

## 58-530B 58-530W

Unrivalled combination of chemical resistance, confident grip and a comfortable inner lining

# Unique combination of grip and chemical resistance.

- The AlphaTec glove incorporates revolutionary ANSELL GRIP™ technology to enable users to handle wet or oily objects with less grip force and more control. This unique combination of liquid-proof chemical resistance and grip, together with flexibility and dexterity, makes the AlphaTec glove the logical choice when working with chemicals.
- Reliable chemical protection for added user safety. The patented ANSELL GRIP technology ensures that the coating polymer does not penetrate the liner during manufacture. The coating is therefore consistent and sound, significantly reducing the likelihood of chemical leakage onto the skin.
- AlphaTec models with white nylon liner are recommended for indoor applications, whereas AlphaTec models with black acrylic liner are recommended for outdoor applications.

#### Industries

- Automotive & transportation
- · Agriculture & viticulture
- Building & construction
- Chemical
- Machinery & equipment
- Maintenance
- Metal fabrication

## **Applications**

- Aerospace
- · Agrochemicals
- Chemical handling
- Chemical handling, especially caustics and solvents
- Emergency services
- Handling objects coated in grease and oils
- Maintenance
- Mining
- Printing industry
- · Refining Oil & Petrol

# 58-530B 58-530W

Unrivalled combination of chemical resistance, confident grip and a comfortable inner lining

#### **Performance Profile**

ANSELL GRIP technology, solid nitrile shell and availability of a longer cuff version.

#### **Key Features**

This unique combination of liquidproof chemical resistance and grip, together with flexibility and dexterity, makes the AlphaTec glove the logical choice when working with chemicals.

#### **Technologies**

#### **Performance Standards**

58-530B: 58-530W:

EN 407
