

## PD Caps

*Semirigid, encapsulant-lined, polyolefin caps*

### Applications

PD Caps offer an improved, inexpensive way to encapsulate crimped electrical connections, including those on motor coils. Encapsulant melts and flows to fill surface irregularities of the substrate. These vibration-proof caps are used to insulate and terminate dead-end electrical cables, fixtures, connectors, and other electrical equipment.

### Operating temperature range

-55°C to 110°C

### Features and benefits

- 3:1 shrink ratio.
- Permanent or temporary way to terminate wires.
- Rapid, simple installation.
- Rugged protection against abrasion, vibration, and flexing.
- PD caps provide a splash-resistant, moisture-resistant covering (but not intended for use where immersion in fluids is required).

### Installation

Minimum shrink temperature: 125°C

Minimum full recovery temperature: 135°C
