

**JBC C250428E**

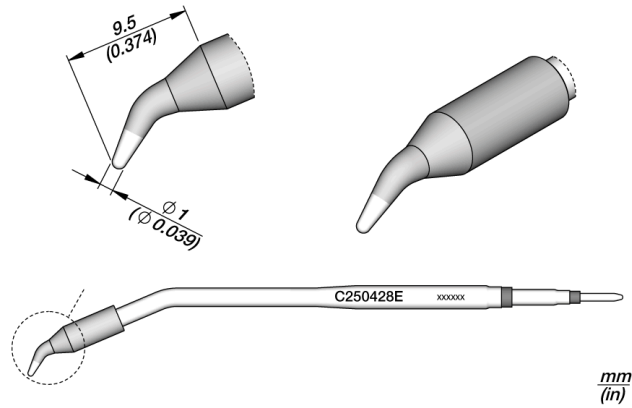

# Conical Bent Cartridge Ø 1

This cartridge has been designed with a thicker iron layer what makes this tip ideal for tough and repetitive works in mass production. A thicker iron layer reduces the thermal efficiency.

C250 cartridges have been specially designed to work with ALE250 Automatic-Feed Soldering Iron and AP250 Manual-Feed Soldering Iron

These cartridges can be aligned using the anti-rotation screw incorporated on the tool.

They last 5 times longer than other brands thanks to Intelligent Heat Management.
