

Features

Mounting Bracket

- Spring steel to maintain traction
- Packed in manageable quantities
- Various mounting options for easy handling
- Replaces fastening from below
- Perfect attachment for RACM1200-V

RAC-MB1

Mounting Bracket for RECOM AC/DC converters

Description

RAC-MB1 supports the mounting of power modules such as the RACM1200-V from above, with three to four screws each on the left and right of the long sides of the housing. Access from below through the mounting base plate is therefore not required, which is helpful in dense installations where a heavily used mounting plate for fastening various components makes subsequent access difficult. Various screw placement options facilitate assembly while aiding in heat transfer through the socket. This accessory is made from stainless spring steel for durable traction and comes packaged in handy quantities.

Compatible converters

Converter Series	Input Voltage Range [VAC]	nom. Output Voltages [VDC]	Converter Dimensions [mm]	Converter Link
RACM1200-V	85-264	24, 36, 48	228.0 x 96.2 x 40.0	RACM1200-V.pdf
