

After a long period of research and testing, not by well-suited marketing managers, but by those who really matter: professional painters/decorators (who else could really judge a paintbrush?), we are proud to say that we have succeeded in designing an absolute top-of-the-bill professional paintbrush!

The **CLING ON!** is, being handmade in Holland, a superb paintbrush, especially meant for working with (all) waterborne paints.

Whether it's a primer, an enamel, 2K epoxy, a (structured) wallpaint, adhesive, stain or varnish: it all goes smoothly with a**CLING ON!**; so smooth you will fall in love with it...

Super sharp cutting in, fuller and smoother finish, very easy to clean and all this with less effort and, very important: in less time!

And although the **CLING ON!** is extremely durable en will retain it's shape even after long and intensive use, the day inevitably will come, that you need a new one...

Be prepared for this, for it's not easy to say goodbye...
