

Temperature measurement with thermoelements requires a very precise determination of the reference point temperature. The IM-3-CJT offers this possibility.

A Pt100 with 4-wire circuitry is mounted and encapsulated in two 3-pin standards clamps. The Pt100 measures the temperature at the contact point. The thermocouples is connected to the IM-3-CJT at the two open clamps.

The IM-3-CJT is plugged to the correspondent IM34* in place of the 3-pin screw terminals.

- **High measuring accuracy through Pt100 in 4-wire circuitry**
- **Rugged encapsulation**
- **Simply plugged into place**

Accessories
IM-3-CJT

Type designation	IM-3-CJT
Ident no.	6900524
Weight	18 g
