The TST Group Worldwide

Founded over 30 years ago, we now have a Production Facility that occupies over 11.700 sq m. Our broad range of products are designed, manufactured and constantly developed under the same roof, to meet the needs of our Worldwide Customers.

tst is fully integrated manufacturer of quick connect/disconnect couplings, for hydraulic, pneumatic, vacuum, gas, chemical fluid and water applications, in addition to multi couplers, fittings, hoses and accessories.

The latest technologies are utilized to Manufacture and Assembly our wide range of products to the required specifications to achieve Zero Defects and 100% Delivery Performance.

DE

Die TST Gruppe weltweit

Gegründet vor 30 Jahren verfügen wir mittlerweile über eine Produktionskapazität auf Basis modernster CNC Technik auf über 11.700m² Fläche. Um die Ansprüche unserer weltweiten Kunden zu erfüllen, sind Entwicklung und Produktion am gleichen Standort eng miteinander verbunden.

tst ist ein Hersteller von Schnellverschlusskupplungen für die Bereiche Hydraulik, Pneumatik, Vakuum, Gas, chemische Anwendungen, sowie Wasserapplikationen. Dies umfasst sowohl Einzelkupplungen als auch Multikupplungen, Verbindungselemente, Schläuche und Zubehör.

Um bei unserer breiten Angebotsvielfalt sowohl in der Herstellung als auch in der Montage absolute Liefertreue bei einer Fehlerquote von 0 ppm zu erreichen greifen wir auf modernste Fertigungsmethoden, langjährige Mitarbeitererfahrungen und einen sehr jungen Maschinenpark (vornehmlich CNC Technik) zurück.

FOR INDUSTRIAL CONNECTIONS

FR

TST, un groupe international

La Société TST fondée depuis plus de 30 ans dispose d'un site de fabrication de plus de 11.700m² où l'ensemble des produits sont dessinés, fabriqués et où le service développement est sans cesse à l'écoute des clients.

tst dispose de l'ensemble des produits coupleurs rapide comme le coupleur air, eau industrie ainsi que les coupleurs spéciaux "plasturgie" ou "hydraulique" ainsi que les gammes multi-connecteurs, manifolds, tubes, colliers et accessoires.

Toutes les technologies à la pointe de la technique sont utilisées sur toutes les phases de conception et production afin de vous assurer 100% de satisfaction quant à la performance des produits.

NL

TST, een wereldwijde organisatie

30 jaar geleden werd TST opgericht, inmiddels beschikken we over een productiefaciliteit die meer dan 11.700m² in beslag neemt.

Om te kunnen voldoen aan de behoeftes van onze wereldwijde klanten wordt ons brede assortiment aan producten onder één dak ontworpen, geproduceerd en doorontwikkeld.

tst is producent van snelkoppelingen, voor hydraulische, pneumatische, gas, vacuüm, chemische vloeistoffen en water-gerelateerde toepassingen. Daarnaast produceert TST ook enkele koppelingen, meervoudige koppelingen, verbindingselementen, fittingen, slangen en overige toebehoren.

Swing Couplings SC

Product Chart

EN

Safely swing to connect

With full flow. No force required or loss of pressure in the system. Just a turn and the air vent ensures that the hose is ventilated – thus rendering it harmless.

TST Swing Couplings SC are available in nominal sizes DN6 to DN19 and in different models. They are compatible with most popular plug systems. The many different types and models and a wide choice of seals and lubricants mean that TST Couplings are suitable for numerous applications throughout industry. Durability, reliability, simple and safe handling are features of all TST Swing Couplings.

TST Swing Couplings fulfill all the requirements of current quality standards and have also been awarded a type examination certificate from the Swiss Accident Insurance Institute SUVA.

DE

Jederzeit gefahrlos kuppeln durch Schwenken

Mit vollem Durchgang. Ohne Kraftaufwand und Druckabfall im System. Nur ein Schwenk und der ausgekuppelte Schlauch wird dank Entlüftungsbohrung sofort drucklos und damit gefahrlos.

TST Schwenk-Kupplungen SC sind in Nennweiten von DN6 bis DN19 und in verschiedenen Ausführungen erhältlich. Kompatibel mit allen gängigen Stecknippelsystemen. Dank einer Auswahl an Spezialdichtungen und Schmiermitteln eignen sich TST Schwenk-Kupplungen für vielfältige Anwendungen in allen Branchen und Bereichen.

Lange Lebensdauer, Zuverlässigkeit, einfache und sichere Handhabung sind die Merkmale aller TST Schwenk-Kupplungen. TST Schwenk-Kupplungen erfüllen sämtliche Anforderungen heute gültiger Qualitätsnormen und verfügen über die Baumusterbescheinigung der Schweiz. Unfallversicherungsanstalt SUVA.

FR

Accouplement sans risque par pivotement

Passage intégral. Sans effort ni perte de pression dans le circuit. Un simple pivotement et le tuyau est instantanément hors pression (grâce à l'évent de purge) et donc sans danger.

Les coupleurs pivotants SC TST sont livrables en diamètres nominaux de DN6 à DN19 et en différentes exécutions. Ils sont compatibles avec la plupart des systèmes d'about existant sur le marché. Grâce à un choix étendu de joints spéciaux et de lubrifiants, les coupleurs pivotants TST sont adaptés à de nombreuses applications dans tous les secteurs industriels.

Longévité, fiabilité, manipulation simple et sûre sont les caractéristiques des coupleurs pivotants TST. Les coupleurs pivotants TST répondent à toutes les exigences actuelles en matière de qualité et ont obtenu l'attestation de type de la caisse nationale suisse d'assurance en cas d'accidents SUVA.

NL

Altijd zonder gevaar aan- en afkoppelen door te knikken

Met volledige doorlaat. Zonder krachtsinspanning en drukval in het systeem. Slechts één knik en de te ontkoppelen slang wordt dankzij het ontluftingsgat meteen drukloos, en daarmee ongevaarlijk.

TST knikkoppelingen SC zijn in de doorlaten DN6 tot en met DN19 en in verschillende uitvoeringen verkrijgbaar. Uitwisselbaar met de meeste gangbare insteeknippelsystemen. Dankzij de keuze aan speciale afdichtingen en smeermiddelen zijn de TST knikkoppelingen geschikt voor veel verschillende toepassingen in allerlei bedrijfstakken.

Lange levensduur, betrouwbaarheid, eenvoudige en veilige bediening vormen het handelsmerk van alle TST knikkoppelingen. TST knikkoppelingen voldoen aan alle huidige geldende eisen van kwaliteitsnormen en beschikken over het Arbeidsveiligheidsattest van de Zwitserse Ongevallenverzekeringinstelling SUVA.

Swing Couplings SC

Swing to Connect

Simple and quick connection with no force or loss of pressure in the system

EN

Connection

- Push suitable plug into coupling and swing approximately 90° until the orange ring engages in the groove.

DE

Einkuppeln

- Passenden Stecknippel in die Kupplung einstecken und ca. 90° schwenken, bis der orange Ring in der vorgesehenen Nut einrastet.

FR

Accouplement

- Engager l'about adapté dans le coupleur et le pivoter d'environ 90° jusqu'à ce que le barillet soit bloqué par l'ergot de la bague orange.

NL

Aankoppelen

- Een passende insteeknippel in de koppeling steken en ca. 90° knikken, tot de oranje ring in de daarvoor uitgespaarde borging klikt.

Full flow with no restrictions.

EN

Disconnection

- Pull back orange ring and swing plug to stop. Remove plug from coupling.

DE

Auskuppeln

- Orangen Ring zurückstossen und Stecknippel bis zum Anschlag schwenken, Stecknippel aus der Kupplung ziehen.

FR

Désaccouplement

- Tirer la bague orange vers l'arrière pour dégager le barillet et pivoter l'about jusqu'au point de butée, puis désengager l'about du barillet.

NL

Afkoppelen

- De oranje ring terugschuiven en de insteeknippel tot de aanslag terugknikken, de insteeknippel uit de koppeling trekken.

EN

Disconnection

- In order to prevent the hose from ejecting dangerously, the plug must be held in the hand until the hose is completely ventilated.

DE

Auskuppeln

- Um ein gefährliches Rückschlagen des Schlauches zu vermeiden, muss der Stecknippel so lange in der Hand gehalten werden, bis der Schlauch vollständig entlüftet ist.

FR

Désaccouplement

- Pour éviter un coup de fouet du tuyau, il convient de garder l'about en main jusqu'à ce que le tuyau soit entièrement purgé.

NL

Afkoppelen

- Om een gevaarlijke terugslag van de slang te vermijden, moet de insteeknippel in de hand gehouden worden tot de slang volledig ont- lucht is.

Swing Couplings SC

Swing to Connect

More efficient, low energy consumption and safe

EN

The new generation of TST Couplings, the valveless SC coupling model—result of innovative development and many years of experience—free flow guaranteed in every case. When using compressed air operated equipment, for instance, in conjunction with TST Swing Couplings SC, the result will always be a method of operation which is more efficient with low energy consumption, thus making it very economical.

Application

Throughput media

Compressed air, gases, liquids and media with low to medium viscosity due to free flow with no restrictions. Easy to clean.

DE

Die neue TST Kupplungs-Generation, des ventillosen Kupplungs-Typs SC ist das Ergebnis innovativer Entwicklung und langjähriger Erfahrung und garantiert in jedem Fall vollen Durchgang. So ist z.B. beim Betrieb druckluftbetriebener Geräte in Verbindung mit TST Schwenk-Kupplungen SC eine effizientere, energiesparendere und somit wirtschaftlichere Wirkungsweise die Folge.

Anwendungsbereich

Durchflussmedien

Druckluft, Gase, Flüssigkeiten und Medien mit niedriger bis mittlerer Viskosität dank freiem Durchgang ohne Umlenkung. Leicht zu reinigen.

FR

La nouvelle génération des coupleurs TST, les coupleurs pivotants SC sans valve – résultat d'un développement innovant et de nombreuses années d'expérience – garantit dans tous les cas un passage intégral. Ainsi l'utilisation d'un outillage pneumatique connecté au réseau par l'intermédiaire d'un coupleur pivotant SC TST se révèle-t-elle plus efficace, économe en énergie, et par conséquent plus rentable.

Domaine d'application

Fluides véhiculés

Air comprimé, gaz, liquides et substances de viscosité faible à moyenne grâce au passage libre sans déviation du flux. Facile à nettoyer.

NL

Het resultaat van innovatieve ontwikkeling en jarenlange ervaring is de nieuwe generatie TST koppelingen, het SC type zonder klep – deze garandeert bij ieder gebruik een volledige doorlaat. Zo ontstaat bij het gebruik van b.v. luchtgereedschap verbonden door de TST knikkoppeling SC een werkwijze die efficiënter, energiebesparend en daarmee ook economisch verantwoord is.

Toepassingsgebied

Doorstroommedia

Drukluft, gassen, vloeistoffen en media met lage tot gemiddelde viscositeit dankzij een vrije doorlaat zonder omleiding. Gemakkelijk te reinigen

Choice of couplings and seals according to throughput media

This information is not binding and is based on the recommendations as made by the manufacturers of the seals.

The abbreviations mean:

- SC = Couplings SC
- SV 'R' = Couplings SV stainless steel
- NBR = Nitrile elastomer
- FPM = Fluorine elastomer
- EPDM = Ethylene-propylene elastomer

Excellent Seal

Even small leaks can lead to big losses and they can also cause serious accidents.

It has been shown that in the case of compressed air, leaking couplings account for an energy loss of 8-15%.

Japanese Profile

Not suitable for knocking, pulsating and vibrating compressed air tools

EN

Features

- Full flow, negligible loss of pressure
- Simple operation, no force required
- Compact design
- Light weight 75 g

DE

Auf einen Blick

- Voller Durchgang, geringer Druckverlust
- Einfache Bedienung ohne Kraftaufwand
- Kompakte Bauform
- Geringes Gewicht 75 g

FR

En bref

- Passage intégral, faible perte de pression
- Maniement simple et sans efforts
- Construction compacte
- Léger 75 g

NL

In een oogopslag

- Volledige doorlaat, weinig drukverlies
- Eenvoudige bediening, zonder krachtsinspanning
- Compact ontwerp
- Weegt weinig 75 g

Quick Action Couplings SV

Safe, quick, reliable

EN

TST Quality Features

Robust coupling

Made from high quality material with the utmost precision, TST Quick Action Couplings can withstand even the heaviest of loads. The two parts fitting together are made of high quality material. The precise fitting guarantees the hold. As the adaptor is firmly positioned any pressure operating from the sides will be totally absorbed.

Precision Adaptor

The adaptor is made from high quality steel and processed to register tolerance. Its long guides ensure that the TST adaptor does not disturb the seal. In combination with the housing this results in a connection with hardly any abrasion.

Heavy Duty Range

These have extremely thick walls and are made from high quality materials. They were especially developed for extremely tough operating conditions, such as exist in mining, building, heavy industries and the railways.

DE

TST Qualitätsmerkmale

Robuste Kupplung

Aus hochwertigem Material mit grösster Präzision gefertigt, widerstehen TST Schnellverschluss-Kupplungen auch stärksten Belastungen. Zwei, aus dem vollen Material präzise gefertigte Führungen garantieren einen optimalen Sitz und verhindern das Verkanten des Stecknippels im Dichtungsbereich, dadurch werden die auf den Stecknippel einwirkenden seitlichen Kräfte voll aufgefangen.

Passgenauer Stecknippel

Der Stecknippel wird aus hochwertigem Stahl hergestellt und auf Passmass bearbeitet. Der TST Stecknippel schont dank seiner langen Führung die Dichtung zusammen mit dem Gehäuse ergibt sich eine praktisch verschleissfreie Verbindung.

Schwere Reihe

Verfügt über extrem dicke Wandstärken, ist aus hochwertigem Material gefertigt und wurde speziell für extrem rauhe Betriebsverhältnisse entwickelt – z.B. Tiefbau, Schwerindustrie, Schienenfahrzeuge.

FR

La qualité TST

Des coupleurs robustes

Usinés avec précision dans la masse de matériaux de haute qualité, les coupleurs rapides TST résistent même aux charges les plus élevées. Les deux guides sont usinés de façon à ce qu'aucune déviation de l'about de raccordement ne puisse se produire à proximité des joints, garantissant ainsi une étanchéité impeccable. De ce fait, les forces latérales exercées sur l'about de raccordement sont entièrement absorbées.

Des abouts de raccordement parfaitement ajustés

Les abouts de raccordement TST, usinés dans la masse de matériaux hautement résistants, sont rectifiés avec le plus grand soin. Leur guidage particulièrement long protège le joint. L'ensemble avec le corps du coupleur est pratiquement inusable.

Les coupleurs "série lourde"

Ces coupleurs aux parois particulièrement épaisses et usinés à partir de matériaux hautement résistants ont été spécialement développés pour servir dans des conditions extrêmes, par exemple: mines, industrie lourde, véhicules sur rails, etc.

NL

TST kwaliteitskenmerken

Robuuste koppeling

Omdat ze met grote precisie uit hoogwaardig materiaal zijn geproduceerd, zijn TST snelkoppelingen ook tegen de zwaarste belasting bestand. De twee in elkaar passende delen zijn uit vol materiaal vervaardigd. Optimale precisie garandeert het houvast. De insteeknippel kan zich niet verplaatsen in het dichtingsbereik waardoor zijwaartse krachten volledig worden opgevangen zonder de dichting te beschadigen.

Precies passende insteeknippel

De insteeknippel wordt uit hoogwaardig staal op maat gemaakt. De lengte van de TST insteeknippel spaart de afdichting – in combinatie met de afdichting is de verbinding bijna vrij van slijtage.

Zware uitvoering

Deze uitvoering beschikt over een enorm grote wanddikte en wordt vervaardigd uit hoogwaardig materiaal. Hij is speciaal ontwikkeld voor extreem ruwe omstandigheden – bijv. voor bouwwerken, zware industrie en spoorwegen.

EN

Features

- Safety feature: 2-stage-disconnection

Application

Compressed air supply, pneumatic tools – e.g. equipment manufacturing, measurement and control technology.

Procedure

Connection

Push plug into coupling until it is heard to engage by a click.

Disconnection

The plug is disconnected by turning the release ring to the left. It is held back by the safety catch, until the hose is ventilated. The plug can only be released by turning the release ring to the right.

DE

Auf einen Blick

- Sicherheitsmerkmal: 2-Stufen-Entkupplung

Anwendungsbereich

Druckluftversorgung, pneumatische Werkzeuge, z.B. Maschinen- und Apparatebau, Mess-, Steuer- und Regeltechnik.

Handhabung

Einkuppeln

Stecknippel in Kupplung eindrücken bis er hörbar einrastet.

Auskuppeln

Durch Linksdrehung des Auslöserings wird der Stecknippel ausgekuppelt, jedoch von der Sicherheitsklinke zurückgehalten, bis der Schlauch entlüftet ist. Erst nach Rechtsdrehung des Auslöserings wird der Stecknippel freigegeben.

FR

En bref

- Caractéristique de sécurité: désaccouplement en 2 temps

Domaine d'application

Alimentation en air comprimé, outils pneumatiques, par exemple construction de machines et d'appareils, technique de mesurage, commande et réglage.

Manipulation

Accouplement

Introduire l'about de raccordement dans le coupleur jusqu'au dé clic audible.

Désaccouplement

Un mouvement à gauche de la bague de déclenchement dégage l'about de raccordement qui cependant restera retenu par le cliquet de sécurité jusqu'à ce que le tuyau soit purgé. Ce n'est qu'en tournant la bague de déclenchement vers la droite que l'about de raccordement sera entièrement dégage.

NL

In een oogopslag

- Veiligheidskenmerk: 2-traps ontkoppeling

Toepassingsgebied

Persluchttoevoer, pneumatisch gereedschap – bijv. voor montage van apparaten, voor meet-, stuur- en regeltechniek.

Gebruik

Koppelen

Insteeknippel in de koppeling drukken tot hij hoorbaar pakt.

Ontkoppelen

Door de ontkoppeling linksom te draaien wordt de insteeknippel ontkoppeld. De zekerheidspal houdt hem echter tegen tot de slang ontlucht is. Pas nadat de ring rechtsom gedraaid is kan de insteeknippel eruit getrokken worden.

SV 2-Stage

DN11

Heavy-Duty Range

ISO 4414 EN 983

EN Features

- Extremely robust model
- Safety feature: 2-stage-disconnection

Application
For extremely rough operating conditions, e.g. refinery, offshore, building sites and shipyards.

Procedure

Connection
Push plug into coupling and turn it to the right until the mechanism is heard to engage by a click.

Disconnection
Turn plug to the left while simultaneously gently pulling back the release ring. The plug is withheld from ejecting by the safety chamber and can only be released by another 90° turn to the left or to the right.

DE Auf einen Blick

- Extrem robuste Ausführung
- Sicherheitsmerkmal: 2-Stufen-Entkupplung

Anwendungsbereich
Für extrem raue Bedingungen, z.B. Raffinerie, Offshore, Bau- und Schiffsbauindustrie.

Handhabung

Einkuppeln
Stecknippel in Kupplung einführen, nach rechts drehen bis der Mechanismus hörbar einrastet.

Auskuppeln
Stecknippel nach links drehen und gleichzeitig den Auslösering leicht nach hinten ziehen. Der Stecknippel wird beim Ausstoss von der Sicherheitskammer aufgefangen und erst nach einer weiteren Links- oder Rechtsdrehung um 90° freigegeben.

FR En bref

- Exécution extrêmement robuste
- Caractéristique de sécurité: désaccouplement en 2 temps

Domaine d'application
Pour des conditions extrêmement rudes, par exemple raffineries, "offshore", industrie du bâtiment et de la construction navale.

Manipulation

Accouplement
Introduire l'about de raccordement dans le coupleur et le tourner vers la droite jusqu'au déclic audible du mécanisme.

Désaccouplement
Tourner l'about de raccordement vers la gauche et en même temps tirer la bague de déclenchement légèrement vers l'arrière. L'about de raccordement est toutefois retenu dans la chambre de sécurité et seulement libéré après une rotation de 90° vers la gauche ou vers la droite.

NL In een oogopslag

- Extrem robuuste uitvoering
- Veiligheidskenmerk: 2-traps ontkoppeling

Toepassingsgebied
Voor extreem zware omstandigheden, bijv. raffinaderijen, offshore, bouw en scheepsbouw.

Gebruik

Koppelen
Insteeknippel in koppeling duwen, naar rechts draaien tot het mechanisme hoorbaar pakt.

Ontkoppelen
Insteeknippel naar links draaien en gelijktijdig de ontkoppelingring licht naar onder trekken. De insteeknippel wordt door de veiligheidskamer van uitstoot weerhouden, en kan pas uit de koppeling getrokken worden na nog een 90° slag naar links of rechts.

EN Features

- Mixing of different media impossible, as connection is only possible with plug with identical key profile
- Safety feature: 2-stage-disconnection

Application
Chemical industry, medical technology, refinery and to eliminate danger of wrong line connections.

Procedure Connection
Push plug into coupling with matching key profile until it is heard to engage by a click.

Disconnection
The plug is disconnected by turning the release ring to the left. It is held back by the safety catch, until the hose is ventilated. The plug can only be released by turning the release ring to the right.

DE Auf einen Blick

- Verwechslungen verschiedener Medien ausgeschlossen, da nur mit Stecknippel mit gleichem Schlüssel zu betätigen.
- Sicherheitsmerkmal: 2-Stufen-Entkupplung

Anwendungsbereich
Chemische Industrie, Medizintechnik, Raffinerie, bei Verwechslungsgefahr.

Handhabung Einkuppeln
Stecknippel mit gleichem geometrischem Schlüssel in entsprechende Kupplung eindrücken bis er hörbar einrastet.

Auskuppeln
Durch Linksdrehung des Auslöserings wird der Stecknippel ausgekuppelt, jedoch von der Sicherheitsklinke zurückgehalten, bis der Schlauch entlüftet ist. Erst nach Rechtsdrehung des Auslöserings wird der Stecknippel freigegeben.

FR En bref

- Intersersion de différents fluides exclue par l'appariement du coupleur avec son about de raccordement
- Caractéristique de sécurité: désaccouplement en 2 temps

Domaine d'application
Industrie chimique, technique médicale, raffineries et là où il y a risque d'intersersion.

Manipulation Accouplement
Introduire l'about de raccordement dont la clé est identique à celle du coupleur jusqu'au déclic audible.

Désaccouplement
Un mouvement à gauche de la bague de déclenchement dégage l'about de raccordement qui cependant restera retenu par le cliquet de sécurité jusqu'à ce que le tuyau soit purgé. Ce n'est qu'en tournant la bague de déclenchement vers la droite que l'about de raccordement sera entièrement dégagé.

NL In een oogopslag

- Verwisseling van verschillende stoffen uitgesloten, omdat slechts gekoppeld kan worden met een insteeknippel met eenzelfde sleutel.
- Veiligheidskenmerk: 2-traps ontkoppeling

Toepassingsgebied
Chemische industrie, medische techniek, raffinaderij, bij verwisselingsgevaar.

Gebruik Koppelen
Onverwisselbare insteeknippel in de koppeling met bijbehorende sleutel drukken tot hij hoorbaar pakt.

Ontkoppelen
Door de ontkoppeling linksom te draaien wordt de insteeknippel ontkoppeld. De zekerheidspal houdt hem echter tegen tot de slang ontlucht is. Pas nadat de ring rechtsom gedraaid is kan de insteeknippel eruit getrokken worden.

SV 1-Stage

DN11

Non-interchangeable Heavy-Duty Range

EN

Features

- No wrong line connections thanks to differently arranged mating cams in the couplings and corresponding grooves in the plugs
- 1-Stage disconnection
- Robust Version

Application

Chemical industry, medical technology, refinery and to eliminate danger of wrong line connections.

Procedure

Connection

Push plug into coupling and turn it to the right until the mechanism is heard to engage by a click.

Disconnection

Turn plug to the left while simultaneously gently pulling back the release ring.

DE

Auf einen Blick

- Verwechslung verschiedener Medien ausgeschlossen, da unterschiedlich versetzte Nocken in der Kupplung und entsprechende Nuten an den Stecknippeln
- 1-Stufen-Entkupplung
- Robuste Ausführung

Anwendungsbereich

Chemische Industrie, Medizintechnik, Raffinerie, bei Verwechslungsgefahr.

Handhabung

Einkuppeln

Stecknippel in Kupplung einführen, nach rechts drehen bis der Mechanismus hörbar einrastet.

Auskuppeln

Stecknippel nach links drehen und gleichzeitig den Auslösering leicht nach hinten ziehen.

FR

En bref

- Intersersion de différents fluides exclue par des ergots décalés dans le coupleur ainsi que des rainures identiquement décalées dans les bouts de raccordement
- Désaccouplement en 1 temps
- Exécution robuste

Domaine d'application

Industrie chimique, technique médicale, raffineries et là où il y a risque d'intersersion.

Manipulation

Accouplement

Introduire l'about de raccordement dans le coupleur et le tourner vers la droite jusqu'au déclic audible du mécanisme.

Désaccouplement

Tourner l'about de raccordement vers la gauche et en même temps tirer la bague de déclenchement légèrement vers l'arrière.

NL

In een oogopslag

- Verschillend geplaatste groeven in de koppeling en bijbehorende nokken aan de insteeknippel sluiten verwisseling van verschillende media uit
- 1-traps ontkoppeling
- Robuuste uitvoering

Toepassingsgebied

Chemische industrie, medische techniek, raffinaderij, bij verwisselingsgevaar.

Gebruik

Koppelen

Insteeknippel in koppeling duwen, naar rechts draaien tot het mechanisme hoorbaar pakt.

Ontkoppelen

Insteeknippel naar links draaien en gelijktijdig de ontkoppeling licht naar onder trekken.

DN6

with double function (Blow Gun)

ISO 6150

EN

Features

- The small shield on the safety blow gun directs the flow of air, protecting the eyes from breakaway particles without reducing the field of vision.
- 1-stage disconnection

Application

Compressed air supply, use as safety blow gun.

Procedure

Connection

Push plug or blow nozzle with 9 mm neck into coupling until it is heard to engage by a click and set amount of air supplied using the control lever.

Disconnection

Push in button and pull out plug or blow nozzle.

DE

Auf einen Blick

- Der durch das Schutzschild gesteuerte Luftvorhang der Sicherheitsblaspistole schützt die Augen vor losen Teilen ohne Einengung des Gesichtskreises.
- 1-Stufen-Entkupplung

Anwendungsbereich

Druckluftversorgung, Verwendung als Sicherheitsblaspistole.

Handhabung

Einkuppeln

Stecknippel oder Blasdüse mit 9 mm Ansatz in Kupplung eindrücken bis es hörbar einrastet. Luftmenge mit Steuerhebel dosierbar.

Auskuppeln

Knopf drücken und Stecknippel oder Blasdüse herausziehen.

FR

En bref

- Le rideau d'air créé par l'écran de la soufflette de sécurité protège les yeux de la projection vers l'arrière des copeaux et autres particules sans restreindre pour autant la périphérie de visibilité.
- Désaccouplement en 1 temps

Domaine d'application

Alimentation en air comprimé, utilisation en tant que soufflette de sécurité.

Manipulation

Accouplement

Introduire l'about de raccordement ou la busette avec bout de 9 mm dans le coupleur jusqu'au dé clic audible. Doser la quantité d'air à l'aide du levier de contrôle.

Désaccouplement

Appuyer sur le bouton et retirer l'about de raccordement ou la busette.

NL

In een oogopslag

- Het kleine schildje van het veiligheidsblaaspistool stuurt de luchtstroom zodat de ogen beschermd worden zonder dat het blikveld belemmerd wordt.
- 1-traps ont koppeling

Toepassingsgebied

Toevoer van perslucht, gebruik als veiligheidsblaaspistool.

Gebruik

Koppelen als snelkoppeling

Blaaspijp met een aanzet van 9 mm in koppeling drukken. Luchthoeveelheid doseren met de hevel.

Ontkoppelen als snelkoppeling

Op knop drukken en insteeknippel eruit trekken.

Choice of couplings and seals according to throughput media

This information is not binding and is based on the recommendations as made by the manufacturers of the seals.

The abbreviations mean:

- SV = Couplings SV steel
- 'R' = Couplings SV stainless steel
- NBR = Nitrile elastomer
- FPM = Fluorine elastomer
- EPDM = Ethylene-propylene elastomer

Stainless Steel Series Product Overview

EN Features

- Simple operation – minimal connection force needed
- Compact design
- Long service life – low maintenance
- Sterilizable (CIP)

Application

Compressed air and gas supply, measurement and control systems in:

- Machine and apparatus engineering
- Medical, chemical and pharmaceutical

Procedure

Connection

Push plug into coupling until it is heard to engage by a click.

Disconnection

Turn release ring to the left and pull out plug.

In order to prevent the hose from ejecting dangerously, the plug must be held in the hand until the hose is completely ventilated.

DE Auf einen Blick

- Einfache Bedienung – geringer Kraftaufwand
- Kompakte Bauform
- Hohe Standzeit – wartungsarm
- Sterilisierbar (CIP)

Anwendungsbereich

Druckluft- und Gasversorgung, Mess-, Steuer- und Regeltechnik, Automation in:

- Anlagenbau
- Medizinaltechnik, Chemie und Pharma

Handhabung

Einkuppeln

Stecknippel in Kupplung eindrücken bis er hörbar einrastet.

Auskuppeln

Auslösering nach links drehen und Stecknippel herausziehen.

Um ein gefährliches Rückschlagen zu vermeiden, muss der Stecknippel so lange in der Hand gehalten werden, bis der Schlauch vollständig entlüftet ist.

FR En bref

- Maniement simple et sans effort
- Forme compacte
- Durée de vie élevée – entretien minime
- Stérilisable (CIP)

Domaine d'application

Alimentation en gaz et en air comprimé, équipement de mesure, de pilotage, de réglage et d'automatisme par ex.:

- moyens de production
- technique médicale, chimie et pharmacie

Manipulation

Accouplement

Introduire l'about de raccordement dans le coupleur jusqu'au dé clic audible.

Désaccouplement

Tourner la bague de déclenchement vers la gauche et puis désengager l'about de raccordement.

Pour éviter un coup de fouet du tuyau, il convient de garder l'about en main jusqu'à ce que le tuyau soit entièrement purgé.

NL In een oogopslag

- Eenvoudig en zonder moeite te bedienen
- Compact ontwerp
- Duurzaam – onderhoudsarm
- Steriliseerbaar (CIP)

Toepassingsgebied

Perslucht- en gasvoorzieningen, meet- en regelsystemen:

- Installatiebouw
- Medische techniek, chemie en farmacie

Gebruik

Koppelen

Druk de insteeknippel in de koppeling totdat er hoorbaar een verbinding wordt gemaakt.

Ontkoppelen

Draai de ontkoppelingsring naar links en trek de insteeknippel los.

Om een gevaarlijke loskoppeling van de slang te voorkomen, moet de insteeknippel met de hand vast worden gehouden totdat de slang volledig is ontlucht.

- EN Features**
- 2-stage disconnection
 - Simple operation – minimal connection force needed
 - Long service life – low maintenance
 - Sterilizable (CIP)

Application

Compressed air and gas supply, measurement and control systems in:

- Machine and apparatus engineering
- Medical, chemical and pharmaceutical
- Food- and beverage industry

Procedure

Connection

Push plug into coupling until it is heard to engage by a click.

Disconnection

The plug is disconnected by turning the release ring to the left. It is held back by the safety catch, until the hose is ventilated. The plug can only be released by turning the release ring to the right.

- DE Auf einen Blick**
- 2-Stufen-Entkupplung
 - Einfache Bedienung – geringer Kraftaufwand
 - Hohe Standzeit – wartungsarm
 - Sterilisierbar (CIP)

Anwendungsbereich

Druckluft- und Gasversorgung, Mess-, Steuer- und Regeltechnik in:

- Anlagenbau
- Medizintechnik, Chemie und Pharma
- Nahrungsmittel- und Getränkeindustrie

Handhabung

Einkuppeln

Stecknippel in Kupplung eindrücken bis er hörbar einrastet.

Auskuppeln

Durch Linksdrehung des Auslöserings wird der Stecknippel ausgekuppelt, jedoch von der Sicherheitsklinke zurückgehalten, bis der Schlauch entlüftet ist. Erst nach Rechtsdrehung des Auslöserings wird der Stecknippel freigegeben.

- FR En bref**
- Désaccouplement en 2 temps Forme compacte
 - Maniement simple et sans effort
 - Durée de vie élevée – entretien minime
 - Stérilisable (CIP)

Domaine d'application

Alimentation en gaz et en air comprimé, équipement de mesure, de pilotage, de réglage et d'automatisme par ex.:

- moyens de production
- technique médicale, chimie et pharmacie
- Industrie alimentaire et des boissons

Manipulation

Accouplement

Introduire l'about de raccordement dans le coupleur jusqu'au déclic audible.

Désaccouplement

Un mouvement à gauche de la bague de déclenchement dégage l'about de raccordement retenu par le cliquet de sécurité jusqu'à ce que le tuyau soit purgé. En tournant la bague de déclenchement vers la droite l'about de raccordement sera entièrement délogé.

- NL In een oogopslag**

Stecknippel in Kupplung eindrücken bis er hörbar einrastet.

Auskuppeln

Durch Linksdrehung des Auslöserings wird der Stecknippel ausgekuppelt, jedoch von der Sicherheitsklinke zurückgehalten, bis der Schlauch entlüftet ist. Erst nach Rechtsdrehung des Auslöserings wird der Stecknippel freigegeben.

- FR En bref**
- Désaccouplement en 2 temps Forme compacte
 - Maniement simple et sans effort
 - Durée de vie élevée – entretien minime
 - Stérilisable (CIP)

Domaine d'application

Alimentation en gaz et en air comprimé, équipement de mesure, de pilotage, de réglage et d'automatisme par ex.:

- Moyens de production
- Technique médicale, chimie et pharmacie
- Industrie alimentaire et des boissons

Manipulation

Accouplement

Introduire l'about de raccordement dans le coupleur jusqu'au déclic audible.

Désaccouplement

Un mouvement à gauche de la bague de déclenchement dégage l'about de raccordement retenu par le cliquet de sécurité jusqu'à ce que le tuyau soit purgé. En tournant la bague de déclenchement vers la droite l'about de raccordement sera entièrement délogé.

- NL In een oogopslag**
- 2-staps ontkoppeling
 - Eenvoudig en zonder moeite te bedienen
 - Duurzaam – onderhoudsarm
 - Steriliseerbaar (CIP)

Toepassingsgebied

Perslucht- en gasvoorzieningen, meet- en regelsystemen:

- Installatiebouw
- Medische techniek, chemie en farmacie
- Voedsel- en drankenindustrie

Gebruik

Koppelen

Druk de insteeknippel in de koppeling totdat er hoorbaar een verbinding wordt gemaakt.

Ontkoppelen

De insteeknippel kan worden losgekoppeld door de ontkoppelingring naar links te draaien. De insteeknippel wordt door de borggrendel tegengehouden, totdat de slang is ontluft. De insteeknippel kan alleen worden ontkoppeld door de ontkoppelingring naar rechts te draaien.

EN Features

- 2-stage disconnection
- Simple operation – minimal connection force needed
- Long service life – low maintenance
- Sterilizable (CIP)

EN Application
Compressed air and gas supply, measurement and control systems in:

- Machine and apparatus engineering
- Medical, chemical and pharmaceutical
- Food- and beverage industry

EN Procedure Connection
Push plug into coupling until it is heard to engage by a click.

EN Disconnection
The plug is disconnected by turning the release ring to the left. It is held back by the safety catch, until the hose is ventilated. The plug can only be released by turning the release ring to the right.

DE Auf einen Blick

- 2-Stufen-Entkupplung
- Einfache Bedienung – geringer Kraftaufwand
- Hohe Standzeit – wartungsarm
- Sterilisierbar (CIP)

DE Anwendungsbereich
Druckluft- und Gasversorgung, Mess-, Steuer- und Regeltechnik in:

- Anlagenbau
- Medizinaltechnik, Chemie und Pharma
- Nahrungsmittel- und Getränkeindustrie

DE Handhabung Einkuppeln

EN

Features

- 2-stage disconnection
- Extremely robust design
- Long service life – low maintenance

Application

Compressed air and gas supply in extremely rough working conditions in:

- Marine and ship-building
- Petrochemical (oil and gas industries)

Procedure

Connection

Push plug into coupling and turn it to the right until the mechanism is heard to engage by a click.

Disconnection

Turn plug to the left while simultaneously gently pulling back the release ring. The plug is withheld from ejecting by the safety chamber and can only be released by another 90° turn to the left or to the right.

DE

Auf einen Blick

- 2-Stufen-Entkupplung
- Extrem robuste Ausführung
- Hohe Standzeit – wartungsarm

Anwendungsbereich

Druckluft und Gasversorgung in extrem rauen Bedingungen in:

- Marine und Schiffsbau
- Raffinerien (Öl- und Gasindustrie)

Handhabung

Einkuppeln

Stecknippel in Kupplung einführen, nach rechts drehen bis der Mechanismus hörbar einrastet.

Auskuppeln

Stecknippel nach links drehen und gleichzeitig Auslösering leicht nach hinten ziehen. Der Stecknippel wird beim Ausstoss von der Sicherheitskammer aufgefangen und erst nach einer weiteren Links- oder Rechtsdrehung um 90° freigegeben.

FR

En bref

- Désaccouplement en 2 temps Forme compacte
- Modèle extrêmement robuste
- Durée de vie élevée – entretien minime

Domaine d'application

Alimentation en gaz et en air comprimé pour des conditions extrêmement rudes, par ex.:

- Marine et construction navale
- Raffineries (industrie du pétrole et du gaz)

Manipulation

Accouplement

Introduire l'about de raccordement dans le coupleur et le tourner vers la droite jusqu'au dé clic audible du mécanisme.

Désaccouplement

Tourner l'about de raccordement vers la gauche et en même temps tirer la bague de déclenchement légèrement vers l'arrière. L'about de raccordement est toutefois retenu dans la chambre de sécurité et seulement libéré après une rotation de 90° vers la gauche ou vers la droite.

NL

EN

Features

- Mixing of different media is impossible, as connection is only possible with plug with identical key profile
- 2-stage disconnection
- Eliminates danger of wrong line connection

Application

For safety-related applications, toxic media in:

- Machine and apparatus engineering
- Medical, chemical and pharmaceutical

Procedure

Connection

Push plug into coupling with matching key profile until it is heard to engage by a click.

Disconnection

The plug is disconnected by turning the release ring to the left. It is held back by the safety clutch, until the hose is ventilated. The plug can only be released by turning the release ring to the right.

DE

Auf einen Blick

- Verwechslung verschiedener Medien ausgeschlossen, da nur mit Stecknippel mit gleichem Schlüssel zu betätigen
- 2-Stufen Entkupplung
- Einsatz bei Verwechslungsgefahr

Anwendungsbereich

Für sicherheitsrelevante Anwendungen, toxische Medien in:

- Anlagenbau
- Medizinaltechnik, Chemie und Pharma

Handhabung

Einkuppeln

Stecknippel mit gleichem geometrischem Schlüssel in entsprechende Kupplung eindrücken bis er hörbar einrastet.

Auskuppeln

Durch Linksdrehung des Auslöserings wird der Stecknippel ausgekuppelt, jedoch von der Sicherheitsklinke zurückgehalten bis der Schlauch entlüftet ist. Erst nach Rechtsdrehung des Auslöserings wird der Stecknippel freigegeben.

FR

En bref

- Intersersion de différents fluides impossible grâce à un profil de clé identique du coupleur et de son about.
- Désaccouplement en 2 temps Forme compacte
- Application en cas de risque d'intersersion

Domaine d'application

Pour les applications liées à la sécurité, les fluides toxiques, par ex.:

- construction d'installations
- technique médicale, chimie et pharmacie

Manipulation

Accouplement

Introduire l'about de raccordement dont la clé est identique à celle du coupleur jusqu'au déclic audible.

Désaccouplement

Un mouvement à gauche de la bague de déclenchement dégage l'about de raccordement qui cependant restera retenu par le cliquet de sécurité jusqu'à ce que le tuyau soit purgé. Ce n'est qu'en tournant la bague de déclenchement vers la droite que l'about de raccordement sera entièrement délogé.

NL

In een oogopslag

- Het samenkomen van vloeistoffen is uitgesloten, doordat er alleen verbinding kan worden gemaakt via een plug met een identiek sleutelprofiel
- 2-staps ontkoppeling
- Voorkomt verbinding met onjuiste lijn

Toepassingsgebied

Veiligheidsgerelateerde toepassingen, giftige vloeistoffen:

- Installatiebouw
- Medische techniek, chemie, farmacie

Gebruik

Koppelen

Druk de insteeknippel in de koppeling met het juiste sleutelprofiel, totdat er hoorbaar een verbinding wordt gemaakt.

Ontkoppelen

De insteeknippel kan worden ontkoppeld door de ontkoppelingring naar links te draaien. Deze wordt door de borggrendel tegengehouden, totdat de slang is ontlucht. De insteeknippel kan alleen worden ontkoppeld door de ontkoppelingring naar rechts te draaien.

EN

Features

- Mixing of different media is impossible as connection is only possible with plug with identical key profile
- Extremely robust design
- Eliminates danger of wrong line connection

Application

For safety-related applications, toxic media in:

- Machine and apparatus engineering
- Petrochemical (oil and gas industries)

Procedure

Connection

Push plug into coupling and turn it to the right until the mechanism is heard to engage by a click.

Disconnection

Turn plug to the left while simultaneously gently pulling back the release ring. In order to prevent the hose from ejecting dangerously, the plug must be held in the hand until the hose is completely ventilated.

DE

Auf einen Blick

- Verwechslung verschiedener Medien ausgeschlossen, da nur mit Stecknippel mit gleichem Schlüssel zu betätigen
- Robuste Ausführung
- Einsatz bei Verwechslungsgefahr

Anwendungsbereich

Für sicherheitsrelevante Anwendungen, toxische Medien in:

- Anlagenbau
- Raffinerien (Öl- und Gasindustrie)

Handhabung

Einkuppeln

Stecknippel in Kupplung einführen, nach rechts drehen bis der Mechanismus hörbar einrastet.

Auskuppeln

Stecknippel nach links drehen und gleichzeitig den Auslösering leicht nach hinten ziehen. Um ein gefährliches Rückschlagen zu vermeiden, muss der Stecknippel so lange in der Hand gehalten werden bis der Schlauch vollständig entlüftet ist.

FR

En bref

- Intersersion de différents fluides impossible grâce à un profil de clé identique du coupleur et de son about.
- Modèle robuste
- Application en cas de risque d'intersersion

Domaine d'application

Pour les applications liées à la sécurité, les fluides toxiques, par ex.:

- Construction d'installations
- Raffineries (industrie du pétrole et du gaz)

Manipulation

Accouplement

Introduire l'about de raccordement dans le coupleur et le tourner vers la droite jusqu'au déclic audible du mécanisme.

Désaccouplement

Tourner l'about de raccordement vers la gauche et en même temps tirer la bague de déclenchement légèrement vers l'arrière. Pour éviter un coup de fouet du tuyau, il convient de garder l'about en main jusqu'à ce que le tuyau soit entièrement purgé.

NL

In een oogopslag

- Het samenkomen van vloeistoffen is uitgesloten, doordat er alleen verbinding kan worden gemaakt via een plug met een identiek profiel

- Bijzonder robuust ontwerp

- Voorkomt het risico dat er verbinding wordt gemaakt met een onjuiste lijn

Toepassingsgebied

Veiligheidsgerelateerde toepassingen, giftige vloeistoffen:

- Installatiebouw
- Raffinaderijen (olie- en gasindustrie)

Gebruik

Koppelen

Druk de insteeknippel in de koppeling en draai naar rechts totdat het mechanisme hoorbaar een koppeling maakt.

Ontkoppelen

Draai de insteeknippel naar links en trek gelijktijdig de ontkoppeling voorzichtig naar achteren. Om een gevaarlijke loskoppeling van de slang te vermijden, moet de insteeknippel met de hand vast worden gehouden totdat de slang volledig is ontlucht.

The pressure ranges vary for each product shown in this leaflet. Before ordering, please mention the application pressure to make sure the product meets the system requirements.

Temperature range of our products vary according to the sealing components chosen. Most common sealing types are listed below. For custom requirements, please contact us.

Is the actual diameter which fluid passes through. TST is capable of manufacturing products with nominal diameter of DN 2,7 mm's up to DN 75 mm's.
