In addition to error-free operation of several sensors in a very small space, the new generation also provides the possibility of detecting system errors before it's too late thanks to ASIC und wenglor weproTec.

## Technical Data

### Inductive Data

Switching Distance	3 mm
Correction Factors Stainless Steel V2A/CuZn/Al	1,27/0,83/0,80
Mounting	non-flush
Mounting A/B/C/D in mm	16/25/9/2
Mounting B1 in mm	0...10
Switching Hysteresis	< 10 %

### Electrical Data

Supply Voltage	10...30 V DC
Current Consumption (U <sub>b</sub> = 24 V)	< 10 mA
Switching Frequency	900 Hz
Temperature Drift	< 10 %
Temperature Range	-40...80 °C
Switching Output Voltage Drop	< 1 V
Switching Output/Switching Current	150 mA
Residual Current Switching Output	< 100 µA
Short Circuit Protection	yes
Reverse Polarity and Overload Protection	yes
Protection Class	III

### Mechanical Data

Housing Material	Plastic
Degree of Protection	IP67
Connection	Cable, 3-wire, 2 m
Cable Jacket Material	PVC

### Safety-relevant Data

MTTFd (EN ISO 13849-1)	3706,54 a
------------------------	-----------

### Function

Error Indicator	yes
PNP NO	<input checked="" type="checkbox"/>

Connection Diagram No.

**202**

\* Temperature range with permanently installed cable, bending radius: > 40 mm
