- <0.5 W Standby Power</li>
- High Power Density 10 W/in<sup>3</sup>
- 80/100 W Convection & Force-cooled Ratings
- Class I & Class II Installations
- Industry Standard 2.0" x 4.0" x 1.25" Format
- Class B Radiated Emissions ('-B' Models)
- Low Earth Leakage Current
- 3 Year Warranty

The ECS100 Series has been designed to minimise the no load power consumption (<0.5 W) and maximise efficiency in order to facilitate equipment design to the latest environmental legislation.

Approved for Class I and Class II applications, the ECS100 range of single output AC-DC, 100 W power supplies feature high power density in an industry standard 2 x 4" (51.0 mm x 102.0 mm) footprint. The 1.20" (31.0 mm) high, 1U compatible high-density power supplies meet EN55032 Level B emissions with low earth leakage currents of 100  $\mu$ A at 115 VAC or 215  $\mu$ A at 230 VAC. Making these switchers ideal for industrial, IT and medical applications.

The ECS100 series has single output versions from 12 V to 48 VDC, adjustable by  $\pm 10\%$ . They are dual-fused for compliance with IEC60601-1 and efficiency is 88% typical, so minimal excess heat is generated. The ECS100 require only 10 CFM of cooling to delivers a full 100 W of power up to +50 °C and operates at up to +70 °C with derating or equally supply 80 W when convection-cooled up to +50 °C with operation to +70 °C with derating.

# Models and Ratings - Convection-cooled

| Output                 | Power             | Output Voltage V1 | Max Output Current | Model Number(1) |
|------------------------|-------------------|-------------------|--------------------|-----------------|
| Forced Cooled (10 CFM) | Convection Cooled | Output voltage vi | Max Output Gurrent | Model Nulliber  |
| 100 W                  | 80 W              | 12.0 VDC          | 8.3 A              | ECS100US12      |
| 100 W                  | 80 W              | 15.0 VDC          | 6.7 A              | ECS100US15      |
| 100 W                  | 80 W              | 18.0 VDC          | 5.5 A              | ECS100US18      |
| 100 W                  | 80 W              | 24.0 VDC          | 4.2 A              | ECS100US24      |
| 100 W                  | 80 W              | 28.0 VDC          | 3.6 A              | ECS100US28      |
| 100 W                  | 80 W              | 48.0 VDC          | 2.1 A              | ECS100US48      |

### **Output Characteristics**

| Characteristic             | Minimum | Typical | Maximum | Units   | Notes & Conditions   |
|----------------------------|---------|---------|---------|---------|--|
| Output Voltage - V1        | 12      |         | 48      | VDC     | See Models and Ratings table   |
| Initial Set Accuracy       |         |         | ±1      | %       | 50% load, 115/230 VAC  |
| Output Voltage Adjustment  | ±10     |         |         | %       | Via potentiometer. See mech. details (page 9)                            |
| Minimum Load               | 0       |         |         | A       |  |
| Start Up Delay             |         | 1       |         | S       | 230 VAC full load (see fig.2)  |
| Hold Up Time               | 16      |         |         | ms      | 115 VAC full load (see fig.3)  |
| Drift                      |         |         | ±0.2    | %       | After 20 min warm up   |
| Line Regulation            |         |         | ±0.5    | %       | 90-264 VAC   |
| Load Regulation            |         |         | ±1      | %       | 0-100% load.   |
| Transient Response - V1    |         |         | 4       | %       | Recovery within 1% in less than 500 µs for a 50-75% and 75-50% load step |
| Over/Undershoot - V1       |         | 5       |         | %       | See fig.4  |
| Ripple & Noise             |         |         | 1       | % pk-pk | 20 MHz bandwidth (see fig.5 & 6)   |
| Overvoltage Protection     | 115     |         | 140     | %       | Vnom DC.   |
| Overload Protection        | 110     |         | 150     | % I nom | Auto reset (see fig.7)   |
| Short Circuit Protection   |         |         |         |         | Continuous, trip & restart (hiccup mode)                                 |
| Temperature Coefficient    |         |         | 0.05    | %/°C    |  |
| Overtemperature Protection |         |         |         | °C      | Not fitted   |

Notes:
1. For Class B radiated emissions models, add suffix -B to model number. For covered versions, add suffix '-C' to model number or order part no. ECM40/60 COVER for standalone cover. Derate output power by 20% with cover. The cover is not suitable for Class II installations.

#### **Thermal Considerations**

In order to ensure safe operation of the PSU in the most adverse conditions permitted in the end-use equipment, the temperature of the components listed in the table below must not be exceeded. See drawing on page 9 for component locations. Temperature should be monitored using K type thermocouples placed on the hottest part of the component (out of any direct air flow).

| Temperature Measurements (Ambient ≤ 50 °C) |                    |  |
|--|--------------------|--|
| Component                                  | Max Temperature °C |  |
| T1   | 110 °C             |  |
| C5   | 100 °C             |  |
| C4   | 100 °C             |  |
| Q1   | 110 °C             |  |

<sup>1.</sup> All dimensions in inches (mm). Tolerance .xx =  $\pm 0.02$  (0.50); .xxx =  $\pm 0.01$  (0.25)
