Subject: CHO-STRAP UL RATING

Attention: Parker Chomerics Customers

Dear Valued Customer,

In 2019 Parker Chomerics was informed of a supplier obsolescence of a raw material that is contained in our CHO-STRAP product. The identification of a suitable replacement material was incorporated into samples set to Underwriters Laboratories for UL Flame test certification. It was expected that by August 2019 that the new material would be certified to V-0 certification consistent with the original raw material.

As of February 2020 CHO-STRAP product has been recertified by Underwriters Laboratories. The product was tested in a burn test and passed the UL test.

UL certified our product to UL V-1 in February 2020.

Please be aware that any CHO-STRAP delivered after February 1, 2019 will be UL V-1.

If you have additional questions, please contact me or your Parker Account Manager.

Regards,

Brian Mahoney
