## SIEMENS

## Data sheet

## 3RV2031-4EA10-0BA0

Special type Circuit breaker size S2 for motor protection, CLASS 10 A-release 22...32 A N-release 416 A screw terminal Standard switching capacity Ambient temperature -50  $^\circ$ C 250 switching cycles

Fi	gu	re	si	mi	ar

product brand name	SIRIUS
product designation	Circuit breaker
design of the product	For motor protection
product type designation	3RV2
General technical data	
size of the circuit-breaker	S2
size of contactor can be combined company-specific	S2
product extension auxiliary switch	Yes
power loss [W] for rated value of the current	
<ul> <li>at AC in hot operating state</li> </ul>	18 W
<ul> <li>at AC in hot operating state per pole</li> </ul>	6 W
insulation voltage with degree of pollution 3 at AC rated value	690 V
surge voltage resistance rated value	6 kV
shock resistance according to IEC 60068-2-27	25g / 11 ms Sinus
mechanical service life (operating cycles)	
<ul> <li>of the main contacts typical</li> </ul>	250
<ul> <li>of auxiliary contacts typical</li> </ul>	250
electrical endurance (operating cycles) typical	250
reference code according to IEC 81346-2	Q
Substance Prohibitance (Date)	10/15/2014
Ambient conditions	
installation altitude at height above sea level maximum	2 000 m
ambient temperature	
during operation	-50 +60 °C
during storage	-50 +80 °C
during transport	-50 +80 °C
relative humidity during operation	10 95 %
Main circuit	
number of poles for main current circuit	3
adjustable current response value current of the current- dependent overload release	22 32 A
operating voltage	
rated value	20 690 V
• at AC-3 rated value maximum	690 V
operating frequency rated value	50 60 Hz
operational current rated value	32 A
operational current	
• at AC-3 at 400 V rated value	32 A
operating power	

• at AC-3	
— at 230 V rated value	7.5 kW
— at 400 V rated value	15 kW
— at 500 V rated value	18.5 kW
— at 690 V rated value	30 kW
operating frequency	
• at AC-3 maximum	15 1/h
Auxiliary circuit	
number of NC contacts for auxiliary contacts	0
number of NO contacts for auxiliary contacts	0
Protective and monitoring functions	
product function	
<ul> <li>ground fault detection</li> </ul>	No
phase failure detection	Yes
trip class	CLASS 10
design of the overload release	thermal
maximum short-circuit current breaking capacity (lcu)	
• at AC at 240 V rated value	50 kA
• at AC at 400 V rated value	50 kA
• at AC at 500 V rated value	10 kA
at AC at 690 V rated value	4 kA
operating short-circuit current breaking capacity (Ics) at AC	
• at 240 V rated value	25 kA
• at 400 V rated value	25 kA
• at 500 V rated value	5 kA
at 690 V rated value	2 kA
response value current of instantaneous short-circuit trip unit	416 A
Short-circuit protection	
product function short circuit protection	Yes
design of the short-circuit trip design of the fuse link for IT network for short-circuit	magnetic
protection of the main circuit	
• at 240 V	none required
• at 400 V	gG 125 A
• at 500 V	gG 100 A
• at 690 V	gG 80 A
Installation/ mounting/ dimensions	
mounting position	any
fastening method	screw and snap-on mounting onto 35 mm DIN rail according to DIN EN 60715
height	140 mm
height width	140 mm 55 mm
height width depth	140 mm
height width depth required spacing	140 mm 55 mm 149 mm
height         width         depth         required spacing         • with side-by-side mounting at the side	140 mm 55 mm
height         width         depth         required spacing         • with side-by-side mounting at the side         • for grounded parts at 400 V	140 mm 55 mm 149 mm 0 mm
height         width         depth         required spacing         • with side-by-side mounting at the side         • for grounded parts at 400 V         — downwards	140 mm 55 mm 149 mm 0 mm 50 mm
height         width         depth         required spacing         • with side-by-side mounting at the side         • for grounded parts at 400 V         — downwards         — upwards	140 mm 55 mm 149 mm 0 mm 50 mm 50 mm
height         width         depth         required spacing         • with side-by-side mounting at the side         • for grounded parts at 400 V         — downwards         — upwards         — at the side	140 mm 55 mm 149 mm 0 mm 50 mm
height         width         depth         required spacing         • with side-by-side mounting at the side         • for grounded parts at 400 V         — downwards         — upwards         — at the side         • for live parts at 400 V	140 mm 55 mm 149 mm 0 mm 50 mm 50 mm 10 mm
height         width         depth         required spacing         • with side-by-side mounting at the side         • for grounded parts at 400 V         — downwards         — upwards         — at the side         • for live parts at 400 V         — downwards         — at the side         • for live parts at 400 V         — downwards	140 mm 55 mm 149 mm 0 mm 50 mm 50 mm 10 mm
height         width         depth         required spacing         • with side-by-side mounting at the side         • for grounded parts at 400 V         — downwards         — upwards         — at the side         • for live parts at 400 V         — downwards         — upwards         — upwards         — upwards         — upwards         — upwards         — upwards	140 mm 55 mm 149 mm 0 mm 50 mm 50 mm 10 mm 50 mm 50 mm
height         width         depth         required spacing         • with side-by-side mounting at the side         • for grounded parts at 400 V         — downwards         — upwards         — at the side         • for live parts at 400 V         — downwards         — at the side         • for live parts at 400 V         — downwards         — upwards         — upwards         — upwards         — upwards         — at the side	140 mm 55 mm 149 mm 0 mm 50 mm 50 mm 10 mm
height         width         depth         required spacing         • with side-by-side mounting at the side         • for grounded parts at 400 V         — downwards         — upwards         — at the side         • for live parts at 400 V         — downwards         — at the side         • for live parts at 400 V         — downwards         — upwards         — upwards         — out the side         • for grounded parts at 500 V	140 mm 55 mm 149 mm 0 mm 50 mm 50 mm 10 mm 50 mm 50 mm 10 mm
height         width         depth         required spacing         • with side-by-side mounting at the side         • for grounded parts at 400 V         — downwards         — upwards         — at the side         • for live parts at 400 V         — downwards         — at the side         • for live parts at 400 V         — downwards         — upwards         — upwards         — at the side         • for grounded parts at 500 V         — downwards	140 mm 55 mm 149 mm 0 mm 50 mm 50 mm 10 mm 50 mm 50 mm 50 mm 50 mm
height         width         depth         required spacing         • with side-by-side mounting at the side         • for grounded parts at 400 V         — downwards         — upwards         — at the side         • for live parts at 400 V         — downwards         — at the side         • for live parts at 400 V         — downwards         — upwards         — at the side         • for grounded parts at 500 V         — downwards         — upwards	140 mm 55 mm 149 mm 0 mm 50 mm 50 mm 10 mm 50 mm 50 mm 50 mm 50 mm
height         width         depth         required spacing         • with side-by-side mounting at the side         • for grounded parts at 400 V         — downwards         — upwards         — at the side         • for live parts at 400 V         — downwards         — at the side         • for live parts at 400 V         — downwards         — upwards         — at the side         • for grounded parts at 500 V         — downwards         — upwards         — at the side         • for grounded parts at 500 V         — downwards         — upwards         — upwards         — upwards         — upwards         — upwards         — at the side	140 mm 55 mm 149 mm 0 mm 50 mm 50 mm 10 mm 50 mm 50 mm 50 mm 50 mm
height         width         depth         required spacing         • with side-by-side mounting at the side         • for grounded parts at 400 V         — downwards         — upwards         — at the side         • for live parts at 400 V         — downwards         — upwards         — at the side         • for grounded parts at 500 V         — downwards         — upwards         — at the side         • for grounded parts at 500 V         — downwards         — upwards         — at the side         • for grounded parts at 500 V         — downwards         — upwards         — at the side         • for live parts at 500 V	140 mm 55 mm 149 mm 0 mm 50 mm 50 mm 10 mm 50 mm 50 mm 50 mm 10 mm
