

## Plain jaws for jaw quick-change system

Plain jaws suitable for many vices

**ATORN**<sup>®</sup>

### Application

Base jaws for retaining interchangeable jaw grips produced from high-strength aluminium and case-hardened steel.

### Version

- For the ATORN click system
- The concept of holding, guiding and locking offers the highest level of production safety
- Interchangeable jaw grips are available in many widths

### Advantage

- Considerably shorter set-up times thanks to quick change of the interchangeable jaw grips (less than 30 seconds)
- Large range and a large number of combination options facilitate almost any clamping task
- Very flexible as the system can be adapted to all common vices

### Delivery

1 set of plain jaws incl. fastening screws
