

Weighing table YPS-03

for laboratory and analysis scales

Application:

For more accurate weighing results - suitable for all KERN analytical scales with overall dimensions $\leq W \times D$ 400x450 mm

Execution:

- The KERN YPS-03 weighing table is designed to absorb shocks and vibrations that would otherwise falsify the weighing result
- The YPS-03 weighing table consists of: - a 24 kg polished granite stone plate, which is stored on absorbent rubber elements and serves as a stand for the analytical scales - a workbench whose worktop surrounds the stone plate and offers many storage possibilities. The stable aluminium profile frame has four height-adjustable feet, with the help of which the weighing table can be levelled precisely in case of any ground unevenness
- The weighing table has been ergonomically optimised and can be operated while standing or comfortably sitting. The recess at the front of the table provides enough space for seating and for the operator of the scales without touching the weighing table
- All surfaces are hygienic and easy to clean
- for absorbing shocks and vibrations

Art. no.	48101 010
Brand	KERN
Manufacturer Part Number	YPS-03
Length x width x height	800 x 600 x 785 mm
Weight	46 kg
Gross Weight	63.500 kg
Product Group	447

EAN

404576109726 1
