

### DESCRIPTION

The TBMA is a test board for the MagAlpha magnetic position sensor family. The TBMA allows users to run and test MagAlpha sensors quickly. TBMA boards come in long (LT) format, where the sensor is mounted on the edge of the board, and they can be used in both side-shaft and end-of-shaft configurations.

TBMA test boards are compatible with the MACOM evaluation kit and EVKT-MagAlpha-MagDiff, offering seamless connection and operation of MagAlpha sensors. In addition, these boards allow users to evaluate MagAlpha functionalities and performances with their own set-up.

The TBMA test board only includes the assembled board with the sensor and decoupling capacitors and connectors. It does not include connectors for certain board types.

### FEATURES

- Evaluation Board Supports Side-Shaft and End-of-Shaft Mounting
- Compatible with the EVKT-MagAlpha-MagDiff <sup>(1)</sup>

### APPLICATIONS

- Servo Drives
- Robotics
- Automotive
- Brushless DC (BLDC) Motor Commutation
- Encoders

All MPS parts are lead-free, halogen-free, and adhere to the RoHS directive. For MPS green status, please visit the MPS website under Quality Assurance. "MPS", the MPS logo, and "Simple, Easy Solutions" are registered trademarks of Monolithic Power Systems, Inc. or its subsidiaries.

**Note:**

- 1) The TBMA is also compatible with the EVKT-MACOM.

## BOARD TYPES

Different board types are available, and each has a different schematic and layout design (see Table 1). Determine which board type to use based on the selected sensor part number. The board can be used for both end-of-shaft and side-shaft configuration.

## MAGNET SUPPLIERS

A selection of magnets are available with MPS's MAG10 magnet product family. This family offers three different magnet geometries: cylinder, ring, and half-cylinder. Figure 36 shows the available magnet geometries. The MPS MAG10 magnet product family can be purchased directly from MPS.

**Figure 36: MPS's MAG10 Magnet Geometries**

Visit our website learn more about our magnet portfolio:

<https://www.monolithicpower.com/en/products/sensors/position-sensors/position-sensor-magnets.html>

If the magnet required for your application is not listed on our website, consider the following non-exhaustive list of possible magnet suppliers (see Table 16). The magnetization direction must be selected given that most sold magnets are often axially magnetized, which is not a magnetization direction typically required in magnetic angle-sensing applications. Angle-sensing applications typically use diametrically magnetized magnets.
