differences in packaging form for our connector DF12N series

Dear Sir or madam,

1 Occurrence situation

- 1)Target product: DF12N series
- 2)Target lot : 2020/8/1~

2 Phenomenon

In our product DF12N series,
 we have delivered the product in a different packaging condition
 from the description in the product change notification.

3 Packaging

Packing condition 梱包状況 袋/シール袋

New packaging

Pad in polyethylene plastic bag のままリール箱に梱包

品名ラベル Product name label.

製品のMSLは1相当となり、保管中の吸湿によるリスクを排除できた為、袋無し梱包に変更しました。

This product is equivalent to MSL1. It means that there is no effect on the function even if it is left in the atmosphere.

Existing packing condition(Plastic bag / silica gel attached)

New packing condition of product change notification(without bag / silica gel)

4 About our correspondence

This product is equivalent to MSL1, and the current packaging is overpacked.
There is no effect on the product,
so we would appreciate it if you could continue to use the product that has already been delivered.
In addition, we will deliver in the correct packing condition
(without bag and silica gel) from the delivery after 8/16.

(*MSL(Moisture Sensitivity Level:JEDEC standard))1:If the temperature is 30°C and the humidity is 85% or less,
it means that there is no effect on the function even if it is left in the atmosphere.)

We apologize for the inconvenience, but if you receive this document,
please sign / mark it in the recipient field and return it.
