

# A2 Stainless Steel to offer excellent corrosion resistance in wet & dry and in extreme hot/cold conditions.

- Very sharp 25° point with the thread running to the end allowing immediate starting. No need to 'pre-start'.
- The sharp, wide, deep thread penetrates into all timbers WITHOUT a pilot hole, giving exceptional pull-out.
- The invisible Reisser lubricant helps the screw drive in quickly and easily.
- Available in full thread (primarily for board materials) or part thread (primarily for pulling two pieces of timber together tight).
- The re-inforced collar under the head gives additional support to prevent snapping.
- The collar also allows a wide, deep pozi to be inserted. This reduces the risk of the bit jumping out and rounding off the edges.
- Each batch checked thoroughly to guarantee 'consistency of quality'.
