

OPTICAL TECHNOLOGY

When drive manufacturers test their products, they use Verbatim media. Its the global No.1 for a reason - guaranteed quality!

M-DISC™ ARCHIVAL DVD R AND BDR

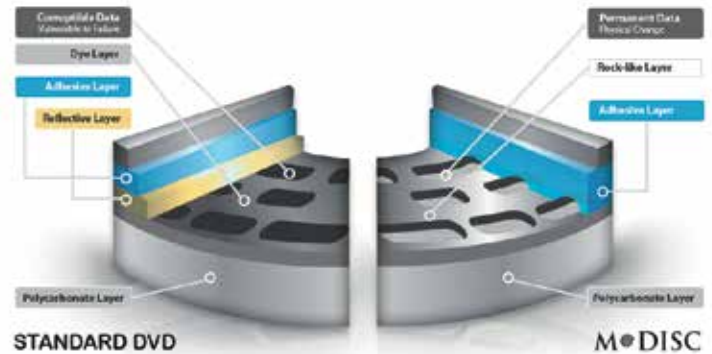

M-Discs have a projected lifetime of several hundred years (based on ISO/IEC 16963 testing) which makes them ideal for storing your most precious documents - files that you simply cannot afford to lose or become damaged. Unlike traditional optical media which utilize dyes, data stored on an M-Disc is engraved on a patented inorganic write layer which will not fade or deteriorate. This unique engraving process renders these archival grade discs practically impervious to environmental exposure, including light, temperature and humidity.

See www.verbatim-europe.com/m-disc for more info.

BLU-RAY

- High capacity for high definition (HD) video or long-term archiving
- Dual layer (DL) discs with two recording layers for 50GB storage
- BD-R XL - three recording layers for 100GB storage
