

Ring Illuminator

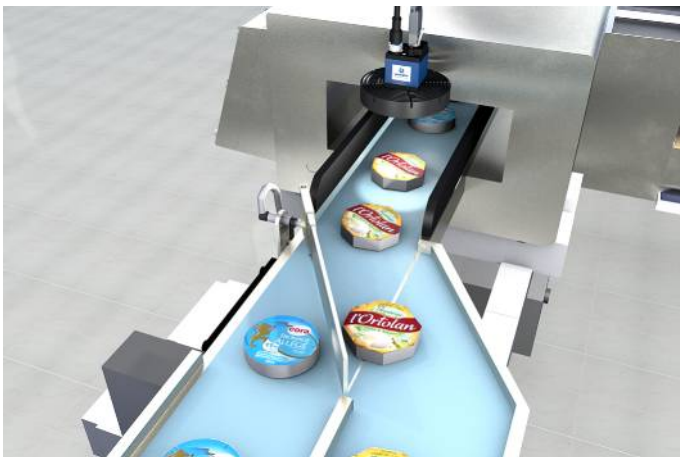

ZVZF100

Part Number

- Can be mounted together with a Smart Camera or a digital camera
- Continuous mode or flash mode synchronized with the camera
- Homogenous and very bright illumination without shadows

wenglor ring lights are ideally suited for uniform illumination. Thanks to 360° annular floodlighting, shadows can be reduced and image quality can thus be improved. They can be operated in the continuous mode, or synchronized to the camera in the flash mode. The rugged housing with IP67 protection and common mounting together with Smart Cameras or digital cameras simplify integration into existing systems and generate lots of elbowroom for new system concepts.
