

ABI working island basic

With perforated metal plate wall for use on both sides

Application:

For accommodating tools, auxiliary material and utensils in the smallest possible area.

Execution:

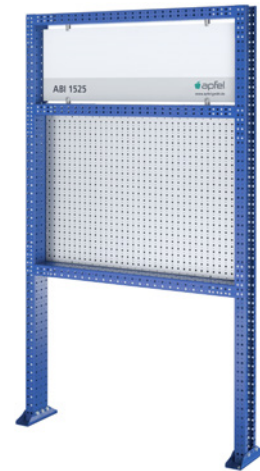

- Frame made of 3 mm thick steel sheet, only 140 mm deep
- Perforated metal sheet wall with 10 x 10 mm square holes, 38 mm axis distance from hole centre to hole centre
- For add-on and equipment modules for individual equipping of the working islands see from no. 50238 886

Advantage:

- With the help of the versatile add-on and set-up modules, the workstations can be equipped individually on the basis of their operational requirements
- With the help of suitable holders and adapters, you mount all modules quickly and easily on the workstations and thus create an efficient, space-saving functional unit for optimisation of your production processes

Delivery:

Includes: Mounting feet set for anchoring to floor, double-sided perforated metal plate (rear can also be used)

Art. no.	50238 851
Brand	APFEL
Manufacturer Part Number	2332471
Model	1525 Basic
Width	1490 mm
Depth	140 mm
Height	2500 mm
Perforated plate width	1350 mm
Perforated plate height	900 mm
Punched-hole	10 x 10 mm
Distance between centre of hole and centre of hole	38 mm
Equipped	No
Material	Sheet steel
Material thickness	3 mm
Colour of frame	Gentian blue RAL 50 10
Surface	Powder-coated
Gross Weight	110.000 kg
Product Group	586
