

Omniflex Arm EA1126

Our Omniflex arm EA1126 provides you with a fume capture envelope you always have been looking for.

With a size of **350 x 212 mm** the new hood is ideal when soldering on large boards or collecting fumes from solder pots.

The hood swivels and turns in every direction and stays put where ever you position it.

Versatility - you have never had before

You can position the hood at an angle above the board.

Drop the edge of the hood onto the table and the "coanda" effect will extend the extraction range significantly.

Or shorten the length of the Omniflex arm and convert the hood into a traditional bench top plenum.
